Les fonts literàries de la novel·la - Abel Soler 2020-10-19

Al segon volum es presenten, de manera introductòria o preliminar, aspectes lingüístics de la novel·la catalana Curial e Güelfa, com ara les preferències lèxiques valencianes, els nombrosos italianismes (per influència sobretot de Boccaccio, però també del registre col·loquial) i alguna interferència del castellà, el francès i l'occità. Però, sobretot, s'estudien detalladament les fonts literàries que Enyego d'Àvalos emprà

per a enriquir la seua ficció: catalanes, castellanès i provençals; italianes (Dante, Pretarca, Boccaccio i, sobretot, els comentis dantescos de Da Imola i Pietro Alighieri); obres de temàtica religiosa i patristica... Es presta atenció a la petjada de clàssics antics (Homer, Virgili, Ovidi, Lucà, Lluçà, Plató...), que marquen determinats passatges d'una novel·la de "cavalleria humanística", on es palesa l'accés del cavaller ibèric a clàssics redescoberts per l'Humanisme italià.

Curious Naturalists - Dr. Niko Tinbergen 2017-01-12

Dr. Niko Tinbergen was well known as a naturalist and a student of animal behaviour in England, on the Continent and in the United States. Ever since he was a young student in Holland he had been curious about nature, and in this book he sets out some of the facts that 25 years of curiosity gave him. As a biologist, anything living was his province—the bee-killing wasps and the digger wasps of the Dutch sand dunes; the Snow Bruntings and Phalaropes of Greenland; Hobbies and other hawks; moths and butterflies in various parts of England and Holland; Black-headed Gulls of the Ravenglass nature reserve, Cumberland, the Kittiwakes and Eider Ducks of the Farne Islands off the coast of Northumberland. Readers cannot fail to be struck—and possibly sometimes amused—by the patience and ingenuity shown in the field studies undertaken by Dr. Tinbergen and his fellow naturalists—and which are now passed on for the benefit and interest of his readers. The studies were always undertaken seriously, but this did not prevent Dr. Tinbergen from writing about them in the liveliest way; he realised that quite often he and his friends must have seemed to onlookers to be very curious naturalists indeed.

Plate Tectonics - Wolfgang Frisch 2010-11-02

How are mountains formed? Why are there old and young mountains? Why do the shapes of South America and Africa fit so well together? Why is the Pacific surrounded by a ring of volcanoes and earthquake prone areas while the edges of the Atlantic are relatively peaceful? Frisch and Meschede and Blakey answer all these questions and more through the presentation and explanation of the geo-dynamic processes upon which the theory of continental drift is based and which have led to the concept of plate tectonics.

Italian Fascism and Developmental Dictatorship - A. James Gregor

2014-07-14

Political scientists generally have been disposed to treat Italian Fascism--if not generic fascism--as an idiosyncratic episode in the special history of Europe. James Gregor contends, to the contrary, that Italian Fascism has much in common with an inclusive class of developmental revolutionary regimes. Originally published in 1980. Deep Time of the Media - Siegfried Zielinski 2006

A quest to find something new by excavating the deep time of media's development - not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development - dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in Deep Time of the Media, he illuminates turning points of media history - fractures in the predictable - that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of dreamers and

modelers of media worlds, from the ancient Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. separated, Zielinski writes. He describes models and machines - including a theatre of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among others - that make this connection. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the deep time media history shed light on today's media landscape and may help us map our expedition to the media future.

The Periodic Table - Primo Levi 1996-10-01

The Periodic Table is largely a memoir of the years before and after Primo Levi's transportation from his native Italy to Auschwitz as an anti-Facist partisan and a Jew. It recounts, in clear, precise, unfailingly beautiful prose, the story of the Piedmontese Jewish community from which Levi came, of his years as a student and young chemist at the inception of the Second World War, and of his investigations into the nature of the material world. As such, it provides crucial links and backgrounds, both personal and intellectual, in the tremendous project of remembrance that is Levi's gift to posterity. But far from being a prologue to his experience of the Holocaust, Levi's masterpiece represents his most impassioned response to the events that engulfed him. The Periodic Table celebrates the pleasures of love and friendship and the search for meaning, and stands as a monument to those things in us that are capable of resisting and enduring in the face of tyranny.

Girolamo Portos Bericht von seiner Reise nach Süddeutschland und Österreich. Edition der Handschriften von 1709, 1710 und 1715 mit sprachhistorischem Kommentar - Katja Seidel 2014-02-27

Nachwächter, ein ausgewogenes konfessionelles Miteinander und eine gute zivile Ordnung, aber auch Hinrichtungen, Kriegsfolgen und Frauen in kurzen Röcken - als der italienische Adlige Girolamo Porto 1709 auf Deutschlandreise geht, stösst er auf Unbekanntes und Befremdliches. Die Eindrücke von seiner Reise jenseits der Alpen schrieb er in einem Heft nieder, das lange in der Biblioteca Bertoliana in Vicenza schlummerte. Mit der hier vorliegenden Edition wird nicht nur ein

kulturhistorischer Einblick in das Deutschland des 18. Jahrhunderts aus den Archiven geholt; der Text bietet vielmehr die Grundlage für eine ausführliche sprachliche Analyse: Welche Entlehnungen resultieren aus dem Kontakt mit der deutschen Kultur und inwieweit lassen sich aus der Reisebeschreibung Aufschlüsse über regionale oder mündliche Phänomene ziehen? Wörter und Wendungen wie kellerinche, peker, opfen und brandvin zeugen ebenso von dieser Beeinflussung wie dar'il Niccol`o, slittata und swimer.

History of the Italian Agricultural Landscape - Emilio Sereni 2014-07-14

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. A Tour of the Calculus - David Berlinski 2011-04-27

Were it not for the calculus, mathematicians would have no way to describe the acceleration of a motorcycle or the effect of gravity on thrown balls and distant planets, or to prove that a man could cross a room and eventually touch the opposite wall. Just how calculus makes these things possible and in doing so finds a correspondence between

real numbers and the real world is the subject of this dazzling book by a writer of extraordinary clarity and stylistic brio. Even as he initiates us into the mysteries of real numbers, functions, and limits, Berlinski explores the furthest implications of his subject, revealing how the calculus reconciles the precision of numbers with the fluidity of the changing universe. "An odd and tantalizing book by a writer who takes immense pleasure in this great mathematical tool, and tries to create it in others."--New York Times Book Review

Soumchi - Amos Oz 2012-08-21

A tale of "dazzling brilliance . . . a simple story which conveys boundless meanings both modest and diverse, set in Jerusalem directly after WWII" (Historical Novel Society). When Soumchi, an eleven-year-old boy growing up in British-occupied Jerusalem just after World War II, receives a bicycle as a gift from his Uncle Zemach, he is overjoyed—even if it is a girl's bicycle. Ignoring the taunts of other boys in his neighborhood, he dreams of riding far away from them, out of the city and across the desert, toward the heart of Africa. But first he wants to show his new prize to his friend Aldo. In the tradition of such memorable characters as Huckleberry Finn and Holden Caulfield, Amos Oz's Soumchi is fresh, funny, and always engaging. "What a difference spirit and talent make! . . . told . . . with zest and buoyant humor, from the dual viewpoint of the alternately crushed and elated Soumchi and the amused author who delights in his boyhood excesses." —Kirkus Reviews "Oz shows a remarkable ability to stay true to his character and expand him fully into a multi-faceted jewel. Soumchi is a concise read which enhances each person's view on life, possessions, and how tender life and far-reaching imagination can be at such a sensitive age." —Historical Novel Society

Scelte alimentari non autorizzate - Marco Pizzuti

2016-01-12T12:25:00+01:00

Il cibo ormai non è più come un tempo e per ottenere le vitamine di un'arancia degli anni '30 oggi ne dobbiamo consumare 8. Frutta e verdura sono quasi insapori e in ogni alimento troviamo tracce di sostanze tossiche all'origine di molte patologie. Multinazionali onnipotenti stanno utilizzando la genetica per brevettare gli alimenti e impadronirsi del mercato mondiale del cibo, mentre alcuni scienziati denunciano pericolose manipolazioni scientifiche che hanno come unico scopo il massimo profitto. Quasi tutta la mangimistica dei nostri allevamenti è già stata sostituita con prodotti geneticamente modificati e i generi alimentari di eccellenza italiani sono stati contaminati da ciò che mangiano gli animali. Tuttavia, i ricercatori della nutrigenomica stanno guidando una rivoluzione scientifica e culturale sugli eccezionali effetti di una corretta alimentazione: attivare geni preziosi del nostro DNA, disattivare quelli difettosi, guarire dalle malattie o prevenirle senza medicine. La salute è il bene più prezioso che abbiamo, ed è opportuno conoscere i pericoli del cibo industriale, gli alimenti da evitare e come

applicare le nuove scoperte nella vita di tutti i giorni. "Chi controlla il cibo controlla la popolazione". - Henry Kissinger

Computational Linear and Commutative Algebra - Martin Kreuzer
2016-09-06

This book combines, in a novel and general way, an extensive development of the theory of families of commuting matrices with applications to zero-dimensional commutative rings, primary decompositions and polynomial system solving. It integrates the Linear Algebra of the Third Millennium, developed exclusively here, with classical algorithmic and algebraic techniques. Even the experienced reader will be pleasantly surprised to discover new and unexpected aspects in a variety of subjects including eigenvalues and eigenspaces of linear maps, joint eigenspaces of commuting families of endomorphisms, multiplication maps of zero-dimensional affine algebras, computation of primary decompositions and maximal ideals, and solution of polynomial systems. This book completes a trilogy initiated by the uncharacteristically witty books Computational Commutative Algebra 1 and 2 by the same authors. The material treated here is not available in book form, and much of it is not available at all. The authors continue to present it in their lively and humorous style, interspersing core content with funny quotations and tongue-in-cheek explanations.
