After losing someone she loved, artist Candy Chang painted the side of an abandoned house in her New Orleans neighborhood with chalkboard paint and stenciled the sentence, "Before I die I want to ____." Since then, more than four hundred Before I Die walls have been created by people all over the world. This beautiful hardcover book is an inspiring celebration of these walls and the stories behind them. Filled with hope, fear, humor, and heartbreak, Before I Die presents an intimate portrait of the dreams within our communities and a chance to ponder life's ultimate question.

Brasilia-Chandigarh - Iwan Baan 2010

In 1960, Brasilia was celebrated as the realization of an urban-planning vision based on designs by Lucio Costa and Oscar Niemeyer. At the same time, the city of Chandigarh, rationally laid out in sectors was taking shape according to plans by Le Corbusier. The 'test-tube' city arose as an export of modernity from a Western planning euphoria that reveals utopian traits. Living with Modernity examines how modernism has been expropriated in the two cities. Commonalities and differences are identified while images of everyday urban life are showcased in photographs by photographer Iwan Baan.

African Modernism - Manuel Herz 2022-10-10

A new edition of the most comprehensive survey of modern architecture in Africa to date. When the first edition of African Modernism was published in 2015, it was received with international praise and has been sought after constantly ever since it went out of print in 2018. Marking Park Books' 10th anniversary, this landmark book becomes available again in a new edition. In the 1950s and 1960s, most African countries gained independence from their respective colonial power. Architecture became one of the principal means by which the newly formed countries expressed their national identity. African Modernism investigates the close relationship between architecture and nation-building in Ghana, Senegal, Côte d'Ivoire, Kenya, and Zambia. It features one hundred buildings with brief descriptive texts, images, site plans, and selected floor plans and sections. The vast majority of images were newly taken by Iwan Baan and Alexia Webster for the book's first edition. Their photographs document the buildings in their present state. Each country is portrayed in an introductory text and a timeline of historic events. Further essays on postcolonial Africa and specific aspects and topics, also illustrated with images and documents, round out this outstanding volume.

The Pilot and the Little Prince - Peter Sís 2014-05-27

Peter Sís's remarkable biography The Pilot and the Little Prince celebrates the author of The Little Prince,

one of the most beloved books in the world. Antoine de Saint-Exupéry was born in France in 1900, when airplanes were just being invented. Antoine dreamed of flying and grew up to be a pilot—and that was when his adventures began. He found a job delivering mail by plane, which had never been done before. He and his fellow pilots traveled to faraway places and discovered new ways of getting from one place to the next. Antoine flew over mountains and deserts. He battled winds and storms. He tried to break aviation records, and sometimes he even crashed. From his plane, Antoine looked down on the earth and was inspired to write about his life and his pilot-hero friends in memoirs and in fiction. [Making Global Learning Universal](#) - Hilary Landorf 2018-09-30

Co-published with NAFSA. 

src="https://www.presswarehouse.com/sites/stylus/images/NAFSAlogo2.jpg" /a While there is wide consensus in higher education that global learning is essential for all students' success, there are few models of how to achieve this goal. The authors of this book, all of whom are from one of the nation's largest and most diverse research universities, provide such a model and, in doing so, offer readers a broad definition of global learning that both encompasses a wide variety of modes and experiences—in-person, online, and in co-curricular activities at home and abroad—and engages all students on campus. They provide a replicable set of strategies that embed global learning throughout the curriculum and facilitate high quality, high-impact global learning for all students. The approach this book describes is based upon three principles: that global learning is a process to be experienced, not a thing to be produced; that it requires all students' participation—particularly the underrepresented—and cannot succeed if reserved for a select few; and that global learning involves more than mastery of a particular body of knowledge. The authors conceptualize global learning as the process of diverse people collaboratively analyzing and addressing complex problems that transcend borders of all kinds. They demonstrate how institutions can enable all students to determine relationships among diverse perspectives on problems and develop equitable, sustainable solutions for the world's interconnected human and natural communities. What's more, they describe how a leadership process—collective impact—can enable all stakeholders across departments and disciplines to align and integrate universal global learning throughout the institution and achieve the aims of inclusive excellence. Providing examples of practice, this book:

- Offers a model to make global learning universal;
- Provides a definition of global learning that incorporates diversity, collaboration, and problem solving as essential components;
- Describes effective leadership for implementation consistent with the attributes of global learning;
- Illustrates integrative, high-impact global learning strategies within the access pipeline, students' coursework, and co-curricular activities;
- Offers practical strategies for global learning professional development, student learning assessment, and program evaluation;
- Promotes inclusive excellence through universal global learning.

This book is co-published with NAFSA.

Latissimus Dorsi Transfer - Gianezio Paribelli 2017-12-14

This book is exceptional in providing detailed state of the art guidance on all aspects of transfer of the latissimus dorsi tendon for indications including irreparable posterosuperior rotator cuff tears, irreparable subscapularis tears, and shoulder replacement. In addition to clear, well-illustrated descriptions of arthroscopically assisted surgical technique, readers will find helpful information on biomechanics, surgical indications, post-transfer rehabilitation, and complications and their management. Outcomes from individual studies and meta-analyses are evaluated, and a feature of special interest is the presentation of experiences and results in a series of more than 430 patients using the surgical technique first described by Enrico Gervasi more than 10 years ago. This technique involves modifications in both preparation of the footprint for the latissimus dorsi tendon and the biomechanical features of the tendon transfer and is very different from the procedure proposed by Christian Gerber. The book will be of high value for all orthopedic surgeons who perform this complex shoulder surgery, as well as for residents and fellows-in-training.

After the Revolution - Jessica Greenberg 2014-05-07

What happens to student activism once mass protests have disappeared from view, and youth no longer embody the political frustrations and hopes of a nation? After the Revolution chronicles the lives of student activists as they confront the possibilities and disappointments of democracy in the shadow of the recent revolution in Serbia. Greenberg's narrative highlights the stories of young student activists as they seek to define their role and articulate a new form of legitimate political activity, post-socialism. When student activists in Serbia helped topple dictator Slobodan Milosevic on October 5, 2000, they unexpectedly found that the post-revolutionary period brought even greater problems. How do you actually live and practice democracy in the wake of war and the shadow of a recent revolution? How do young Serbians attempt to translate the energy and excitement generated by wide scale mobilization into the slow work of building democratic institutions? Greenberg navigates through the ranks of student organizations as they transition their activism from the streets back into the halls of the university. In exploring the everyday practices of student activists—their triumphs and frustrations—After the Revolution argues that disappointment is not a failure of democracy but a fundamental feature of how people live and practice it. This fascinating book develops a critical vocabulary for the social life of disappointment with the aim of helping citizens, scholars, and policymakers worldwide escape the trap of framing new democracies as doomed to failure.

Hazardous Chemicals Associated with Plastics in the Marine Environment - Hideshige Takada 2018-10-13

This volume consists of 15 chapters and focuses on hazardous chemicals, how they are associated with plastics, and their environmental risks. It includes background information on plastics and additives chemistry, and their observed or potential effects on living organisms as well as the oceanographic aspects of marine debris dispersion. The respective chapters provide insights into the sorption/desorption of chemicals in and out of plastics, the mechanisms and kinetics, but also the scale of the concentrations of chemicals found in marine debris, particularly in microplastics. The occurrence of the various chemicals is analyzed, as well as the distribution profiles of the chemicals in microplastics throughout the world's oceans. The implications of the fact that plastics carry within them several chemicals are discussed in detail. In closing, new research topics that warrant further attention are identified. The book will appeal to all scientists who are already working or interested in starting to work on the topic of marine debris, as well as policymakers, NGOs and the broader informed public.

Josephine Baker - Jose-Luis Bocquet 2017-04-11

Paris, 1925. Over the course of a single evening, the Mississippi-born dancer Josephine Baker (1906-1975) becomes the darling of the Roaring Twenties. Some audience members in the Théâtre des Champs-Élysées are scandalized by the African American's performance in La Revue Nègre, but the city's discerning cultural figures--among them Picasso and Cocteau--are enchanted by her exotic, bold, and uninhibited style. When her adopted country grants her citizenship in 1939, Baker sees her fame as a means of helping the French Resistance. She takes advantage of her globe-trotting lifestyle to pass on messages and gather information. A decade later, installed in a palatial 15th century château, she adopts 12 children from different ethnic backgrounds. Josephine Baker paints a glorious portrait of a spirited, principled, and thoroughly modern woman.

Becoming Abigail - Chris Abani 2006-03-01

"Compelling and gorgeously written, this is a coming-of-age novella like no other. Chris Abani explores the depths of loss and exploitation with what can only be described as a knowing tenderness. An extraordinary, necessary book."—Cristina Garcia, author of Dreaming in Cuban "Abani's voice brings perspective to every moment, turning pain into a beautiful painterly meditation on loss and aloneness."—Aimee Bender, author of The Girl in the Flammable Skirt "Abani's empathy for Abigail's torn life is matched only by his honesty in portraying it. Nothing at all is held back. A harrowing piece of work."—Peter Orner, author of The Esther Stories Tough, spirited, and fiercely independent Abigail is brought as a teenager to London from Nigeria by relatives who attempt to force her into prostitution. She flees, struggling to find herself in the shadow of a strong but dead mother. In spare yet haunting and lyrical prose reminiscent of Marguerite Duras, Abani brings to life a young woman who lives with a strength and inner light that will enlighten and uplift the reader. Chris Abani is a poet and novelist and the author, most recently, of GraceLand, which won the 2005 PEN/Hemingway Prize, a Silver Medal in the California Book Awards, and was a finalist for several other prizes including the Los Angeles Times Book Prize. His other prizes include a PEN Freedom-to-Write Award, a Prince Claus Award, and a Lannan Literary Fellowship. He lives and teaches in California.

Optimists Die First - Susin Nielsen 2017-02-21

Award-winning author Susin Nielsen has written a laugh-out-loud and heartrending novel for fans of Robyn Schneider's Extraordinary Means and Cammie McGovern's Say What You Will. Beware: Life ahead. Sixteen-year-old Petula de Wilde is anything but wild. A former crafting fiend with a happy life, Petula shut herself off from the world after a family tragedy. She sees danger in all the ordinary things, like crossing the street, a bug bite, or a germ handshake. She knows: life is out to get you. The worst part of her week is her comically lame mandatory art therapy class with a small group of fellow misfits. Then a new boy, Jacob, appears at school and in her therapy group. He seems so normal and confident, though he has a prosthetic arm; and soon he teams up with Petula on a hilarious project, gradually inspiring her to let go of some of her fears. But as the two grow closer, a hidden truth behind why he's in the group threatens to derail them, unless Petula takes a huge risk. . .
