**Alternative Schooling in
India** - Sarojini Vittachi
2007-12-04

This book brings into focus the innovative methods of learning in many Indian schools. It sheds light on schools that make the learning process fun for the teacher as well as the taught, in contrast to the whirl of examination-oriented learning in mainstream schools. The researched data on alternative schools in the country offer the reader an array of institutions all over the country, where efforts are being made to move away from traditional and mainstream learning. It includes exclusive articles by leading practitioners in the field, who offer an insight into the ground reality when a certain philosophy is applied to a

school, and also experiential accounts of how such alternative practices mould the learner, teacher and impact the parent as well. The book also consists of a directory of alternative schools in India, including many schools that are tucked away in remote corners of the country. Interestingly, the common thread binding these 'alternative schools' is concern for the welfare of the child by teachers who see their work as much more than a job.

Nehru - Adeel Hussain

2021-11-11

From being elected as Congress president in 1929 till his death in 1964, Jawaharlal Nehru remained a towering figure in Indian politics, a man who left an indelible stamp on the history of South Asia. As a leading light of the nationalist struggle and as India's first and longest-serving prime minister, his ideas shaped the political contours of the country and left an imprint so deep that his legacy continues to be debated furiously today. In life, as in afterlife, Nehru was many things to many people. Going beyond the imposed labels of contemporary discourse, this book illuminates four encounters that Nehru had with contemporaries from across the political spectrum - Muhammad Iqbal, Muhammad Ali Jinnah, Sardar Patel and Syama Prasad Mookerjee - that are critical to understanding

his ideas, and his long afterlife and impress on the present.

Nehru may no longer be alive to answer his critics today, but there was a time when he pitted himself vigorously against his opponents in the marketplace of ideas, debating the most profound questions in South Asian history and decisively influencing political events. It is this intellectually combative Nehru whom we meet in this book - voicing ideological disagreements, forging political alliances, moulding political opinion, offering visions of the future and staking out the political field - a key figure in the debates that defined India Hybrid Warfare - Vikrant Deshpande 2018

A cursory scan of recent conflicts reveals the blurring lines between war and peace, state versus non-state, regular and irregular, and conventional vis-à-vis unconventional. These small, niggling wars have been termed as hybrid, non-linear, grey zone, or unrestricted, among others. This book addresses the changing

character of conflicts in the strategic discourse in India.

Worldmaking - Tom Clark
2017-01-19

In 1978, Nelson Goodman explored the relation of "worlds" to language and literature, formulating the term, "worldmaking" to suggest that many other worlds can as plausibly exist as the "world" we know right now. We cannot catch or know "the world" as such: all we can catch are the world versions - descriptions, views or workings of the world - that are expressed in symbolic systems (words, music, dancing, visual representations). Over the twenty-five years since then,

creative works have played a crucial role in realigning, reshaping and renegotiating our understandings of how worlds can be made and preserved in the face of globalizing trends. The volume is divided into three sections, each engaging with worlds as malleable constructs. Central to all of the contributions is the question: how can we understand the relationships between natural, political, cultural, fictional, literary, linguistic and virtual worlds, and why does this matter?

Vedic Mathematics Or Sixteen Simple Mathematical Formulae from the Vedas for One-line Answers to All the Mathematical Problems) - Bhārati Kṛṣṇa Tīrtha 1981

Modi's India - Christophe Jaffrelot 2021-08-03

A riveting account of how a popularly elected leader has steered the world's largest democracy toward authoritarianism and

intolerance Over the past two decades, thanks to Narendra Modi, Hindu nationalism has been coupled with a form of national-populism that has ensured its success at the polls, first in Gujarat and then in India at large. Modi managed to seduce a substantial number of citizens by promising them development and polarizing the electorate along ethno-religious lines. Both facets of this national-populism found expression in a highly personalized political style as Modi related directly to the voters through all kinds of channels of communication in order to saturate the public space. Drawing on original interviews conducted across India, Christophe Jaffrelot shows how Modi's government has moved India toward a new form of democracy, an ethnic democracy that equates the majoritarian community with the nation and relegates Muslims and Christians to second-class citizens who are harassed by vigilante groups. He discusses how the promotion of Hindu

nationalism has resulted in attacks against secularists, intellectuals, universities, and NGOs. Jaffrelot explains how the political system of India has acquired authoritarian features for other reasons, too. Eager to govern not only in New Delhi, but also in the states, the government has centralized power at the expense of federalism and undermined institutions that were part of the checks and balances, including India's Supreme Court. Modi's India is a sobering account of how a once-vibrant democracy can go wrong when a government backed by popular consent suppresses dissent while growing increasingly intolerant of ethnic and religious minorities.

Neo Delhi and the Politics of Postcolonial Urbanism -

Rohan Kalyan 2017-04-07

This book is augmented by an interactive website called NEODELHI.NET. During research trips to Delhi and Gurgaon between 2008 and 2015 the author produced a multi-media urban archive that includes full color photos, an essay film, ethnographic videos, field notes and more pertaining to the arguments and ideas presented in this book. The reader is encouraged to actively engage the website along-side this text. This book challenges the prevailing metro-centric view of globalization. Cities are a crucial part of the infrastructure of globalization, yet in the so-called "developing" world, cities have largely been excluded as "structurally irrelevant" to the functioning of the global urban economy. Kalyan presents a trans-disciplinary exploration of the manifold possibilities

and challenges that confront a 'globalizing' megacity like New Delhi. Combining theoretical scholarship, ethnographic exploration, archival research and textual and visual analysis, the book foregrounds complex urban dynamics in and around the region and raises critical questions about changing urban life for postcolonial cities across the Global South.

Kalyan employs methodological approaches from political economy, urban studies and visual culture to render a vivid portrait of changing urban life in India's largest conurbation. The book will be of interest to students and scholars of urban studies, postcolonial studies, and inter-disciplinary studies.

This book is a portrait of Rajiv Gandhi by the person who knew him best: his wife Sonia. It is in four parts, the first and last being in the nature of meditations - one in words, the other in images. In the first, Sonia Gandhi reveals Rajiv through recollections and reflections, delicate and restrained in tone but powerful in resonance. In the last, Rajiv discloses the essence of himself in a gallery of his own photographs. The biographical narrative in between progresses through pictures and extended captions, interweaving Rajiv's personal history with the milieu in which it unfolded.
