Big White Ghetto - Kevin D. Williamson 2020-11-17

"You can't truly understand the country you're living in without reading Williamson." —Rich Lowry, National Review "His observations on American culture, history, and politics capture the moment we're in—and where we are going." —Dana Perino, Fox News An Appalachian economy that uses cases of Pepsi as money. Life in a homeless camp in Austin. A young woman whose résumé reads, "Topless Chick, Uncredited." Remorselessly unsentimental, Kevin D. Williamson is a chronicler of American underclass dysfunction unlike any other. From the hollows of Eastern Kentucky to the porn business in Las Vegas, from the casinos of Atlantic City to the heroin rehabs of New Orleans, he depicts an often brutal reality that does not fit nicely into any political narrative or comfort any partisan. Coming from the world he writes about, Williamson understands it in a way that most commentators on American politics and culture simply can't. In these sometimes savage and often hilarious essays, he takes readers on a wild tour of the wreckage of the American republic—the "white minstrel show" of right-wing grievance politics, progressive politicians addicted to gambling revenue, the culture of passive victimhood, and the reality of permanent poverty. Unsparring yet never unsympathetic, Big White Ghetto provides essential insight into an enormous but forgotten segment of American society.

Libra - Don DeLillo 1991-05-01

From the author of White Noise (winner of the National Book Award) and The Silence, an eerily convincing fictional speculation on the events leading up to the assassination of John F. Kennedy In this powerful, unsettling novel, Don DeLillo chronicles Lee Harvey Oswald's odyssey from troubled teenager to a man of precarious stability who imagines himself an agent of history. When "history" presents itself in the form of two disgruntled CIA operatives who decide that an unsuccessful attempt on the life of the president will galvanize the nation against communism, the scales are irrevocably tipped. A gripping, masterful blend of fact and fiction, alive with meticulously portrayed characters both real and created, Libra is a grave, haunting, and brilliant examination of an event that has become an indelible part of the American psyche. *Reconsidering Children's Early Development and Learning* - United States. National Education Goals Panel. Goal 1 Technical Planning Group 1995

In 1990, the National Education Goals were established by the President and the 50 state governors. Great attention has been given to Goal 1, dubbed the "readiness" goal: By the year 2000, all children in America will start school ready to learn. The Goal 1 Resource Technical Planning Groups were asked to suggest ways in which Goal 1 could be measured. The purpose of this document is to further amplify the dimensions of early learning and development used by the National Educational Goals Panel to measure progress toward Goal 1. The following five dimensions are discussed: (1) "Physical Well-Being and Motor Development"; (2) "Social and Emotional Development," serving as the foundation for relationships which give meaning to school experience; (3) "Approaches toward Learning," referring to the inclinations, dispositions, or styles that reflect ways children become involved with learning; (4) "Language Development"; and (5) "Cognition and General Knowledge." For each of the dimensions, a rationale; general definition; the relationship to individual, cultural, and contextual variation; and a summary are given. The report concludes with a discussion of underlying issues, implications, and action steps. (Contains 83 references.) (BGC)

American Marxism - Mark R. Levin 2021-07-13

#1 NEW YORK TIMES BESTSELLER The seven-time #1 New York Times bestselling author, Fox News star, and radio host Mark R. Levin explains how the dangers he warned against in the "timely yet timeless" (David Limbaugh, author of Jesus Is Risen) bestseller Liberty and Tyranny have come to pass. In 2009, Mark R. Levin galvanized conservatives with his unforgettable manifesto Liberty and Tyranny, by providing a philosophical, historical, and practical framework for halting the liberal assault on Constitution-based values. That book was about standing at the precipice of progressivism's threat to our freedom and now, over a decade later, we're fully over that precipice and paying the price. In American Marxism, Levin explains how the core elements of Marxist ideology are now pervasive in American society and culture—from our schools, the press, and corporations, to Hollywood, the Democratic Party, and the Biden presidency—and how it is often cloaked in deceptive labels like "progressivism," "democratic socialism," "social activism," and more. With his characteristic trenchant analysis, Levin digs into the psychology and tactics of these movements, the widespread brainwashing of students, the anti-American purposes of Critical Race Theory and the Green New Deal, and the escalation of repression and censorship to silence opposing voices and enforce conformity. Levin exposes many of the institutions, intellectuals, scholars, and activists who are leading this revolution, and provides us with some answers and ideas on how to confront them. As Levin writes: "The counter-revolution to the American Revolution is in full force. And it can no longer be dismissed or ignored for it is devouring our society and culture, swirling around our everyday lives, and ubiquitous in our politics, schools, media, and entertainment." And, like before, Levin seeks to rally the American people to defend their liberty.

Dark Towers - David Enrich 2020-02-18

#1 WALL STREET JOURNAL BESTSELLER * NEW YORK TIMES BESTSELLER New York Times finance editor David Enrich's explosive exposé of the most scandalous bank in the world, revealing its shadowy ties to Donald Trump, Putin's Russia, and Nazi Germany "A jaw-dropping financial thriller" —Philadelphia Inquirer On a rainy Sunday in 2014, a senior executive at Deutsche Bank was found hanging in his London apartment. Bill Broeksmit had helped build the 150-year-old financial institution into a global colossus, and

his sudden death was a mystery, made more so by the bank's efforts to deter investigation. Broeksmit, it turned out, was a man who knew too much. In *Dark Towers*, award-winning journalist David Enrich reveals the truth about Deutsche Bank and its epic path of devastation. Tracing the bank's history back to its propping up of a default-prone American developer in the 1880s, helping the Nazis build Auschwitz, and wooing Eastern Bloc authoritarians, he shows how in the 1990s, via a succession of hard-charging executives, Deutsche made a fateful decision to pursue Wall Street riches, often at the expense of ethics and the law. Soon, the bank was manipulating markets, violating international sanctions to aid terrorist regimes, scamming investors, defrauding regulators, and laundering money for Russian oligarchs. Ever desperate for an American foothold, Deutsche also started doing business with a self-promoting real estate magnate nearly every other bank in the world deemed too dangerous to touch: Donald Trump. Over the next twenty years, Deutsche executives loaned billions to Trump, the Kushner family, and an array of scandal-tarred clients, including convicted sex offender Jeffrey Epstein. *Dark Towers* is the never-before-told saga of how Deutsche Bank became the global face of financial recklessness and criminality—the corporate equivalent of a weapon of mass destruction. It is also the story of a man who was consumed by fear of what he'd seen at the bank—and his son's obsessive search for the secrets he kept.

Sick City - Patrick Condon 2021-01-30

Sick City is a call to action prompted by the crisis that crippled our cities, the pandemic. But the pandemic has brought the issues of race, inequality and unaffordability to the forefront as well, illustrating how all of these ills can be traced to unequal access to urban land. Patrick Condon walks the reader through that history, proving that most of these problems are rooted in the inflation of urban land value - land that is no longer priced for its value for housing but as an asset class in a global market hungry for assets of all kinds. The American wage earner who is most affected by COVID is also the worst hit by the surging price of urban land which has made the essential commodity of housing increasingly inaccessible. Not only does Condon dive deep into myriad and credible references to prove these points, but he also wraps up the conversation with some eminently practical and widely precedented policy actions that municipalities can enact - policy tools to establish housing justice at the same time slow the flow of land value increases into the pockets of land speculators.

We're All in it - Eric Allen Johnston 1948

Hackers - Steven Levy 2010-05-19

This 25th anniversary edition of Steven Levy's classic book traces the exploits of the computer revolution's original hackers -- those brilliant and eccentric nerds from the late 1950s through the early '80s who took risks, bent the rules, and pushed the world in a radical new direction. With updated material from noteworthy hackers such as Bill Gates, Mark Zuckerberg, Richard Stallman, and Steve Wozniak, *Hackers* is a fascinating story that begins in early computer research labs and leads to the first home computers. Levy profiles the imaginative brainiacs who found clever and unorthodox solutions to computer engineering problems. They had a shared sense of values, known as "the hacker ethic," that still thrives today. *Hackers* captures a seminal period in recent history when underground activities blazed a trail for today's digital world, from MIT students finagling access to clunky computer-card machines to the DIY culture that spawned the Altair and the Apple II.

Leaders in Curriculum Studies - Edmund C. Short 2009

In the 1950s and 1960s school teaching became a university-based profession, and scholars and policy leaders looked to the humanities and social sciences in building an appropriate knowledge base. By the mid-1960s there was talk about a "new" philosophy, history, and sociology of education. Curriculum

thinkers such as Joseph Schwab, Dwayne Heubner and Paul Hirst initiated new intellectual projects to supplement applied work in curriculum. By the 1970s the field was in the process of re-conceptualization, as a new generation of scholars provided deep critical insights into the social, political and cultural dynamics of school experience and templates for renewal of curriculum research and practice. In this book, 18 leading curriculum scholars since 1970 who remain influential today present the fascinating stories of their lives and important new contributions to the field. They trace their early experiences in teaching and curriculum development, creative directions in their work, mature ideas and perceptions of future directions for the field. Each chapter contains a list of works chosen by the authors as their personal favorites. This book offers an ideal companion to courses in curriculum studies and a guide for scholars seeking to understand the main currents in this field today. In a single volume it presents a bird's eye view of the entire field as told in the words of its leading figures. "This collection casts a bright light on the identity of the field of curriculum studies and its evolution. The essays make for wonderfully accessible and engaging reading. They are even more impressive in the fluency with which the authors use their individual histories to illuminate the field. We in the next cohort might take a page from their experiences, ideas, accomplishments, and sometimes explicit advice." From the Foreword by Reba Page

The Age of Unpeace - Mark Leonard 2021-09-02

A FINANCIAL TIMES ECONOMICS BOOK OF THE YEAR 'Compulsively readable... An essential course in geopolitical self-help' - Adam Tooze 'Full of fresh - and often surprising - ideas' - Niall Ferguson 'Extraordinary... One of those rare books that defines the terms of our conversation about our times' - Michael Ignatieff We thought connecting the world would bring lasting peace. Instead, it is driving us apart. In the three decades since the end of the Cold War, global leaders have been integrating the world's economy, transport and communications, breaking down borders in the hope of making war impossible. In doing so, they have unwittingly created a formidable arsenal of weapons for new kinds of conflict and the motivation to keep fighting. Rising tensions in global politics are not a bump in the road - they are part of the paving. Troublingly, we are now seeing rising conflict at every level, from individuals on social media all the way up to nation-states in entrenched stand-offs. The past decade has seen a new antagonism between the US and China; an inability to co-operate on global issues such as climate change or pandemic response; and a breakdown in the distinction between war and peace, as overseas troops are replaced by sanctions, cyberwar, and the threat of large migrant flows. As a leading authority on international relations, Mark Leonard has been inside many of the rooms where our futures, at every level of society, are being decided - from the Facebook HQ and facial recognition labs in China to meetings in presidential palaces and at remote military installations. In seeking to understand the ways that globalisation has broken its fundamental promise to make our world safer and more prosperous, Leonard explores how we might wrest a more hopeful future from an age of unpeace.

Jewish Community of Atlanta, The - Jeremy Katz, Foreword by 2021

As Atlanta evolved from a sleepy, backwater, 19th-century frontier railroad town into a 21st-century international metropolis, Jewish men and women significantly contributed to the rich tapestry of the "Gate City of the South." The commercial infrastructure of the expanding city was greatly enhanced through numerous small businesses established by Jewish merchants, some of which became major players in various industries. Many of Atlanta's most recognizable icons--The Coca-Cola Company, Georgia Institute of

Technology, and the Atlanta Braves--originated, in part, thanks to support from visionary leaders in the Jewish community. While there are many success stories throughout Atlanta's Jewish history, there are also dark episodes of blatant antisemitism that traumatized the community and had national implications. The lynching of Leo M. Frank; the bombing of the city's historic synagogue, the Hebrew Benevolent Congregation; and the deliberate expulsion of Jewish students from Emory University Dental School marred Atlanta's self-proclaimed reputation as "The City Too Busy to Hate."
