Economic Success of Chinese Merchants in Southeast Asia - Janet Tai Landa 2016-11-30

This book provides an original analysis of the economic success of Overseas Chinese merchants in Southeast Asia: The ethnically homogeneous group of Chinese middlemen is an informal, low-cost organization for the provision of club goods, e.g. contract enforcement, that are essential to merchants' success. The author's theory - and various extensions, with emphasis on kinship and other trust relationships - draws on economics and the other social sciences, and beyond to evolutionary biology. Empirical material from her fieldwork forms the basis for developing her unique, integrative and transdisciplinary theoretical framework, with important policy implications for understanding ethnic conflict in multiethnic societies where minority groups dominate merchant roles.

The Mushroom at the End of the World - Anna Lowenhaupt Tsing
2017-09-19

What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest

histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

How Asia Works - Joe Studwell 2013-07-02

“A good read for anyone who wants to understand what actually determines whether a developing economy will succeed” (Bill Gates, “Top 5 Books of the Year”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “should be named chief myth-buster for Asian business.” In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell’s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need “export discipline,” a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on

fascinating examples from a Philippine sugar baron’s stifling of reform to the explosive growth at a Korean steel mill. “Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic.” —The Economist

The Phoenix - Joseph Nigg 2016-11-04

An “insightful cultural history of the mythical, self-immolating bird” from Ancient Egypt to contemporary pop culture by the author of *The Book of Gryphons* (Library Journal). The phoenix, which rises again and again from its own ashes, has been a symbol of resilience and renewal for thousands of years. But how did this mythical bird come to play a part in cultures around the world and throughout human history? Here, mythologist Joseph Nigg presents a comprehensive biography of this legendary creature. Beginning in ancient Egypt, Nigg’s sweeping narrative discusses the many myths and representations of the phoenix, including legends of the Chinese, where it was considered a sacred creature that presided over China’s destiny; classical Greece and Rome, where it appears in the writings of Herodotus and Ovid; medieval Christianity, in which it came to embody the resurrection; and in Europe during the Renaissance, when it was a popular emblem of royals. Nigg examines the various phoenix traditions, the beliefs and tales associated with them, their symbolic and metaphoric use, and their appearance in religion, bestiaries, and even contemporary popular culture, in which the ageless bird of renewal is employed as a mascot and logo. “An exceptional work of scholarship.”—Publishers Weekly

Project Management - Jack R. Meredith 2017-10-30

Projects continue to grow larger, increasingly strategic, and more complex, with greater collaboration, instant feedback, specialization, and an ever-expanding list of stakeholders. Now more than ever, effective project management is critical for the success of any deliverable, and the demand for qualified Project Managers has leapt into nearly all sectors. The Healing Power of the Human Voice - James D'Angelo 2005-05-27

A complete introduction to using the sounds of the voice to promote healing • Explains the emotional meanings and healing attributes of human vocal expression, from vowels and consonants to natural sounds such as laughter or sighs • Includes easy-to-follow vocal and breathing

exercises • Contains chants and mantras from cultures around the world
As infants and children we use our vocalizations to express our needs and emotions. As we grow older these vocalizations become confined to language. The suppression of emotional sounds because they may be considered childish or undignified is quite commonplace in Western cultures. Yet when done with vigor, the sounds made by laughing, groaning, humming, keening, and sighing hold within them great power for healing. In *The Healing Power of the Human Voice* James D'Angelo introduces the concepts behind sound healing and provides simple, practical exercises for beginners. He explains in detail the meanings and healing attributes of the whole range of human vocal expression, from vowels and consonants to the natural sounds of laughter or sighs. He praises the power of singing and reveals the ways in which group singing can contribute to physical and mental health. He also presents authentic classical chants and mantras from cultures around the world and shows how we can combine various vocal sounds to form our own mantra to help clear chakra blockages. All of the sounds discussed, as well as the techniques for producing overtones, are placed in a ritualized context and are accompanied by simple movements to enhance tuning the body toward inner harmony, health, and peace.

The Hypothetical Mandarin : Sympathy, Modernity, and Chinese Pain - Eric Hayot Associate Professor of Comparative Literature and Director of the Program in Asian Studies Pennsylvania State University 2009-03-27
Why has the West for so long and in so many different ways expressed the idea that the Chinese have a special relationship to cruelty and to physical pain? What can the history of that idea and its expressions teach us about the politics of the West's contemporary relation to China? And what does it tell us about the philosophy of modernity? *The Hypothetical Mandarin* is, in some sense, a history of the Western imagination. It is also a history of the interactions between Enlightenment philosophy, of globalization, of human rights, and of the idea of the modern. Beginning with Bianchon and Rastignac's discussion of whether the former would, if he could, obtain a European fortune by killing a Chinese mandarin in Balzac's *Le Pere Goriot* (1835), the book traces a series of literary and

historical examples in which Chinese life and European sympathy seem to hang in one another's balance. Hayot's wide-ranging discussion draws on accounts of torture, on medical case studies, travelers tales, photographs, plasticized corpses, polemical broadsides, watercolors, and on oil paintings. His analyses show that the historical connection between sympathy and humanity, and indeed between sympathy and reality, has tended to refract with a remarkable frequency through the lens called "China," and why the story of the West's Chinese pain goes to the heart of the relation between language and the body and the social experience of the modern human being. Written in an ebullient prose, *The Hypothetical Mandarin* demonstrates how the network that intertwines China, sympathy, and modernity continues to shape the economic and human experience.

The Age of Globalization - Benedict Anderson 2013-11-05

History is forged through the travel of ideas across continents—as well as by bombs. *The Age of Globalization* is an account of the unlikely connections that made up late nineteenth-century politics and culture, and in particular between militant anarchists in Europe and the Americas, and anti-imperialist uprisings in Cuba, China and Japan. Told through the complex intellectual interactions of two great Filipino writers—the political novelist José Rizal and the pioneering folklorist Isabelo de los Reyes—*The Age of Globalization* is a brilliantly original work on how global exchanges shaped the nationalist movements of the time.

Commercial Law in Malaysia - Mei Pheng Lee 1997

Principles of the Law of Contract in Malaysia - Ahmad S. A. Alsagoff (Syed.) 2015

Dictionary Of Word Roots - Donald Borrer 1960-09-01

One of the outstanding problems of the biologist, whether he be beginning student or specialists, is that of understanding technical terms. The best way to understand and remember technical terms is to understand first their component parts, or roots. This dictionary has

been designed primarily to meet the needs of the beginning student, the medical student, and the taxonomist, but it should be of value to all biologists.

Terror Capitalism - Darren Byler 2021-12-10

In *Terror Capitalism* anthropologist Darren Byler theorizes the contemporary Chinese colonization of the Uyghur Muslim minority group in the northwest autonomous region of Xinjiang. He shows that the mass detention of over one million Uyghurs in “reeducation camps” is part of processes of resource extraction in Uyghur lands that have led to what he calls terror capitalism—a configuration of ethnoracialization, surveillance, and mass detention that in this case promotes settler colonialism. Drawing on ethnographic fieldwork in the regional capital Ürümchi, Byler shows how media infrastructures, the state’s enforcement of “Chinese” cultural values, and the influx of Han Chinese settlers contribute to Uyghur dispossession and their expulsion from the city. He particularly attends to the experiences of young Uyghur men—who are the primary target of state violence—and how they develop masculinities and homosocial friendships to protect themselves against gendered, ethnoracial, and economic violence. By tracing the political and economic stakes of Uyghur colonization, Byler demonstrates that state-directed capitalist dispossession is coconstructed with a colonial relation of domination.

Under Three Flags - Benedict Richard O'Gorman Anderson 2005

In this sparkling new work, Benedict Anderson provides a radical recasting of themes from *Imagined Communities*, his classic book on nationalism, through an exploration of fin-de-siecle politics and culture that spans the Caribbean, Imperial Europe and the South China Sea. A jewelled pomegranate packed with nitroglycerine is primed to blow away Manila's 19th-century colonial elite at the climax of *El Filibusterismo*, whose author, the great political novelist Jose Rizal, was executed in 1896 by the Spanish authorities in the Philippines at the age of 35. Anderson explores the impact of avant-garde European literature and politics on Rizal and his contemporary, the pioneering folklorist Isabelo de los Reyes, who was imprisoned in Manila after the violent uprisings of 1896 and later incarcerated, together with Catalan anarchists, in the prison fortress of Montjuich in Barcelona. On his return to the Philippines, by now under American occupation, Isabelo formed the first militant trade unions under the influence of Malatesta and Bakunin. Anderson considers the complex intellectual interactions of these young Filipinos with the new "science" of anthropology in Germany and Austro-Hungary, and with post-Communard experimentalists in Paris, against a background of militant anarchism in Spain, France, Italy and the Americas, Jose Marti's armed uprising in Cuba and anti-imperialist protests in China and Japan. In doing so, he depicts the dense intertwining of anarchist internationalism and radical anti-colonialism. *Under Three Flags* is a brilliantly original work on the explosive history of national independence and global politics.
