## **Race and Schooling in the South, 1880-1950** - Robert A. Margo 2007-12-01

The interrelation among race, schooling, and labor market opportunities of American blacks can help us make sense of the relatively poor economic status of blacks in contemporary society. The role of these factors in slavery and the economic consequences for blacks has received much attention, but the post-slave experience of blacks in the American economy has been less studied. To deepen our understanding of that experience, Robert A. Margo mines a wealth of newly available census data and school district records. By analyzing evidence concerning occupational discrimination, educational expenditures, taxation, and teachers' salaries, he clarifies the costs for blacks of post-slave segregation. "A concise, lucid account of the bases of racial inequality in the South between Reconstruction and the Civil Rights era. . . . Deserves the careful attention of anyone concerned with historical and contemporary race stratification."—Kathryn M. Neckerman, *Contemporary Sociology* "Margo has produced an excellent study, which can serve as a model for aspiring cliometricians. To describe it as 'required reading' would fail to indicate just how important, indeed indispensable, the book will be to scholars interested in racial economic differences, past or present."—Robert Higgs, *Journal of Economic Literature* "Margo shows that history is important in understanding present domestic problems; his study has significant implications for understanding post-1950s black economic development."—Joe M. Richardson, *Journal of American History*

**School Size Effects Revisited** - Hans Luyten 2014-06-26

This book provides a thorough review of the research literature on the effect of school size in primary and secondary education on three types of outcomes: student achievement, non-cognitive outcomes and costs per student. Based on 84 scientific publications and several prior reviews, the book discusses four main areas: the impact of school size on cognitive learning outcomes and non-cognitive outcomes; the "state of the art" of empirical research on economies of size; the direct and indirect impact of school size, conditioned by other school context variables on student performance and the specific position of the Netherlands in an international perspective. The book presents summaries of the results and main conclusions found and discusses these with respect to their relevance for educational policy in general and for the Netherlands in particular. The book concludes with suggestions for future research on school size.

**Recent Econometric Techniques for Macroeconomic and Financial Data** - Gilles Dufrénot 2020-11-21

The book provides a comprehensive overview of the latest econometric methods for studying the dynamics of macroeconomic and financial time series. It examines alternative methodological approaches and concepts, including quantile spectra and co-spectra, and explores topics such as non-linear and non-stationary behavior, stochastic volatility models, and the econometrics of commodity markets and globalization. Furthermore, it demonstrates the application of recent techniques in various fields: in the

frequency domain, in the analysis of persistent dynamics, in the estimation of state space models and new classes of volatility models. The book is divided into two parts: The first part applies econometrics to the field of macroeconomics, discussing trend/cycle decomposition, growth analysis, monetary policy and international trade. The second part applies econometrics to a wide range of topics in financial economics, including price dynamics in equity, commodity and foreign exchange markets and portfolio analysis. The book is essential reading for scholars, students, and practitioners in government and financial institutions interested in applying recent econometric time series methods to financial and economic data.

*Microeconometrics* - A. Colin Cameron 2005-05-09

This book provides the most comprehensive treatment to date of microeconometrics, the analysis of individual-level data on the economic behavior of individuals or firms using regression methods for cross section and panel data. The book is oriented to the practitioner. A basic understanding of the linear regression model with matrix algebra is assumed. The text can be used for a microeconometrics course, typically a second-year economics PhD course; for data-oriented applied microeconometrics field courses; and as a reference work for graduate students and applied researchers who wish to fill in gaps in their toolkit. Distinguishing features of the book include emphasis on nonlinear models and robust inference, simulation-based estimation, and problems of complex survey data. The book makes frequent use of numerical examples based on generated data to illustrate the key models and methods. More substantially, it systematically integrates into the text empirical illustrations based on seven large and exceptionally rich data sets.

**Research Themes for Tourism** - Peter Robinson 2011

Tourism studies at Masters level are often divided into subsets of tourism such as environmental tourism, rural tourism and sports tourism. This book provides an overview of types of tourism, and common themes studied in courses to allow undergraduate students to become familiar with a wide range of tourism topics at a foundation level, allowing them to make an informed decision about their future studies and career. It will also be a useful text for providing a broad brush introduction to the major topics that are covered in undergraduate courses. Popular subjects like urban tourism, festival.

[Microeconomics: An Intuitive Approach with Calculus](#) - Thomas Nechyba 2016-01-01

Examine microeconomic theory as a way of looking at the world as MICROECONOMICS: AN INTUITIVE APPROACH WITH CALCULUS, 2E builds on the basic economic foundation of individual behavior. Each chapter contains two sections. The A sections introduce concepts using intuition, conversational writing, everyday examples, and graphs with a focus on mathematical counterparts. The B sections then cover the same concepts with precise, accessible mathematical analyses that assume one semester of single-variable calculus. The book offers flexible topical coverage with four distinct paths: a non-game theory path through microeconomics, a path emphasizing game theory, a path emphasizing policy issues, or a path focused on business. Readers can use B sections to explore topics in greater depth. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Environmental and Natural Resource Economics** - Jonathan M. Harris 2016-05-05

Harris and Roach present a compact and accessible presentation of the core environmental and resource topics and more, with analytical rigor as well as engaging examples and policy discussions. They take a broad approach to theoretical analysis, using both standard economic and ecological analyses, and developing these both from theoretical and practical points of view. It assumes a background in basic economics, but offers brief review sections on important micro and macroeconomic concepts, as well as appendices with more advanced and technical material. Extensive instructor and student support materials, including PowerPoint slides, data updates, and student exercises are provided.

**A Primer on Modern Themes in Free Market Economics and Policy** - John M. Cobin 2009

Free market economics has made many advances during the past thirty years. These advances are due to the maturing of public choice theory and empirical studies, along with a resurgence of interest in Austrian economic themes like free banking, market process entrepreneurship, and the critique of socialism and interventionism. In addition, new avenues have opened in law and economics and regulatory studies which favor free market ideas. The purpose of this book is to introduce and summarize some of the important advances in contemporary free market economics and policy by introducing the key concepts of public choice, public policy, Austrian economics, and law and economics. This volume is a non-technical compendium of thought which incorporates long quotations from important scholars in each field, ideal for students wishing to survey these topics without having to read dozens of academic articles and books. Also presented is new theory regarding topics such as perverse incentives and allodial real property policy. The second edition is significantly expanded, including updated information and articles, new research in areas such as family policy, new tables, and is easier to read with improved organization.

[Finite Sample Econometrics](#) - Aman Ullah 2004-05-20

[The New Zealand Macroeconomy](#) - Stephen Hickson 2013-12-04

Most economics books used in New Zealand are US or Australian based and so lack much (or anything) in the way of information relating to New Zealand. For microeconomics this is not so important, but this is not the case for macroeconomics where there are often considerable differences between different economies. The New Zealand Macroeconomy: What we measure and what it means provides an up-to-date and concise solution, filling the 'macroeconomy gap' for students studying economics in the New Zealand context. Written to be read in conjunction with existing economics books The New Zealand Macroeconomy: What we measure and what it means discusses core topics from the New Zealand perspective in a conversational

tone that makes this book eminently readable and an invaluable resource for all introductory economics students in New Zealand. This short text will also be a valuable supplement for NCEA students.

Macroeconomics - Michael Parkin 2015-10-07

A practice-oriented learning system with a global perspective. Macroeconomics is structured around a system of checkpoints which teach students how to think like an economist. Explore the interactive brochure Eye On boxes throughout each chapter challenge students to apply theory to important issues and problems that shape our global society and individual decisions. The result is a patient, confidence-building program that prepares students to use economics in their everyday lives, regardless of what their future career will be. Pearson recommends including MyEconLab with your textbook purchase. Personalised practice quizzes, guided solutions, adaptive multimedia learning tools and homework can be integrated with an optional eBook version of Macroeconomics: Australia in the Global Economy.

**Handbook of Behavioral Industrial Organization** - Victor J. Tremblay 2018

The Handbook of Behavioral Industrial Organization integrates behavioral economics into industrial organization. Chapters cover concepts such as relative thinking, salience, shrouded attributes, cognitive dissonance, motivated reasoning, confirmation bias, overconfidence, status quo bias, social cooperation and identity. Additional chapters consider industry issues, such as sports and gambling industries, neuroeconomic studies of brands and advertising, and behavioral antitrust law. The Handbook features a wide array of methods (literature surveys, experimental and econometric research, and theoretical modelling), facilitating accessibility to a wide audience.

**Time Series Data Analysis Using EViews** - I. Gusti Ngurah Agung 2011-08-31

Do you want to recognize the most suitable models for analysis of statistical data sets? This book provides a hands-on practical guide to using the most suitable models for analysis of statistical data sets using EViews - an interactive Windows-based computer software program for sophisticated data analysis, regression, and forecasting - to define and test statistical hypotheses. Rich in examples and with an emphasis on how to develop acceptable statistical models, Time Series Data Analysis Using EViews is a perfect complement to theoretical books presenting statistical or econometric models for time series data. The procedures introduced are easily extendible to cross-section data sets. The author: Provides step-by-step directions on how to apply EViews software to time series data analysis Offers guidance on how to develop and evaluate alternative empirical models, permitting the most appropriate to be selected without the need for computational formulae Examines a variety of times series models, including continuous growth, discontinuous growth, seemingly causal, regression, ARCH, and GARCH as well as a general form of nonlinear time series and nonparametric models Gives over 250 illustrative examples and notes based on the author's own empirical findings, allowing the advantages and limitations of each model to be understood Describes the theory behind the models in comprehensive appendices Provides supplementary information and data sets An essential tool for advanced undergraduate and graduate students taking finance or econometrics courses. Statistics, life sciences, and social science students, as well as applied researchers, will also find this book an invaluable resource.

**Culture and Tourism in a Smart, Globalized, and Sustainable World** - Vicky Katsoni 2021-06-21

This book gathers the proceedings of the 7th International Conference, with the theme "Culture and Tourism in a Smart, Globalized and Sustainable World," held on Hydra Island, Greece, on June 17-19, 2020, published with the support of the International Association of Cultural and Digital Tourism. Highlighting the contributions made by numerous writers to the advancement of tourism research, this book presents a critical academic discourse on sustainable practices in the smart tourism context, improving readers' understanding of, and stimulating future debates in, this critical area. In addition to the knowledge economy and the concept of smart destinations, the book addresses new modes of tourism management and development, as well as emerging technologies, including location-based services, the Internet of things, smart cities, mobile services, gamification, digital collections and the virtual visitor, social media, social networking, and augmented reality.

*Public Administration and Law, Third Edition* - David H. Rosenbloom 2010-06-23

Since the first edition of Public Administration and Law was published in 1983, it has retained its unique status of being the only book in the field of public administration that analyzes how constitutional law regulates and informs the way administrators interact with each other and the public. Examining First, Fourth, Fifth, Eighth, and Fourteenth Amendment rights as they pertain to these encounters, it explains how public administrators must do their jobs and how administrative systems must operate in order to comply with constitutional law. Explores the conflicts between laws The book begins by presenting a historical account of the way constitutional and administrative law have incrementally "retrofitted" public agencies into the nation's constitutional design. It examines the federal judiciary's impact on federal administration and the effect of the nation's myriad environmental laws on public administration. Next, it focuses on the role of the individual as a client and customer of public agencies. In a discussion of the Fourth Amendment, it examines street-level encounters between citizens and law enforcement agents. Responding to the rise of the new public management (NPM), it also adds, for the first time in this edition, a chapter that analyzes the rights of the individual not only as a government employee but also as a government contractor. Enhanced with numerous references The final chapters of the book address issues concerning the rights of inmates in administrative institutions and balancing the need to protect individual rights with the ability of agencies to function effectively. Supplemented with case citations and lists of articles, books, and documents, this text is designed to facilitate further study in a constantly evolving area. About the Authors: David H. Rosenbloom, Ph.D. is Distinguished Professor of Public Administration in the School of Public Affairs at American University in Washington, D.C., and Chair Professor of Public Management at City University of Hong Kong. Rosemary O'Leary, Ph.D., J.D. is Distinguished Professor of Public Administration and the Howard G. and S. Louise Phanstiel Chair in Strategic Management and Leadership at Syracuse University. Joshua M. Chanin, M.P.A., J.D. is a Ph.D. candidate in Public Administration and Justice, Law, and Society in the School of Public Affairs at American University in Washington, D.C.

Understanding Econometrics - Dennis Halcoussis 2005

Covering all of the main topics, including panel data, that are expected in the first econometrics course, Understanding Econometrics uses a new, understandable approach that explains theory intuitively in English, not through a series of mathematical derivations. Recognizing that most students will not be doing economics graduate work, but that they may well need to understand econometrics and how to apply it, this new text focuses on the connection between theory and practice. The text uses a simplified notation system and examples that are integrated with the explanations of the material, fostering comprehension so that the instructor can focus more readily on theory and applications.

**Learning and Practicing Econometrics** - William E. Griffiths 1993-03-02

Designed to promote students' understanding of econometrics and to build a more operational knowledge of economics through a meaningful combination of words, symbols and ideas. Each chapter commences in the way economists begin new empirical projects--with a question and an economic model--then proceeds to

develop a statistical model, select an estimator and outline inference procedures. Contains a copious

amount of problems, experimental exercises and case studies.
