The Role of Islamic Spirituality in the Management and Leadership Process - Abdul Mutalib, Mahazan 2021-05-07

Leaders nowadays need to know, learn, and apply the concept of qalb leadership where it has been taught by the Prophet Muhammad as well as explained by Islamic scholars. The comparison with other mindful leadership concepts is required to provide solutions and options in leadership for better outcomes and spiritual awareness. It is found that leadership literature, in general, is unable to generate an understanding of a leadership concept that is both intellectually compelling and emotionally satisfying. As for qalb leadership, it focuses on the spirituality of leadership that can aid in facing unpredictable manners and provide better outcomes for followers. Research on Islamic leadership and spirituality may pave the way for better leadership practices in the future. The Role of Islamic Spirituality in the Management and Leadership Process will elaborate the spirituality and qalb in human life and leadership along with providing a discussion on the role and function of qalb in the overall leadership process. Through spirituality, human interdependence, creativity, and social justice can be created and molded. This type of leadership enables transformation in a natural way without denying basic human nature and imparts balance to both the outer and inner

needs of humans. With the discussion of four cardinal virtues of Al-Ghazali, leaders can solve many problems that emerge in their organizations. This book is ideal for managers, executives, theologians, professionals, researchers, academicians, and students who are interested in how Islamic spirituality plays a role in leadership.

**Leadership Development in the Middle East** - Beverley Metcalfe 2011-01-01

Leadership in the Middle East has never been as vital as it is in the wake of the global financial crisis and the Arab Spring Ð yet there is a lack of detailed knowledge concerning strategies for

developing capacity in leadership, national skills and knowledge management. This volume aims to address this deficit. This book is the first text on the subject of leadership development in the Middle East to be published in English (drawing on both English and Arabic scholarship) and will contribute to the knowledge and understanding of leadership theory and practice in the global economy. The volume provides in-depth analysis of the social, political and economic factors that shape leadership capacity building efforts and shows how leadership behaviours and practices differ from those in the West, reflecting an ethic of care, social responsibility and concern for developing both organization and individual capabilities as well as fostering community improvement and nation-building and advancing social justice and human well-being. The book reveals the complexity of leadership behaviours in the region and contextualizes analyses with broader contemporary debates including migration, governance, climate change and political leadership succession. The book also includes original insights into the role of women in leadership in business, politics and the community. This unique volume will benefit international organizational behaviour/development specialists, international human resource development practitioners and students at undergraduate and postgraduate levels. It will be invaluable to development specialists, HR consultants and practitioners on assignment in the Middle East and for policy and capacity development experts in NGOs and international organizations such as the ILO, UN and World Bank.

Complex, Intelligent, and Software Intensive Systems - Leonard Barolli 2019-06-20

This book presents scientific interactions between the three interwoven and challenging areas of research and development of future ICT-enabled applications: software, complex systems and intelligent systems. Software intensive systems heavily interact with other systems, sensors, actuators, and devices, as well as other software systems and users. More and more domains involve software intensive systems, e.g. automotive, telecommunication systems, embedded systems in general, industrial automation systems and business applications. Moreover, web services offer a new platform for enabling software intensive systems. Complex systems research focuses on understanding overall systems rather than their components. Such systems are characterized by the changing environments in which they act, and they evolve and adapt through internal and external dynamic interactions. The development of intelligent systems and agents features the use of ontologies, and their logical foundations provide a fruitful impulse for both software intensive systems and complex systems. Research in the field of intelligent systems, robotics, neuroscience, artificial intelligence, and cognitive sciences is a vital factor in the future development and innovation of software intensive and complex systems.

*Iran Auto* - Darius Mehri 2017-10-26

Since the revolution of 1979, scholars have portrayed the Islamic State's industrial development capacity in a negative light. Global isolation, incoherent economic planning, and predatory Islamic institutions are often cited as the reasons for lackluster development. In *Iran Auto: Building a Global Industry in an Islamic State*, Darius Mehri shows how this characterization is misguided. Today, Iran has one of the world's largest automobile industries with national technical capacity. Previous studies ignore the consequences of three decades of Iran's capacity for successful industrialization and changes in global technology transfer that allow countries, even ones isolated from formal global institutions, to build an automobile industry. Mehri shows how industrial nationalists in Iran constructed a

network of politically effective relationships to open up space for successful local industrial development, and then tapped into a set of important global linkages to create an industry with high local manufacturing content. This book will open up a new line of inquiry into how countries in the global south can develop a successful national automobile industry without the need to conform to global economic institutions.

Leadership in Islam - Nezar Faris 2017-11-26

This book examines the concept of leadership from within the Islamic worldview, exploring its meaning and various manifestations through textual evidence from the two primary sources of Islam, The Qur'an and hadith. Using this theoretical framework concurrent with contemporary leadership theory, the authors scrutinise the distinctive leadership dynamics of Islamic organisations within a minority-Muslim context and a focus on Australia. Drawing on empirical data gathered over four years, the nature of leadership and its processes within this unique context is examined. Leadership in Islam reconciles the problematic processes that exist within Muslim organisational context and offers a set of measures and strategies to improve leadership processes including enacting leadership, enacting following, accommodating complexity, sense making and embracing basics as the core processes. This book will be beneficial for anyone who seeks to understand the meaning of leadership in Islam, the way Islamic organisations operate, and the way forward for improving leadership processes within an Australian/Western context.

*Islamic Values and Management Practices* - Maqbouleh M Hammoudeh 2012-08-28

The author of this thought provoking addition to Gower's Transformation and Innovation Series has worked as a management consultant in the Arab Middle East for 25 years. In *Islamic Values and Management Practices* she acknowledges that businesses and other organizations in the region face urgent concerns in relation to quality and transformation, but argues that these issues might be more appropriately addressed by the application of an Islamic Management Model, rather than the 'Western' one hitherto applied. Over time, a set of management systems based on Islamic values has been developed by the author. These systems recognise the need to build human organizations, socially and politically as well as commercially, and also the recognition that for Muslims, justice is the ultimate value, bringing balance between the individual's soul and spirit on the one hand, and the organization's soul and spirit on the other. This Islamic management model stresses that effectiveness is an outcome of operating efficiently and at the same time unifying the organization's objectives with those of its employees and wider society, and ensuring that at the strategic level the long view is always maintained. Recounting her own personal and business journey, Maqbouleh Hammoudeh presents the outcomes of research that has tested the application of the Islamic Management Model and its ability to deliver the desired quality and transformation outcomes in a major civic or profit making organization. At a

time when many practitioners and business educators are seeking new management approaches, this revealing case study sheds light on the evolution of a contemporary theory of management for the Muslim World.

The Leader in Me - Stephen R. Covey 2012-12-11  
Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving

that it's never too early to teach someone how to live well.

**Digital Leadership** - Mario Franco 2020-04-01

Digital leadership has been seen as a phenomenon allowing competitive advantages for organizations, but some studies do not include the risks, benefits, and challenges of this type of leadership. Consequently, the objective of this book is to fill this gap by combining several studies from different perspectives. The various chapters presented here follow several approaches and applications that researchers explore in different contexts. This book intends therefore to add to the body of knowledge in leadership and digital areas. On the other hand,

this work shows how digital leadership can stimulate organizational development in various countries and regions worldwide.

The author hopes that this point of view will contribute towards the goal of developing a general theory of world development of human societies that presently does not exist. Though the focus of this study is on Islamic views of administrative development, other aspects of development - such as the political and socio-economic - are also discussed.
