A History of the Chambers Dictionary - Mariusz Kaminski 2013-08-01

In the literature on English lexicography there have been few attempts at a systematic study of

the history of popular dictionaries that have been around for many years in English-speaking countries. A dictionary like Chambers deserves special attention because of its long tradition that goes back to the nineteenth century. Although it has gone through numerous editions, its history has received little attention from scholars. The book traces the development of the Chambers Dictionary from its origins to the present time by comparing corresponding parts of successive editions of the dictionary. This comparative approach aims to determine major trends in the evolution of the dictionary. It will provide scholars and interested students with insights into the Chambers lexicographers' work, the goals they aimed to achieve, and the problems they had to face when revising the dictionary.

Mining and Community in South Africa -

Philippe Burger 2017-09-22

Mining has played a key role in the growth of many towns in South Africa. This growth has been accompanied by a proliferation of informal settlements, by pressure to provide basic services and by institutional pressures in local government to support mining. Fragile municipal finance, changing social attributes, the pressures of shift-work on mineworkers, the impact on the physical environment and perceived new inequalities between mineworkers, contract workers and original inhabitants have further complicated matters. Mining growth has however also led to substantial local economic benefits to existing business and it has contributed to a mushrooming of new enterprises. While the relationship between mining and economic development at the country level has received adequate attention in existing literature, less is known about the consequences of mining at the local level. This book investigates the local impacts of mining in South Africa, focusing on employment, inequality, housing, business development, worker well-being, governance, municipal finance, planning and the environment. Taking an interdisciplinary approach, *Mining and Community in South Africa* will be of interest to scholars of South Africa, economic development, labour and industry, politics and planning.

An Actress Prepares - Rosemary Malague

2013-06-17

'Every day, thousands of women enter acting classes where most of them will receive some variation on the Stanislavsky-based training that has now been taught in the U.S. for nearly ninety years. Yet relatively little feminist consideration has been given to the experience of the student actress: What happens to women in Method actor training?' *An Actress Prepares* is the first book to interrogate Method acting from a specifically feminist perspective. Rose Malague addresses "the Method" not only with much-needed critical distance, but also the crucial insider's view of a trained actor. Case studies examine the preeminent American teachers who popularized and transformed elements of Stanislavsky's System within the U.S.—Strasberg, Adler, Meisner, and Hagen—by analyzing and comparing their related but distinctly different approaches. This book confronts the sexism that still exists in actor training and exposes the gender biases embedded within the Method itself. Its in-depth examination of these Stanislavskian techniques seeks to reclaim Method acting from its patriarchal practices and to empower women who act. 'I've been waiting for someone to write this book for years: a thorough-going analysis and reconsideration of American approaches to Stanislavsky from a feminist perspective ... lively, intelligent, and engaging.' - Phillip Zarrilli, University of Exeter 'Theatre people of any gender will be transformed by Rose Malague's eye-opening study *An Actress Prepares*... This book will be useful to all scholars and practitioners determined to make gender equity central to how they hone their craft and their thinking.' - Jill Dolan, Princeton University

Leap Year - Etienne van Heerden 2012-09-28

God would never have designed such a species.' So says Seamus Butler of his famous fall-goats, the genetic strain his father inadvertently bred on this Settler family's farm. They have an inborn fault: when startled, they keel over instantly in a dead faint. But it is precisely this which makes them worth their weight in gold, as a single fall-goat placed in a flock of sheep becomes the only prey when an enemy strikes, leaving the flock unharmed. These pathetic goats, with their mocking yellow eyes, have

given the Butlers wealth and influence in the Eastern Cape - important factors in a time of political upheaval - but even they are unprepared for the moment when oil is discovered right in the middle of Port Cecil, the local harbour town. The implications of this discovery bring the local black civic organisation's demand for a unified city council sharply into focus. At the forefront of these aspirations is MaNdllovu Thandani, larger than life and seemingly indestructible. In opposition: Seamus Butler himself - a man whose dark moods and recurring depressions surge relentlessly through him. And, while history dictates that these two separate worlds will inevitably converge, the families on both sides cannot remain unaffected, threatening to fall apart beneath the weight of their place in history. This is the backdrop to the story of the stud master of the farm known as Fata Morgana. It is a story which carves a path through the lives of the people of this Eastern Cape district, all of them inextricably involved, inescapably trapped in their heritage during a time when beauty and cruelty, violence and hope all become entangled.

Kleio - 1981

Ecumenical Jihad - Peter Kreeft 1996

Juxtaposing "ecumenism" and "jihad", two words that many would consider strange and at odds with each other, Peter Kreeft argues that we need to change our current categories and alignments. We need to realize that we are at war and that the sides have changed radically: many of our former enemies (e.g. Muslims) are now our friends, and some of our former friends (e.g. humanists) are now our enemies.

Documenting the spiritual and moral decay that has taken hold of modern society, Kreeft issues a wake-up call to all God-fearing Christians, Jews and Muslims to unite together in a "religious war" against the common enemy of godless secular humanism, materialism and immorality. Aware of the deep theological differences of these monotheistic faiths, Kreeft calls for a moratorium on our polemics against each other so that we can form an alliance to fight together to save western civilization. He cites numerous examples of today's Protestants, Jews, Catholics and Muslims working together to solve moral and spiritual problems. God is calling for this unity, Kreeft says, and if we respond, God will do something wonderful.

Body Bereft - Antjie Krog 2011-05-13

Antjie Krog's iconic status as one of South Africa's most popular and critically-acclaimed poets began when she was eighteen, with her first collection, *Dogter van Jefta* (1970). Almost four decades later, this very different collection will confirm her reputation with poems that blur and ravage the boundaries between the lyrical and confessional, the private and public. *Body Bereft* is a fearless and ecstatic exploration of consciousness on the edge of decay and dissolution. The taboos within the tidal moods of the menopause are described with anger and verbal intensity in a voice that is uniquely Krog's. Close relationships are searingly explored, occasionally seeking conflict, often searching for resolution. In the final meditative section, the personal intensity is tempered, fantastically almost, by contemplations of Table Mountain as a looming, symbolic and androgynous godhead, echoing Adamastor, an abiding presence that endures as it suffers witness - an ostensibly inscrutable, ironically nurturing mirror to self and personal despair. These dramatic, even reckless poems, translated

from the simultaneously published Afrikaans Collection, *Veweerskrif*, bring an altogether new and unique energy to South African English-language poetry.

The greatest escape - George Ivanoff 2010

The Origin of Humanness in the Biology of Love - Humberto Maturana Romesín 2012-02-21

The central concern of this book is us human beings. The authors' basic question is: 'How is it that we can live in mutual care, have ethical concerns, and at the same time deny all that through the rational justification of aggression?' The authors answer this basic question indirectly by providing a look into the fundamentals of our biological constitution, concentrating on what they term emotioning, that is the flow of emotions in daily life that guides the flow of the systemic conservation of a manner of living. Maturana and Verden-Zöller claim that the fundamental emotion that gave rise to humans as sapient languaging beings was love, and that this remains our fundament even when other emotions become socially prevalent.

Case Studies on Diversity and Social Justice Education - Paul C. Gorski 2013-11-07

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. Each case, written in an engaging, narrative style, presents a complex but common classroom scenario in which an inequity or injustice is in play. These cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and sustain equitable learning environments for all students. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and all content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersection of these issues are stressed throughout the cases, reflecting the multi-faceted way they play out in real life. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called points for consideration. This unique feature provides valuable insight for understanding the complexities of each case.

Ancestral Voices - Etienne van Heerden
2012-09-27

In the wild night hours, or during the heat of the day - whenever man's thoughts whirl feverishly - then truth and fantasy, the past and the future, life and death are indiscriminately mingled on Toorberg, home of the Moolman family. So the magistrate is to learn as he investigates the strange circumstances of the death of little Noah, child of grief, who was not entirely of this world. Every day the case becomes more complex, until it challenges the very foundations of the law. It seems as if the magistrate will have to judge an entire dynasty, both the living and the dead. Everyone's guilt has to be affirmed, or denied, and this means he will have to rip open the lives of all. The Moolmans are a tribe who have long since learned how to deal with their own. Parents cut children out of their lives, shunt them aside to live as stepchildren, scrag-ends of the clan, or as city-dwellers whose names are never uttered. The Moolmans cannot forgive; not when their tribal blood is betrayed.

Leonardo Pisano (Fibonacci) - L. E. Sigler
2014-06-28

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

The Development of Afrikaans - Fritz Ponelis
1993

The development of Afrikaans is investigated within its sociohistorical context from the

beginnings of the Afrikaans speech community in the 17th century to the present. Language contact in the loose and heterogeneous early Cape society gave rise to a divergent variety of Dutch later to be named Afrikaans. There was extensive borrowing as well as creolisation due to the strong presence of foreigners who had to acquire Dutch rapidly and under adverse social conditions. Changes in the linguistic core and functions of Afrikaans are set forth in a number of chapters.
