Vietnamese Communists' Relations with China and the Second Indochina Conflict, 1956-1962 - Cheng Guan Ang 1997-01-01

According to the final declaration of the 1954 Geneva Conference regarding Vietnam, general elections were to be held in July 1956 that would lead to the reunification of North and South Vietnam. The Geneva Agreement, however, was doomed from the start, as the South Vietnamese leaders did not suscribe to it and the leaders of the Communist North saw its value as primarily a propaganda tool. By 1956 it was obvious to all that reunification in accordance with the agreement was impossible, and the North Vietnamese looked to China for advice and assistance. Based on Vietnamese, Chinese, American and British sources--many only recently made available--this work examines Sino-Vietnamese relations in the early stages of the second Indochina conflict. The progression of the Vietnamese Communists' goals from primarily political to essentially military is traced. The book shows that the Hanoi government was remarkably in control of its own decision-making.

Servicing Personal Computers - Michael Tooley 2014-05-12

Servicing Personal Computers, Third Edition focuses on processes, techniques, and methodologies involved in servicing personal computers. The publication first elaborates on microcomputer systems and test equipment. Discussions focus on data communications test equipment, choosing test gear, microprocessors, random access memory, parallel input and output, memory mapped input and output, and raster scan displays. The manuscript then takes a look at fault diagnosis and tape and disk drives. Concerns include disk and cassette drives, initial check procedure, testing the CPU board, and fault finding on an RS-232 interface. The book examines printers and monitors, servicing the IBM PC and compatibles, and servicing 68000-based microcomputers. Topics include fault finding 68000-based micromputers, Apple Macintosh, 68000 based systems, 68030 and 68040, support devices, useful memory locations, 8086 and 8088

microprocessors, and user and supervisor modes. The publication is a vital source of data for computer engineers and researchers interested in servicing personal computers.

Advanced Internet Protocols, Services, and Applications - Eiji Oki 2012-04-24

Today, the internet and computer networking are essential parts of business, learning, and personal communications and entertainment. Virtually all messages or transactions sent over the internet are carried using internet infrastructure- based on advanced internet protocols. Advanced internet protocols ensure that both public and private networks operate with maximum performance, security, and flexibility. This book is intended to provide a comprehensive technical overview and survey of advanced internet protocols, first providing a solid introduction and going on to discuss internetworking technologies, architectures and protocols. The book also shows application of the concepts in next generation networks and discusses protection and restoration, as well as various tunnelling protocols and applications. The book ends with a thorough discussion of emerging topics.

Short Rotation Woody Crop Production Systems for Ecosystem Services and Phytotechnologies -

Ronald S. Zalesny Jr. 2019-12-20

While international efforts in the development of short rotation woody crops (SRWCs) have historically focused on the production of biomass for bioenergy, biofuels, and bioproducts, research and deployment over the past decade has expanded to include broader objectives of achieving multiple ecosystem services. In particular, silvicultural prescriptions developed for SRWCs have been refined to include woody crop production systems for environmental benefits such as carbon sequestration, water quality and quantity, and soil health. In addition, current systems have been expanded beyond traditional fiber production to

other environmental technologies that incorporate SRWCs as vital components for phytotechnologies, urban afforestation, ecological restoration, and mine reclamation. In this Special Issue of the journal *Forests*, we explore the broad range of current research dedicated to our topic: International Short Rotation Woody Crop Production Systems for Ecosystem Services and Phytotechnologies

Litigation Services Handbook, 2009 Cumulative Supplement - Roman L. Weil 2009-03-30

In the last 20 years, the need for a financial expert to act as a witness and consultant to litigating attorneys has grown even more than litigation itself. This handbook includes all aspects of litigation services, including current environments, the process itself, a wealth of cases, how to prove damages, and practical considerations of court appearances. It thoroughly covers the fine points of trial preparation and testimony presentation. Also, clear discussion is offered for understanding Sarbanes-Oxley rulings and fraud investigations. Accountants and attorneys working in litigation will benefit from this book.

Multimedia Communications, Services and Security - Andrzej Dziech 2011-05-30

This book constitutes the refereed proceedings of the 4th International Conference on Multimedia Communications, Services and Security, MCSS 2011, held in Krakow, Poland, in June 2011. The 42 revised full papers presented were carefully reviewed and selected from numerous submissions. Topics addresses are such as audio-visual systems, service oriented architectures, multimedia in networks, multimedia content, quality management, multimedia services, watermarking, network measurement and performance evaluation, reliability, availability, serviceability of multimedia services, searching, multimedia surveillance and compound security, semantics of multimedia data and metadata information systems, authentication of multimedia content, interactive multimedia applications, observation systems, cybercrime-threats and counteracting, law aspects, cryptography and data protection, quantum cryptography, object tracking, video processing through cloud computing, multi-core parallel processing of audio and video, intelligent searching of multimedia content, biometric applications, and transcoding of video.

Ecosystem-Based Management, Ecosystem Services and Aquatic Biodiversity - Timothy G. O'Higgins 2020
Aquatic ecosystems are rich in biodiversity and home to a diverse array of species and habitats, providing a wide variety of benefits to human beings. Many of these valuable ecosystems are at risk of being irreversibly damaged by human activities and pressures, including pollution, contamination, invasive species, overfishing and climate change. Such pressures threaten the sustainability of these ecosystems, their provision of ecosystem services and ultimately human well-being. Ecosystem-based management (EBM) is now widely considered the most promising paradigm for balancing sustainable development and biodiversity protection, and various international strategies and conventions have championed the EBM cause and the inclusion of ecosystem services in decision-making. This open access book introduces the essential concepts and principles required to implement ecosystem-based management, detailing tools and techniques, and describing the application of these concepts and tools to a broad range of aquatic ecosystems, from the shores of Lough Erne in Northern Ireland to the estuaries of the US Pacific Northwest and the tropical Mekong Delta.

Litigation Services Handbook - Roman L. Weil 2010-04-26

In the last twenty years, the need for a financial expert to act as a witness and consultant to litigating attorneys has grown even more than litigation itself.
