## **Palliative Care in Pediatric Oncology** - Joanne Wolfe

2017-12-20

This textbook is the first to focus on comprehensive interdisciplinary care approaches aimed at enhancing the wellbeing of children with cancer and their families throughout the illness experience. Among the topics addressed are the epidemiology of pediatric cancer distress, including

physical, emotional, social, and spiritual dimensions; the role of the interdisciplinary team; communication and advance care planning; symptom prevention and management; care at the end of life; family bereavement care; and approaches to ease clinician distress. The contributing authors are true experts and provide guidance based on the highest available level of evidence in the field. The book

has not only an interdisciplinary but also an international perspective; it will appeal globally to all clinicians caring for children with cancer, including physicians, nurses, psychosocial clinicians, and chaplains, among others.

Textbook of Chronic Wound Care - Jayesh B. Shah

**Adult Nursing Practice** - Ian Bullock  
2012-05-24

Adult Nursing Practice: Using evidence in care enables today's students and newly qualified nurses develop the knowledge and skills they need to deliver, and lead care tomorrow. Reflecting the principles of evidence-based

care in line with the current NMC competencies, this textbook helps students learn to manage patients with common conditions and fundamental health needs so they can provide the best possible evidence-based care. Written, and edited by leading nurses from practice, education and research, it focuses on common diseases, fundamental health needs, and symptoms that nurses' encounter in daily practice.

Conditions are clearly explained so that the causes of ill health are easily understood. Every chapter covers pathophysiology, indicates the key priorities for nursing assessment, and discusses 'what the evidence says', before considering nursing management options.

Throughout the authors' clear signposts to trustworthy evidence mean that students can effortlessly select the best nursing interventions for their patients using the current available evidence-base. The ideal guide for students preparing for registration and

newly qualified staff going through preceptorship, it is packed with over 115 illustrations and lots of features to bring the subject to life and make learning easier: BLNursing assessment illustrations outline challenges caused by common diseases in a helpful and memorable way, highlighting issues that need assessment BLRed flag icons indicate the warning signs of deterioration and urgent questions are listed that can be used for assessment and monitoring BLCase studies of effective evidence-based interventions show the difference that high quality nursing care makes BLCross references between common conditions' causes and managing related health needs and symptoms develop understanding by clearly linking pathophysiology with nursing management options BLTheory into practice boxes further enhance learning through suggested activities, such as exploring key evidence, considering major practice issues or applying core

knowledge while out on placement BLOnline resource centre at [www.oxfordtextbooks.co.uk/orc/bullock/](http://www.oxfordtextbooks.co.uk/orc/bullock/). Filled with interactive and useful e-learning resources to help students test their learning, keep up-to-date with the latest evidence and further expand their knowledge, it features: BLClinical decision making scenarios BLQuiz questions BLUpdates to content BLHyperlinked references BLImages from the book BLLecturer resources [ACI 301-20 Specifications for Concrete Construction](#) - ACI Committee 301 2020-09

### **Surgical Metabolism** -

Kimberly A. Davis 2014-07-22

This volume is a comprehensive, state-of-the-art review for clinicians with an interest in the peri-operative nutritional management of all surgical patients. The text reviews normal physiology, the pathophysiology of starvation and surgical stressors, and focuses on appropriate nutritional repletion for various

common disease states. Specifically, the text addresses the severe metabolic demands created by systemic inflammation, infection, and major insults such as trauma and burns. In addition, the book addresses the growing problem of obesity in surgical populations, including appropriate strategies directed towards the metabolic management of these patients. The text is designed for clinicians across levels of training and provides clear and concise evidence based guidelines for the metabolic management and nutritional support of the surgical patient. Written by experts in the field, *Surgical Metabolism: The Metabolic Care of the Surgical Patient* is a valuable resource for all clinicians involved in the care of the critically ill.

**In Battle for Peace** - William Edward Burghardt Du Bois  
2014-02-20

W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black

political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, *In Battle for Peace* frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial-he was later acquitted-and faced political persecution for over a decade. Part autobiography and part political statement, *In Battle for Peace* remains today a

powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.

**Schwartz's Principles of Surgery, 10th edition** - F. Charles Brunicaudi 2014-06-05  
THE WORLD'S #1 SURGERY TEXT--UPDATED TO INCLUDE STATE-OF-THE-ART EVIDENCE-BASED SURGICAL CARE AND LEADERSHIP GUIDANCE FOR TRAINEES AND PRACTICING SURGEONS  
The Tenth Edition of Schwartz's Principles of Surgery maintains the book's unmatched coverage of the foundations of surgery while bringing into sharper focus new and emerging technologies. We have entered a new era of surgery in which minimally invasive surgery, robotic surgery, and the use of computers and genomic information have improved the outcomes and quality of life for patients. With these advances in mind, all chapters have been

updated with an emphasis on evidence-based, state-of-the-art surgical care. An exciting new chapter, "Fundamental Principles of Leadership Training in Surgery," expands the scope of the book beyond the operating room to encompass the actual development of surgeons. This edition is also enriched by an increased number of international chapter authors and a new chapter on Global Surgery. More than ever, Schwartz's Principles of Surgery is international in scope--a compendium of the knowledge and technique of the world's leading surgeons. Features More clinically relevant than ever, with emphasis on high-yield discussion of diagnosis and treatment of surgical disease, arranged by organ system and surgical specialty Content is supported by boxed key points, detailed anatomical figures, diagnostic and management algorithms, and key references Beautiful full-color design

*Deported to Death* - Jeremy Slack 2019-07-30

What happens to migrants after they are deported from the United States and dropped off at the Mexican border, often hundreds if not thousands of miles from their hometowns? In this eye-opening work, Jeremy Slack foregrounds the voices and experiences of Mexican deportees, who frequently become targets of extreme forms of violence, including migrant massacres, upon their return to Mexico. Navigating the complex world of the border, Slack investigates how the high-profile drug war has led to more than two hundred thousand deaths in Mexico, and how many deportees, stranded and vulnerable in unfamiliar cities, have become fodder for drug cartel struggles. Like no other book before it, *Deported to Death* reshapes debates on the long-term impact of border enforcement and illustrates the complex decisions migrants

must make about whether to attempt the return to an often dangerous life in Mexico or face increasingly harsh punishment in the United States.

**Progress in improving stroke care** - Great Britain: National Audit Office 2010-02-03

The National Stroke Strategy (2007) is a comprehensive response to the concerns raised by the NAO in its 2005 report on stroke (HC 452, session 2005-06, ISBN 9780102935707). The strategy has been underpinned by strong national leadership and performance indicators as well as £59 million of central funding over the first two years, £30 million of which was allocated to local authorities specifically to provide support services to stroke patients and their carers. The NHS is now starting to deliver better care from stroke services, and outcomes for patients are also improving. Patients treated in a specialist stroke unit are more likely to survive, have fewer complications and regain their

independence, but in 2008 only 17 per cent of stroke patients reached the stroke unit within four hours of arrival at hospital. Brain imaging is also very important for stroke patients but many patients are not given a scan quickly enough and access at weekends and evenings is significantly more limited. There is better awareness of the symptoms of stroke, and that it is a medical emergency, following the Department's 'Stroke: Act FAST' advertising campaign, launched in February 2009. The number of calls categorised as being a suspected stroke during April to June 2009 increased by 54 per cent in comparison with the same period in 2008. But a third of patients are not getting a follow-up appointment within six weeks and only a half of stroke survivors in the NAO's survey said that they were given advice on further stroke prevention when leaving hospital.

*Signs of Music* - Eero Tarasti  
2002-01-01

Music is said to be the most autonomous and least representative of all the arts. However, it reflects in many ways the realities around it and influences its social and cultural environments. Music is as much biology, gender, gesture - something intertextual, even transcendental. Musical signs can be studied throughout their history as well as musical semiotics with its own background. Composers from Chopin to Sibelius and authors from Nietzsche to Greimas and Barthes illustrate the avenues of this new discipline within semiotics and musicology.

Mastering Communication with  
Seriously Ill Patients - Anthony  
Back 2009-03-02

Physicians who care for  
patients with life-threatening  
illnesses face daunting  
communication challenges.  
Patients and family members  
can react to difficult news with  
sadness, distress, anger, or  
denial. This book defines the  
specific communication tasks  
involved in talking with  
patients with life-threatening  
illnesses and their families.  
Topics include delivering bad  
news, transition to palliative  
care, discussing goals of  
advance-care planning and do-  
not-resuscitate orders,  
existential and spiritual issues,  
family conferences, medical

futility, and other conflicts at  
the end of life. Drs Anthony  
Back, Robert Arnold, and  
James Tulsy bring together  
empirical research as well as  
their own experience to  
provide a roadmap through  
difficult conversations about  
life-threatening issues. The  
book offers both a theoretical  
framework and practical  
conversational tools that the  
practising physician and  
clinician can use to improve  
communication skills, increase  
satisfaction, and protect  
themselves from burnout.

Rehabilitative Surgery - Andrew I. Elkwood 2017-04-24  
This book represents the first interdisciplinary text on the emerging field of rehabilitative surgery, in which state of the art procedures from multiple surgical specialties are combined. It proposes a completely new framework for understanding, coordinating, and providing treatment for paralyzed or severely neurologically impaired patients and explains the

potentially critical impact of surgery in creating a new baseline of functional status, thereby improving the patient's daily life. Every major aspect of reconstructive surgical treatment is considered, including anesthesia, orthopedic surgery, plastic surgery, neurosurgery, general surgery, vascular surgery, and otolaryngology. The most up-to-date and evidence-based surgeries are clearly described and evaluated, with coverage of treatment of pressure sores, placement of feeding tubes, and upper extremity interventions to improve function and hygiene. Cutting-edge protocols are presented for the surgical treatment of severe nerve injuries, spinal cord injuries, and stroke or cerebrovascular accidents, and a first description and evaluation of phrenic nerve repair to assist weaning of paralyzed patients from ventilators is provided. Both surgical and nonsurgical readers will find this book to be an ideal guide and reference.

*Janey the Vet* - Janey Lowes  
2020-03-19

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and

excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.
