Sittig's Handbook of Toxic and Hazardous Chemicals

and Carcinogens - Richard P.

Pohanish 2008-01-10

For more than a quarter century, Sittig's Handbook of Toxic and Hazardous Chemicals and Carcinogens has proven to be among the most reliable, easy-to-use and

essential reference works on hazardous materials. Sittig's 5th Edition remains the lone comprehensive work providing

a vast array of critical information on the 2,100 most heavily used, transported, and regulated chemical substances of both occupational and environmental concern.

Information is the most vital resource anyone can have when dealing with potential hazardous substance accidents

or acts of terror. Sittig's provides extensive data for each of the 2,100 chemicals in a uniform format, enabling fast and accurate decisions in any situation. The chemicals are presented alphabetically and classified as a carcinogen, hazardous substance, hazardous waste, or toxic pollutant. This new edition contains extensively expanded information in all 28 fields for each chemical (see table of contents) and has been updated to keep pace with world events. Chemicals classified as WMD have been included in the new edition as has more information frequently queried by first responders and frontline industrial safety personnel. *Includes and references European chemical identifiers and regulations. *The only single source reference that provides such in-depth information for each chemical. *The two volume set is designed for fast and accurate decision making in any situation.

Birds of Nicaragua - Liliana Chavarría-Duriaux 2018-05-15

Birders in Central America have long known that Nicaragua is one of the best birding locations in the world, and with tourism to the country on the upswing, birders from the rest of the world are now coming to the same conclusion. The largest country in Central America, Nicaragua is home to 763 resident and passage birds, by latest count. Because of its unique topography—the country is relatively flat compared to its mountainous neighbors to the north and south—it forms a geographical barrier of sorts, which means that many birds that originate in North America reach their southernmost point in Nicaragua, while many birds from South America reach their northernmost point in the country. There are few places in the world where you can find both a Roadrunner and a Scarlet Macaw. Birds of Nicaragua features

descriptions and illustrations of all 763 species currently identified in the country, along with information about 44 additional species that are likely to appear in the coming years. Range maps, based on years of field research, are color-coded. Other features include a richly illustrated anatomical features section, a checklist, a visual guide to vultures and raptors in flight, and a quick-find index.

Lonely Planet's Guide to Life

- Lonely Planet 2020-11-17

This book collects together cultural pearls of wisdom from 86 countries to form the ultimate reference book for how to live well. Each culture lives by its own words of wisdom - handed down from generation to generation, covering everything from keeping a house tidy as a Shinto shrine to cooking a meal as simple and nutritious as a southern Italian's supper. Do you want to eat as well as the French, enjoy life as much as the Costa Ricans, live as thoughtfully as the Scandinavians and be as healthy as the Japanese? This 416-page book, packed full of expertly-sourced information and stunning photography, will tell you how. With countries as far and wide reaching as Colombia and New Zealand, you'll be sure to learn plenty of life lessons that you can put into action throughout.

Assessing Young Children in Inclusive Settings - Jennifer Grisham-Brown 2011

To ensure the best possible outcomes for young children with and without disabilities, early childhood educators must enter the classroom ready to conduct all types of early childhood assessment, including determining if children need additional service, planning and monitoring instruction, and determining program effectiveness. They'll get the preparation they need with this comprehensive textbook, an indepth blueprint for high-quality assessment in today's age of inclusion, standards-based education, and accountability. Developed by prominent early childhood special education experts Jennifer Grisham-Brown and Kristie Pretti-Frontczak, this book is a natural follow up to the bestselling, widely adopted *Blended Practices for Teaching Young Children in Inclusive Settings*. Future educators of young children will get the research and recommended practices they need to: conduct authentic assessment during children's natural routines and

play activities; use assessment to inform effective program planning; ensure that their practices are aligned with DEC and NAEYC recommendations; involve families as collaborative partners in the whole assessment process; select and use assessment instruments with documented evidence of technical adequacy; conduct eligibility assessments and identify children for special service under IDEA; assess children with diverse abilities; and engage in assessment to plan and revise quality instruction. An essential textbook for all preservice early childhood educators, this book is also a key resource for a wide range of in-service professionals, from principals and consultants to teacher study groups. Educators will learn how to confidently implement high-quality assessment and reap its benefits: inclusive, family-centered programming that improves outcomes for all children.

Empty Planet - Darrell Bricker
2019-02-05

From the authors of the bestselling *The Big Shift*, a provocative argument that the global population will soon begin to decline, dramatically reshaping the social, political, and economic landscape. For half a century, statisticians, pundits, and politicians have warned that a burgeoning planetary population will soon overwhelm the earth's resources. But a growing number of experts are sounding a different kind of alarm. Rather than growing exponentially, they argue, the global population is headed for a steep decline. Throughout

history, depopulation was the product of catastrophe: ice ages, plagues, the collapse of civilizations. This time, however, we're thinning ourselves deliberately, by choosing to have fewer babies than we need to replace ourselves. In much of the developed and developing world, that decline is already underway, as urbanization, women's empowerment, and waning religiosity lead to smaller and smaller families. In *Empty Planet*, Ibbitson and Bricker travel from South Florida to Sao Paulo, Seoul to Nairobi, Brussels to Delhi to Beijing, drawing on a wealth of research and firsthand reporting to illustrate the dramatic consequences of this population decline--and to show us why the rest of the developing world will soon join in. They find that a smaller global population will bring with it a number of benefits: fewer workers will command higher wages; good jobs will prompt innovation; the environment will improve; the risk of famine will wane; and

falling birthrates in the developing world will bring greater affluence and autonomy for women. But enormous disruption lies ahead, too. We can already see the effects in Europe and parts of Asia, as aging populations and worker shortages weaken the economy and impose crippling demands on healthcare and social security. The United States is well-positioned to successfully navigate these coming demographic shifts--that is, unless growing isolationism and anti-immigrant backlash lead us to close ourselves off just as openness becomes more critical to our survival than ever before. Rigorously researched and deeply compelling, Empty Planet offers a vision of a future that we can no longer prevent--but one that we can shape, if we choose.
