*Cognition: Pearson New International Edition* - Daniel T. Willingham 2013-07-29

For undergraduate courses of beginning graduate courses in Introductory Cognitive Psychology. Using a unique question-and-answer format, this text comprehensively addresses many of the overarching questions that confront and motivate today's cognitive scientists. When Daniel Willingham first approached the prospect of creating his own cognitive psychology text, he did so with the knowledge that his years of teaching experience had brought him: while many texts were relatively adequate in coverage, his students never liked them. Usually underexposed to social sciences in pre-college courses, he found his students often struggled with understanding how and why cognitive psychologists approach the problems that they do. Here, by using a unique question-and-answer format, he is able to start with questions frequently asked by students, relate those to questions cognitive scientists ask in their own research, present clear answers, and frame those answers in an interesting, lively, and comprehensive coverage of the core material. Through this accessible narrative style, Willingham shows the logical connections between each section and, by means of several new pedagogical features, encourages students to apply what they have learned in their daily lives.

*Painted Love* - Hollis Clayson 2003-10-30

In this engrossing book, Hollis Clayson provides the first description and analysis of French artistic interest in women prostitutes, examining how the subject was treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their contemporaries. Clayson not only illuminates the imagery of prostitution—with its contradictory connotations of disgust and fascination—but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the commercialization and the ambiguity of modern life.

**Psychology and Your Life with P.O.W.E.R. Learning** - Robert Feldman 2017-01-04

Psychology Matters. No matter what brings students into the Introductory Psychology course and regardless of their initial motivation, Robert Feldman's *Psychology and Your Life with P.O.W.E.R. Learning 3e* draws students into the field by connecting psychology to their

professional and personal lives. Designed specifically for the accelerated Introductory Psychology course, *Psychology and Your Life with P.O.W.E.R. Learning* takes into account the diverse population of students who are enrolled in college today, addressing the needs of those who may work full- or part-time; who may be juggling their education, their families, and their jobs; who may be returning to school in search of an occupational change; or who are in a specific career-oriented program.

**Interpersonal Communication** - Kory Floyd 2011

Kory Floyd's approach to interpersonal communication stems from his research area where he studies the positive impact of communication on our health and well-being. *Interpersonal Communication 2e* shows students how effective interpersonal communication can make their lives better. With careful consideration given to the impact of computer-mediated communication, the program reflects the rapid changes of the modern world that today's students live and interact in, and helps them understand and build interpersonal skills and choices for their lives academically, personally, and professionally.

*Connect Core Concepts in Health* - Paul M. Insel 2009-02-06

Insel and Roth, *Core Concepts in Health* pioneered the concept of personal responsibility for health and individual behavior change back in 1976. Now in its 11th edition, it is still the market leader and is known for its scientific research base and its currency, comprehensiveness, and accuracy.

*Motivation* - Lambert Deckers 2015-07-17

This book provides a complete overview of motivation and emotion. Well-grounded in the history of the field, the fourth edition of *Motivation: Biological, Psychological, and Environmental* combines classic studies with current research. The text provides an overarching organizational scheme of how motivation (the inducement of action, feelings, and thought) leads to behavior from physiological, psychological, and environmental sources. The material draws on topics that are familiar to students while maintaining a conversational tone to sustain student interest.

**Experience Psychology** - Laura King 2013-07-26

Do you want your students to just take psychology or to experience psychology? *Experience Psychology* is a complete learning system that empowers students to personally, critically, and actively experience the impact of psychology in everyday life. *Experience Psychology* is about, well, experience—our own behaviors; our relationships at home and in our communities, in school and at work; and our interactions in different learning environments. Grounded in meaningful real-world contexts, *Experience Psychology's* contemporary examples, personalized author notes, and applied exercises speak directly to students, allowing them to engage with psychology and to learn verbally, visually, and experientially—by reading, seeing, and doing. With the *Experience Psychology* learning system, students do not just “take” psychology but actively experience it. *Experience a Personalized Approach* How many students think they know everything about introductory psychology but struggle on the first exam? *LearnSmart*, McGraw-Hill's adaptive learning system, pinpoints students' metacognitive abilities and limitations, identifying what they know—and more importantly, what they don't know. Using Bloom's Taxonomy and a highly sophisticated “smart” algorithm, *LearnSmart* creates a personalized, customized study plan that's unique to each individual student's demonstrated needs. With virtually no administrative overhead, instructors using *LearnSmart* are reporting an increase in student performance by a letter-grade or more. Throughout *Experience Psychology*, students find a wealth of personal pedagogical “asides” directly from Laura King to guide their understanding and stimulate their interest as they read. Some of these helpful notes highlight crucial terms and concepts; others prompt students to think critically about the complexities of the issues; other notes encourage students to apply what they have learned to their prior reading or to a new situation. These mini-conversations between author

and students help develop analytical skills for students to carry and apply well beyond their course. Experience an Emphasis on Critical Thinking Experience Psychology stimulates critical reflection and analysis. Challenge Your Thinking sidebar features involve students in debates relevant to findings from contemporary psychological research. Thought-provoking questions encourage examination of the evidence on both sides of a debate or issue. Also oriented toward critical thought are the text's Intersection selections. Showcasing studies in different areas of psychological research that are being conducted on the same topic, the Intersections shed light on the links between, and the reciprocal influences of, this exciting work, and they raise provocative questions for student reflection and class discussion. Experience an Emphasis on Active Engagement With the new Experience It! feature, students can use their mobile devices to practice and master key concepts wherever and whenever they choose. By snapping easily located QR codes, students gain access to videos, Concept Clips, and related news articles, for a highly portable, rich, and immersive experience that powerfully reinforces the chapter reading. Through Do It!, a series of brief, reoccurring sidebar activities linked to the text reading, students get an opportunity to test their assumptions and learn through hands-on exploration and discovery. Reinforcing that the science of psychology requires active participation, Do It! selections include, for example, an exercise on conducting an informal survey to observe and classify behaviors in a public setting, as well as an activity guiding students on how to research a "happiness gene." Such exercises provide students with a vibrant and involving experience that gets them thinking as psychologists do. Experience Psychology helps students to perform to their maximum potential in and out of the classroom, fully engaging them in the content and experiences that comprise the world's most popular undergraduate major.

**Interpersonal Communication** - Sarah Trenholm 2000

This text's learning model helps students improve interpersonal competence through conceptual understanding, modelling of realistic examples, practicing of skill-building exercises, self-assessment and translating learning into behaviour.

**Unknown MIR Title** - Ronald B. Adler 2020-03-02

In its fifth Canadian edition, *Interplay: The Process of Interpersonal Communication* offers an immersive approach to the study of communication that foregrounds usefulness, readability, and student engagement. With up-to-date scholarship, case studies, and real-world examples, *Interplay* emphasizes the shifting dimensions of interaction made possible by social media and changing communication norms. *Interplay* is attentive to the ways in which communication practices shape and are shaped by culture, gender, and context; with extensive pedagogy integrated into its chapters, the book encourages readers to apply its insights to their own lives and relationships both within and beyond the classroom.

Foundations of Sensation and Perception - George Mather 2016-08-12  
Do you wonder how movies - sequences of static frames - appear to move, or why 3-D films look different from traditional movies? Why does

ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of *Foundations of Sensation and Perception*. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems (smell, taste, touch and balance) before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). *Foundations of Sensation and Perception* will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

**Concerning Lafcadio Hearn** - George Milbry Gould 1908

Lafcadio Hearn (1850-1904) wrote vivid accounts about life in New Orleans, the West Indies, and Japan. This appreciative 1908 biography discusses his birth to an Irish father and Greek mother, his work and travels, and the impact of poor eyesight on this poet of myopia. "Gould writes, Of Lafcadio Hearn there has been, and will be, no excuse for any biography whatever. A properly edited volume of his letters, and development of his imaginative power and literary character are, and still remain, most desirable."

*Making Christian History* - Michael Hollerich 2021-06-22

Known as the "Father of Church History," Eusebius was bishop of Caesarea in Palestine and the leading Christian scholar of his day. His *Ecclesiastical History* is an irreplaceable chronicle of Christianity's early development, from its origin in Judaism, through two and a half centuries of illegality and occasional persecution, to a new era of tolerance and favor under the Emperor Constantine. In this book, Michael J. Hollerich recovers the reception of this text across time. As he shows, Eusebius adapted classical historical writing for a new "nation," the Christians, with a distinctive theo-political vision. Eusebius's text left its mark on Christian historical writing from late antiquity to the early modern period—across linguistic, cultural, political, and religious boundaries—until its encounter with modern historicism and postmodernism. *Making Christian History* demonstrates Eusebius's vast influence throughout history, not simply in shaping Christian culture but also when falling under scrutiny as that culture has been reevaluated, reformed, and resisted over the past 1,700 years.

**Learning & Behavior** - James E. Mazur 2016-11-10

This book reviews how people and animals learn and how their behaviors are changed as a result of learning. It describes the most important principles, theories, controversies, and experiments that pertain to learning and behavior that are applicable to diverse species and different learning situations. Both classic studies and recent trends and developments are explored, providing a comprehensive survey of the field. Although the behavioral approach is emphasized, many cognitive theories are covered as well, along with a chapter on comparative

cognition. Real-world examples and analogies make the concepts and theories more concrete and relevant to students. In addition, most chapters provide examples of how the principles covered have been applied in behavior modification and therapy. Thoroughly updated, each chapter features many new studies and references that reflect recent developments in the field. Learning objectives, bold-faced key terms, practice quizzes, a chapter summary, review questions, and a glossary are included. The volume is intended for undergraduate or graduate courses in psychology of learning, (human) learning, introduction to learning, learning processes, animal behavior, (principles of) learning and behavior, conditioning and learning, learning and motivation, experimental analysis of behavior, behaviorism, and behavior analysis. Highlights of the new edition include: -A new text design with more illustrations, photos, and tables. -In the Media, Spotlight on Research, and Applying the Research boxes that highlight recent applications of learning principles in psychology, education, sports, and the workplace. - Discussions of recent developments in the growing field of neuroscience. - Coverage of various theoretical perspectives to the study of learning—behavioral, cognitive, and physiological. - Expanded coverage of emerging topics such as the behavioral economics of addictions, disordered gambling, and impulsivity. -New examples, references, and research studies to ensure students are introduced to the latest developments in the field. - A website at [www.routledge.com/9781138689947](http://www.routledge.com/9781138689947) where instructors will find a test bank, Powerpoint slides, and Internet links. Students will find practice questions, definitions of key terms, chapter outlines, and Internet sources for additional information.

An Introduction to Moral Philosophy - Wolff, Jonathan 2020-09-01  
From respected philosopher and writer Jonathan Wolff, this brief introduction to ethics stimulates independent thought, emphasizes real-world examples, and provides clear and engaging introductions to key moral theories and the thinkers behind them. The new Second Edition offers expanded coverage of moral reasoning, as well as two thoughtful and contemporary new chapters on applying moral philosophy and the ethics of race. A companion primary source collection, *Readings in Moral Philosophy*, amplifies issues discussed in the text, connecting them to problems in applied ethics.

Cognition, Language and Aging - Heather Harris Wright 2016-03-16  
Age-related changes in cognitive and language functions have been extensively researched over the past half-century. The older adult represents a unique population for studying cognition and language because of the many challenges that are presented with investigating this population, including individual differences in education, life experiences, health issues, social identity, as well as gender. The purpose of this book is to provide an advanced text that considers these unique challenges and assembles in one source current information regarding (a) language in the aging population and (b) current theories accounting for age-related changes in language function. A thoughtful and comprehensive review of current research spanning different disciplines that study aging will achieve this purpose. Such disciplines include linguistics, psychology, sociolinguistics, neurosciences, cognitive sciences, and communication sciences. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

Memory - Bennett L. Schwartz 2013-07-02

The science and practice of memory come to life with Bennett Schwartz' *Memory*, Second Edition. Integrated coverage of cognitive psychology and neuroscience throughout the text connect theory and research to the areas in the brain where memory processes occur, while unique applications of memory concepts to such areas as education, investigations, and courtrooms engage students in an exploration of how memory works in everyday life. Four themes create a framework for the text: the active nature of learning and remembering; memory's status as a biological process; the multiple components of memory systems; and how memory principles can improve our individual ability to learn and remember. Substantive changes in each chapter and 156 new references bring this new edition completely up to date and offer students an array of high-interest examples for augmenting their own memory abilities and appreciation of memory science.

**Interpersonal Communication Book** - Joseph A. DeVito 2013-07-27  
Updated in its 13th edition, Joseph DeVito's *The Interpersonal Communication Book* provides a highly interactive presentation of the theory, research, and skills of interpersonal communication with integrated discussions of diversity, ethics, workplace issues, face-to-face and computer-mediated communication and a new focus on the concept of choice in communication. This thirteenth edition presents a comprehensive view of the theory and research in interpersonal communication and, at the same time, guides readers to improve a wide range of interpersonal skills. The text emphasizes how to choose among those skills and make effective communication choices in a variety of personal, social, and workplace relationships

*What is Life?* - Jay Phelan 2013

Issues in Media - CQ Researcher, 2014-12-31

What is the future of television? What is the impact of media violence on society? Is news quality better or worse online? Should we regulate internet and social media use, and if so, how? Will traditional print books disappear from the marketplace? These are just a sampling of the important, provocative questions in this new reader, sure to provide a solid foundation to spark lively classroom discussion. For current coverage of controversial and important issues centering on media, look to the balanced reporting, complete overviews and engaging writing that CQ Researcher has consistently provided for more than eighty years. This brief reader allows students to see the links between media, culture, business and politics, and an opportunity to view the issues from all sides while giving them a window into the relationships between media, culture, business, and politics. In addition, useful pedagogical features—pro/con debates, graphs, tables, photos, suggested readings, and bibliographies—advance critical thinking and help in study and review.

**Contemporary Human Geography** - Roderick P. Neumann 2018-12-26

With each chapter organized by five themes (region, mobility, globalization, nature-culture, cultural landscape), *Contemporary Human Geography* introduces students to geography concepts through fascinating topics such as the distribution of college sports, the relationship of beauty pageants and cultural identity, texting and language modification, and more, continually reinforcing geographers' contributions to our understanding of how we live in a globalized, modern world. The authors frame this coverage using specific learning objectives to help students focus on essential concepts and prepare for class discussions, assignments, and exams. *Contemporary Human Geography* comes with two of Macmillan's online course spaces, allowing instructors to choose how much media and assessment they'd like to make available for their students, and at what price point. SaplingPlus offers innovative media content, curated assessments, and brand new mapping activities powered by Esri. Achieve Read & Practice combines the accessibility of a VitalSource e-book with our self-paced, formative quizzing engine, LearningCurve.

**Ethics for Behavior Analysts** - Jon Bailey 2006-04-21

Behavior analysis, a rapidly growing profession, began with the use and application of conditioning and learning techniques to modify the behavior of children or adults presenting severe management problems, often because of developmental disabilities. Now behavior analysts work in a variety of settings, from clinics and schools to workplaces. Especially since their practice often involves aversive stimuli or punishment, they confront many special ethical challenges. Recently, the Behavior Analysis Certification Board codified a set of ten fundamental ethical guidelines to be followed by all behavior analysts and understood by all students and trainees seeking certification. This book shows readers how to follow the BACB guidelines in action. The authors first describe core ethical

principles and then explain each guideline in detail, in easily comprehensible, everyday language. The text is richly illuminated by more than a hundred vivid case scenarios about which the authors pose, and later answer questions for readers. Useful appendices include the BACB Guidelines, an index to them, practice scenarios, and suggested further reading. Practitioners, instructors, supervisors, students, and trainees alike will welcome this invaluable new aid to professional development.

**Research Methods in Psychology** - Beth Moring 2014-06-10

This market-leading text emphasizes future consumers of psychological research, uses real-world examples drawn from popular media, and develops students' critical-thinking skills as they become systematic interrogators of information in their everyday lives.

*Cognition* - Margaret W. Matlin 2003

This text's success has come in large part from its up-to-date coverage of important research and theories and offers the latest and most comprehensive overview of cognition on the market today. Recent developments in perception, imagery, problem solving, and creativity are highlighted along with advances in such areas as memory and language and expanded theoretical approaches.
