The earlier version of this book published on the Internet literature sites in January 2009 was called «The mystery of Dyatlov's accident». In August 2011 a «paper version» of the book, improved and revised, was issued in an edition of 3000 copies, with financial help of Nikolai Antonovich Rundkvist and his publishing house, Eltsin URFU (former USTU, UPI) and a fund «In memory of Dyatlov's group» with active participation of an academician P. I. Bartolomey. We thank everyone for contribution to our book. According to a proposal of Bartolomey we changed a title of the book to «The mystery of Dyatlov's group death» and its size was considerably cut by way of removal of some appendices (they can be found in the earlier edition). We also added several articles of other authors in order to «introduce different opinions» that existed before our book. This book edition - more full and correct - was created on the basis of new investigation facts and as a result of constant

revision of the book during last years. The huge «inertia» of the investigation of Dyatlov's group Tragedy let us to receive new proofs and data of its events and facts but we also reached a higher level of understanding of crucial reasons of accidents increase in tourism and mountaineering during solar activity peaks, and explored connection of this factor with other natural phenomena.

Mountain of the Dead - Keith McCloskey 2013-07-01

The Dyatlov Pass incident resulted in nine unsolved, mysterious deaths; Keith McCloskey attempts to decipher the bizzare events that led up to that night and the subsequent aftermath. In January 1959, 10 experienced young skiers set out to travel to a mountain named Mount Otorten in the far north of Russia. Otorten translates to "don't go there" in the local Mansi language. During the trip, one of the skiers fell ill and returned. The remaining nine lost their way and ended up on another mountain slope known as Kholat Syakhl, or "Mountain of the Dead." On the night of February 1, 1959, something or someone caused the skiers to flee their tent in terror, using knives to slash their way out instead of using the entrance. When they failed to return home, search parties were sent out and their bodies were found, some with massive internal injuries but all without external marks. The autopsy report showed that the injuries

were caused by "an unknown compelling force." Subsequently, the area was sealed off for years by the authorities and the deaths and events of that night remained unexplained. Benefiting from original research carried out in Russia, this book attempts to explain what happened to the nine skiers who lost their lives in what has come to be known as the "Dyatlov Pass Incident."

In February 1959, nine hikers, led by Igor Dyatlov, died in mysterious circumstances on the slopes of the Ural Mountains. Rescuers found their bodies hundreds of metres from the campsite. Numerous conspiracy theories have since offered more outlandish explanations: from Soviet military tests to yetis and aliens. Sixty years on, the Dyatlov Pass incident is a cold case that still has investigators stumped.

The Lighthouse - Keith McCloskey 2014-07-01

On 26 December 1900, the vessel *Hesperus* arrived at Eilean Mor in the remote Outer Hebrides with a relief lighthouseman and fresh provisions. The lighthouse had been in operation for a year, but it had been noted

that no light had been seen from Eilean Mor for several days. The relief keeper, Joseph Moore, found the lighthouse to be completely deserted, and a subsequent search of the island failed to reveal any sign of what had happened to the three keepers. The last entry in the logbook had been made on 15 December and contained a number of strange and distressing clues as to the mental states of the men. One was reported to have been crying, while another had become 'very quiet'. When it was revealed that the men's oilskin coats were missing and the clock in the lighthouse had stopped, theories surrounding the keepers' fates inevitably proliferated. These included a giant wave washing them away, murder or suicide. Others favoured more esoteric explanations - Eilean Mor was believed to have mystical properties. In *The Lighthouse*, Keith McCloskey explores this mysterious and chilling story in depth for the first time and reveals a shocking conclusion.

Don't Go There - Svetlana Oss 2020-06-15

All of Russia knows this murder mystery. Nobody knows the truth. Nine wholesome University students mountaineering in the Urals go missing, and are later uncovered from the snows of a bleak forest's edge in the Siberian Taiga, in a series of grisly discoveries. Why were the climbers wearing no boots? Why were stout branches of the forest pines singed to a height of thirty feet? What were the mysterious markings in the bark of nearby trees? What was so-called "overwhelming force" that was capable of breaking eight ribs in a single blow without bruises? Why the KGB infiltrated all the search parties and attended the funerals? Why the clothes were tested for radiation? The authoritative book - by

international author and investigative journalist: Svetlana Oss (Osadchuk) who has been the leading commentator of this profound mystery since Moscow Times first sponsored her 2007-2008 investigation. The savage events of 1st February 1959, which took nine lives and left a trail of smashed and semi-naked bodies across the slopes of Mount Ortoten, have confounded every credible explanation. Wild and convincing theories abound. All of them are flawed by the facts. Was it sex? Was it hypothermia? Was it robbers? In the first reportage to be published in the English language, The Moscow Times' meticulous coverage presented the existing versions that have proliferated over fifty years, carefully sifting each idea, from mad guesses by superstitious nuts, to reasoned findings of the official investigation. Now Svetlana Oss formulates the true answer. 'Don't go there' explains for the first time how this odyssey by nine seasoned climbers, nine experienced members of the Ekaterinburg University Climbing Society came to end in disaster. New information, new analysis, new brains - the answer will astound you. "I am sure that nothing else that I have written has ever made such a noise in the world, and no wonder. This mystery has an invariable and puzzling quirk: at least one circumstance is inevitably contradicted by some other. Not a single explanation out of the many is able to conquer the riddle - there is always at least one fact that completely ruins whatever theory one prefers. This excites people. It excites me."
