Semantics in Adaptive and Personalised Systems

- Pasquale Lops 2019-09-18 This monograph gives a complete overview of the techniques and the methods for semantics-aware content representation and shows how to apply such techniques in various use cases, such as recommender systems, user profiling and social media analysis. Throughout the book, the authors provide an extensive analysis of the

techniques currently proposed in the literature and cover all the available tools and libraries to implement and exploit such methodologies in real-world scenarios. The book first introduces the problem of information overload and the reasons why content-based information needs to be taken into account. Next, the basics of Natural Language Processing are provided, by describing operations such as tokenization, stopword removal, lemmatization, stemming, part-of-speech tagging, along with the main problems and issues. Finally, the book describes the different approaches for semantics-aware content representation: such approaches are split into 'exogenous' and 'endogenous' ones, depending on whether external knowledge sources as DBpedia or geometrical models and distributional semantics are used, respectively. To conclude, several successful use cases and an extensive list of available tools and resources to implement the approaches are shown. Semantics in Adaptive and Personalised Systems definitely

fills the gap between the extensive literature on content-based recommender systems, natural language processing, and the different types of semantics-aware representations.

Green IT Engineering: Social, Business and Industrial Applications - Vyacheslav Kharchenko 2018-09-29
This book describes the implementation of green IT in various human and industrial domains. Consisting of four sections: "Development and Optimization of Green IT", "Modelling and Experiments with Green IT Systems", "Industry and Transport Green IT Systems", "Social, Educational and Business Aspects of Green IT", it presents results in two areas – the green

components, networks, cloud and IoT systems and infrastructures; and the industry, business, social and education domains. It discusses hot topics such as programmable embedded and mobile systems, sustainable software and data centers, Internet servicing and cyber social computing, assurance cases and lightweight cryptography in context of green IT. Intended for university students, lecturers and researchers who are interested in power saving and sustainable computing, the book also appeals to engineers and managers of companies that develop and implement energy efficient IT applications.

Theoderic and the Roman Imperial Restoration -
Jonathan J. Arnold 2014-02-24
Theoderic and the Roman Imperial Restoration
offers a new interpretation of the fall of Rome
and the "barbarian" successor state known as
Ostrogothic Italy. Relying primarily on Italian
textual and material evidence, Jonathan J. Arnold
demonstrates that the subjects of the
Ostrogothic kingdom viewed it as a revived
Roman Empire and its king, Theoderic, as its
emperor. Most accounts of Roman history end
with the fall of Rome in 476 or see the
Ostrogothic kingdom as a barbarous imitator.
This book, however, challenges such views,
placing the Theoderican epoch firmly within the
continuum of Roman history.

Applied Climatology - Allen Perry 2013-03-07
'Big freeze' conditions, storms, severe flooding,
droughts, and heatwaves - recent extremes in
weather, with their resultant physical, economic
and human losses, highlight the vulnerability of
society to changes in the atmosphere.
Atmospheric pollution, urbanization, natural
atmospheric disasters are causing dramatic
changes in climatic environments. Applied
Climatology examines the effects of climate on
physical, biological and cultural environments.
Specialist contributors from Europe, North

America and Australasia examine the impacts of changing climates on the functioning and development of physical biological environments including glaciers, water resources, landforms, soils, vegetation and animals. Weather and climate effects day-to-day activities and lifestyles from the clothes we wear to the buildings we design, and the food and energy we produce. This book focusses on the relationship between climate and a wide range of human activities and responses relating to health and comfort, building design, transport systems, agriculture and fisheries, tourism and social, industrial and legal issues. Climate-environment relationships and impacts on human activities are predicted to change dramatically if global warming accelerates at the rates currently proposed. Applied Climatology examines the characteristics and consequences of the changing global climate and considers the future for both natural and human environments.
Excellence in Business - Courtland L. Bovée 2006-01-01
KEY BENEFIT: With its real-life examples and cases, and its lively, conversational writing style, Bovee/Thill/Mescon brings concepts to life and prepares students for obtaining and pursuing satisfying business careers. KEY TOPICS: Bovee/Thill/Mescon weaves a four-part pedagogical tool through out each chapter. It starts with Orient, which outlines what is going to be covered in the chapter and then connects these topics with a "role-model" business professional. Next is Explore, which looks at the skills that their "role-model" used in order to be successful. Third is Confirm, which revisits what they have learned in the chapter. And, finally, Apply allows students to use the skills they have learned in the chapter. MARKET: For introductory level business students.

LinkedIn facilitates both, allowing you to broaden your reach without leaving your desk. Teach Yourself VISUALLY LinkedIn helps you get on board today.

Design act - Magnus Ericson 2011
How do contemporary design practices engage with political and societal issues? Can design realize ideas that lead to significant change? Where would the change happen: in the design studio, on the factory floor, in exhibition settings or on the street? Some of the design world's greatest practitioners, including architects,

came together for a multi-faceted, three-year project sponsored by Iaspis. This book, the project's culmination, comprises texts, interviews, drawings and other artwork in three sections: WHAT brings together contemporary and historical writings; HOW analyzes common issues and emerging tactics within socially and politically engaged design; and WHERE offers a broad perspective on new forms of design practice. Featuring facsimiles of 36 projects from the Design Act archive, this rich book is a must-have for designers who care about their role in the wider world.

Boethius' Consolation of Philosophy as a Product of Late Antiquity - Antonio Donato 2013-09-12 In the last fifty years the field of Late Antiquity has advanced significantly. Today we have a picture of this period that is more precise and accurate than before. However, the study of one of the most significant texts of this age, Boethius' Consolation of Philosophy, has not benefited enough from these advances in scholarship. Antonio Donato aims to fill this gap by investigating how the study of the Consolation can profit from the knowledge of Boethius' cultural, political and social background that is available today. The book focuses on three topics: Boethius' social/political background, his notion of philosophy and its sources, and his understanding of the relation between Christianity and classical culture. These topics deal with issues that are of crucial importance for the exegesis of the Consolation. The study of Boethius' social/political background allows us to gain a better understanding of the identity of the character Boethius and to recognize his role in the Consolation. Examination of the possible sources of Boethius' notion of philosophy and of their influence on the Consolation offers valuable instruments to evaluate the role of the text's philosophical discussions and their relation to its literary features. Finally, the long-standing problem of the lack of overt Christian elements

in the Consolation can be enlightened by considering how Boethius relies on a peculiar understanding of philosophy's goal and its relation to Christianity that was common among some of his predecessors and contemporaries.

Lcm and Hcf of Democracy - Kishan Khanna 2007

After my wife Theresa passed on I moved from New Jersey to Massachusetts We moved to be closer to my daughter Melissa and my two grandchildren Jalen and Justin I wanted to do something in my wife's memory So I decided to write a song I hadn't written anything since high school And that was about thirty-five years ago Well one song turned into about ninety poems I hope I can do justice to my wonderful wife's memory As I tried to express in words how I feel about her Without all the strength and love she gave me over the years This book would not have been possible I want to thank my daughter Melissa and my son Keith For keeping me afloat when I was drowning in tears I also want to thank my two sisters Debbie and Mary For their love and support through out this tragic ordeal I will forever have tears for the women I love with all my heart I love you Theresa with all my heart!

So how did this hairless mole-rat of a boy blossom into a viral internet sensation? He lives by the

mantra when life gives you wheelchair, make lemonade-- and shares his fumbles with unflinching honesty and characteristic charm.

Green IT Engineering: Components, Networks and Systems Implementation - Vyacheslav Kharchenko 2017-04-11

This book presents modern approaches to improving the energy efficiency, safety and environmental performance of industrial processes and products, based on the application of advanced trends in Green Information Technologies (IT) Engineering to components, networks and complex systems (software, programmable and hardware components, communications, Cloud and IoT-based systems, as well as IT infrastructures). The book's 16 chapters, prepared by authors from Greece, Malaysia, Russia, Slovakia, Ukraine and the United Kingdom, are grouped into four sections: (1) The Green Internet of Things, Cloud Computing and Data Mining, (2) Green Mobile and Embedded Control Systems, (3) Green Logic and FPGA Design, and (4) Green IT for Industry and Smart Grids. The book will motivate researchers and engineers from different IT domains to develop, implement and propagate green values in complex systems. Further, it will benefit all scientists and graduate students pursuing research in computer science with a focus on green IT engineering.

The Google Story - David A. Vise 2006 An inside look at the billion-dollar enterprise reveals how the Internet icon grew from a concept to a social phenomenon with a bold mission: to organize all of the world's information and make it easily accessible to people in more than one hundred languages. Dibs - Virginia Mae Axline 1964
Dibs in Search of Self is a book by clinical psychologist and author Virginia Axline published in 1964.[1] The book chronicles a series of play therapy sessions over a period of one year with an emotionally crippled boy (Dibs) who comes from a wealthy and highly educated family. Despite signs that he is gifted, his mother, father, and most of his teachers perceive him as having an emotional or cognitive disorder. Dibs presents abnormal social behavior by continuously isolating himself, rarely speaking, and physically lashing out at those around him. When Axline first meets Dibs's parents, they describe her as their son's last hope. The book details the interactions between Dibs and Axline and utilizes actual session transcripts for dialogue.

The Competitive Gundog - Nigel Dear 2011-07
Competing with your gundog is great fun, but many owners are unaware of the many year-round training and competitive opportunities in

which they can be involved. Many also think that the skills required are above them, and that such events are available only to the very experienced amateur or the gundog professional, but this is far from the truth. This guide is aimed at the beginner and the less experienced handler and provides detailed descriptions of all aspects of trials and tests. It covers field trials and working tests; spring and grouse pointing; the show gundog working certificate; retrievers, spaniels, pointers, and setters; and working with hunt, point, and retrieve (HPR) dogs.

Venantius Fortunatus - Judith George 1992
A major Latin poet writing in the latter half of the sixth century, Venantius Fortunatus was a key figure in adapting and developing the literary tradition, influencing not only his contemporaries but also succeeding generations of writers. During his time, Fortunatus wrote for some central political and ecclesiastical figures, his verse playing not only a personal role in events of national and international significance, but also providing a vivid glimpse into the lives and characters of his various patrons. The first major study of the poet, this book illuminates all aspects of Fortunatus's work and the society in which he lived.

Green IT Engineering: Concepts, Models, Complex Systems Architectures - Vyacheslav Kharchenko 2016-09-21
This volume provides a comprehensive state of the art overview of a series of advanced trends and concepts that have recently been proposed in the area of green information technologies engineering as well as of design and development methodologies for models and

complex systems architectures and their intelligent components. The contributions included in the volume have their roots in the authors' presentations, and vivid discussions that have followed the presentations, at a series of workshop and seminars held within the international TEMPUS-project GreenCo project in United Kingdom, Italy, Portugal, Sweden and the Ukraine, during 2013-2015 and at the 1st - 5th Workshops on Green and Safe Computing (GreenSCom) held in Russia, Slovakia and the Ukraine. The book presents a systematic exposition of research on principles, models, components and complex systems and a description of industry- and society-oriented aspects of the green IT engineering. A chapter-oriented structure has been adopted for this book following a "vertical view" of the green IT, from hardware (CPU and FPGA) and software components to complex industrial systems. The 15 chapters of the book are grouped into five sections: (1) Methodology and Principles of Green IT Engineering for Complex Systems, (2) Green Components and Programmable Systems, (3) Green Internet Computing, Cloud and Communication Systems, (4) Modeling and Assessment of Green Computer Systems and Infrastructures, and (5) Green PLC-Based Systems for Industry Applications. The chapters provide an easy to follow, comprehensive introduction to the topics that are addressed, including the most relevant references, so that anyone interested in them can start the study by being able to easily find an introduction to the topic through these references. At the same time, all of them correspond to different aspects of the work in progress being carried out by various research groups throughout the world and, therefore, provide information on the state of the art of some of these topics, challenges and perspectives.

MyBCommLab with Pearson Etext - For Business Communication Today - Courtland L. Bovée 2009-07-22
