Canonical Ramsey Theory on Polish Spaces - Vladimir Kanovei 2013-09-12

This book lays the foundations for an exciting new area of research in descriptive set theory. It develops a robust connection between two active topics: forcing and analytic equivalence relations. This in turn allows the authors to develop a generalization of classical Ramsey

theory. Given an analytic equivalence relation on a Polish space, can one find a large subset of the space on which it has a simple form? The book provides many positive and negative general answers to this question. The proofs feature proper forcing and Gandy-Harrington forcing, as well as partition arguments. The results include strong canonization theorems for many classes

of equivalence relations and sigma-ideals, as well as ergodicity results in cases where canonization theorems are impossible to achieve. Ideal for graduate students and researchers in set theory, the book provides a useful springboard for further research.

Tacky - Rax King 2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our

lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor. A

Devil in the Grove - Gilbert King 2012-03-06
Winner of the Pulitzer Prize "A must-read, cannot-put-down history." — Thomas Friedman, New York Times Arguably the most important American lawyer of the twentieth century, Thurgood Marshall was on the verge of bringing the landmark suit *Brown v. Board of Education* before the U.S. Supreme Court when he became embroiled in a case that threatened to change the course of the civil rights movement and cost him his life. In 1949, Florida's orange industry was booming, and citrus barons got rich on the backs of cheap Jim Crow labor with the help of Sheriff Willis V. McCall, who ruled Lake County with murderous resolve. When a white seventeen-year-old girl cried rape, McCall pursued four young black men who dared envision a future for themselves beyond the

groves. The Ku Klux Klan joined the hunt, hell-bent on lynching the men who came to be known as "the Groveland Boys." Associates thought it was suicidal for Marshall to wade into the "Florida Terror," but the young lawyer would not shrink from the fight despite continuous death threats against him. Drawing on a wealth of never-before-published material, including the FBI's unredacted Groveland case files, as well as unprecedented access to the NAACP's Legal Defense Fund files, Gilbert King shines new light on this remarkable civil rights crusader.

Bream Gives Me Hiccups - Jesse Eisenberg

2015-08-31

The wildly inventive debut collection of stories by the Oscar-nominated star of *The Social Network*. “Hilarious . . . It’s a hoot” (People, The Best New Books). Jesse Eisenberg, known for his iconic film roles, his regular pieces in the *New Yorker* and two critically acclaimed plays, proves himself “a deeply original comic voice” in these 28 stories” about the funniness, sadness, and strangeness of everyday life and they really made me laugh” (Roz Chast). Moving from contemporary LA to the dorm rooms of an American college to ancient Pompeii, Eisenberg throws the reader into a universe of social misfits, reimagined scenes from history, and ridiculous overreactions; a college freshman forced to live with a roommate is stunned when one of her ramen packets goes missing (“She didn’t have ‘one’ of my ramens. She had a chicken ramen.”); Alexander Graham Bell has

teething problems with his invention (“I’ve been calling Mabel all day, she doesn’t pick up! Yes, of course I dialed the right number—2!”); and in the title story, a precocious and privileged nine-year-old boy finds himself in the uncomfortable position as an amateur restaurant critic.

Featuring illustrations by award-winning cartoonist Jean Jillian, this “alphabet soup of sketches, riffs, and innovations” (Seattle Times) explores the various insanities of the modern world, “playfully bringing both familiar and wholly original scenarios to life” (Marie Claire). Designing with Nature - Ken Yeang 1995

This work considers how to make architecture compatible with the environment. It presents a framework in which the architect, building contractor and owner can understand how building construction affects the natural site and its resources. It also explains the real, pragmatic steps that can be taken to mitigate the all-too-common damage that man-made structures inflict on the natural environment, including low-energy design, bioclimatic design, recycling and disposal of building materials and waste and ecological landuse planning. The text contains case studies of low-environmental impact building designs from around the world and demonstrates the new emphasis on using building materials with long life-span and low maintenance costs.

Chemokine Receptors and NeuroAIDS - Olimpia Meucci 2009-12-02

Chemokine Receptors and NeuroAIDS: Beyond

the Co-receptor Function and Links to Other Neuropathologies focuses on unresolved or emerging issues concerning the role of chemokine receptors in neuronal injury and HIV neuropathology, including their ability to regulate fundamental neuronal and glial functions and their role in neurovirulence and neurotoxicity. Although the importance of these molecules in the CNS physiology and pathology is now apparent, these issues are still matter of debate, and further research is required to design effective pharmacological agents that specifically target the brain chemokine system without major side effects. To this end, specific topics have been selected and are reviewed by international experts within the basic science/medical community. This book encourages investigation in the most controversial areas and fosters interaction between clinicians and basic scientists. The book also increases awareness about differences in disease progression among different parts of the

world as well as selected patient populations, which may also help identifying novel therapeutic strategies.

Managing Trade-offs in Adaptable Software Architectures - Ivan Mistrik 2016-08-12
Managing Trade-Offs in Adaptable Software Architectures explores the latest research on adapting large complex systems to changing requirements. To be able to adapt a system, engineers must evaluate different quality attributes, including trade-offs to balance functional and quality requirements to maintain a well-functioning system throughout the lifetime of the system. This comprehensive resource brings together research focusing on how to manage trade-offs and architect adaptive

systems in different business contexts. It presents state-of-the-art techniques, methodologies, tools, best practices, and guidelines for developing adaptive systems, and offers guidance for future software engineering research and practice. Each contributed chapter considers the practical application of the topic through case studies, experiments, empirical validation, or systematic comparisons with other approaches already in practice. Topics of interest include, but are not limited to, how to architect a system for adaptability, software architecture for self-adaptive systems, understanding and balancing the trade-offs involved, architectural patterns for self-adaptive systems, how quality attributes are exhibited by the architecture of the system, how to connect the quality of a software architecture to system architecture or other system considerations, and more. Explains software architectural processes and metrics supporting highly adaptive and complex engineering Covers validation,

verification, security, and quality assurance in system design Discusses domain-specific software engineering issues for cloud-based, mobile, context-sensitive, cyber-physical, ultra-large-scale/internet-scale systems, mash-up, and autonomic systems Includes practical case studies of complex, adaptive, and context-critical systems

Dionysius the Areopagite on the Divine Names and the Mystical Theology - Clarence E. Rolt
2007-10-01

First published in 1920, this book is a translation-the only known work of British scholar CLARENCE EDWIN ROLT (1880-1917)- of *On the Divine Names and The Mystical Theology*, by Dionysius the Areopagite, a first-

century bishop of Athens. The author is often also referred to as "pseudo-Dionysius" because a variety of anachronisms suggest that the manuscript was actually written much later by an unknown writer. Despite the book's unclear origins, the writings are still greatly valued for their theological insight. Saint Thomas Aquinas often quoted from pseudo-Dionysius, as did many other famous and influential theologians and philosophers. Pseudo-Dionysius deals, here, with the Supra-Personality of God. Personality, by definition, is a quality limited to an individual. God, on the other hand, is the opposite of an individual. God is in all things, so one cannot speak of a personality for the divine. Rather, pseudo-Dionysius proposes a Supra-Personality, which describes aspects and qualities of the universal being. Religious scholars and Christians wanting a different understanding of the relationship between God and the universe will find this a challenging but ultimately thought-provoking study.

Talk of the Devil - Riccardo Orizio 2004-03-01

Inspired by newspaper clippings he had kept about two former African dictators accused of cannibalism, journalist Riccardo Orizio set out to track down tyrants around the world who had fallen from power—to see if they had gained any perspective on their actions, or if their lives and thoughts could shed any light on our own. The seven encounters chronicled in *Talk of the Devil* reveal Orizio's gift as an observer and his skill at getting people to reveal themselves. They are also, each of them, memorable stories in their

own right. Thanks to his conversion to Islam, the unrepentant Idi Amin lives in exile in Saudi Arabia and laughs off his murderous past while still attempting to meddle in Uganda. Jean-Bedel Bokassa, the bloody former emperor of Central Africa, boasts astonishingly that Pope Paul VI had nominated him as the thirteenth apostle of the Catholic Church. Nexhmije Hoxha defends her husband's brutal Stalinist regime from her Albanian prison cell and proudly explains how it worked. Paris-based Jean-Claude "Baby Doc" Duvalier—in his first interview since fleeing Haiti in 1986—speaks about voodoo and the women of his life, and laments the loss of his fortune. Colonel Mengistu Haile-Mariam of Ethiopia, Mira Markovic (Slobodan Milosevic's wife), and General Wojciech Jaruzelski, the former Polish head of state, all claim, in one way or another, that history will do them justice. By turns chilling and comical, rational and absurd, *Talk of the Devil* brings back into focus forgotten history and people we have viewed as evil

incarnate. Stripped of their power and titles, they are oddly human, and in Orizio's hands, their stories, and his own, are compulsively readable.
