At the same time, a reader can use this volume to become oriented to the established questions and positions in end of life ethics, both because new questions are set in their context, and because most of the chapters—written by a team of experts—survey the field as well as add to it. Ethical Issues in Governing Biobanks - Nikola Biller-Andorno 2016-05-13

Population genomics research drawing on genetic databases has expanded rapidly, with some of this information being combined in 'biobanks'.

Managing this information in an appropriate way is a highly complex ethical issue in the health policy arena. This book combines theoretical and empirical research to analyze the areas of conflict and consensus in the regulatory and ethical frameworks that have been developed to govern biobanks. Ethicists from the Department of Ethics, Trade, Human Rights and Health Law (ETH) of the World Health Organization, the Institute of Biomedical Ethics of Geneva University and the Institute of Biomedical Ethics of the University of Zurich, with the support of the Geneva International Academic Network (GIAN), examine the

conditions under which genetic databases can be established, kept, and made use of in an ethically acceptable way. In addition to a comprehensive review of the scientific literature and a comparative analysis of existing normative frameworks, they present the results of in-depth interviews with experts around the world concerning the most unresolved and controversial issues. The results of that study, combined with their normative analysis, leads to recommendations for a better international framework.

Research Ethics in the Digital Age - Farina Madita Dobrick 2017-12-08

The book discusses the

multiple issues of a digital research ethic in its interdisciplinary diversity. Digitization and mediatization alter social behavior and cultural traditions, thereby generating new objects of study and new research questions for the social sciences and humanities. Furthermore, mediatization and digitization increase the data volume and accessibility of (quantitative) research and proliferate methodological opportunities for scientific analyses. Hence, they profoundly affect research practices in multiple ways. While consequences concerning the subjects, objects, and addressees of research in the social sciences and humanities have rarely been reflected upon, this reflection lies at the center of the book.

Ethical Issues in Experiential Education - Jasper S. Hunt 1994

Ethical Issues in Psychology - Philip Banyard 2013-03-01
How do we know right from

wrong, good from bad, help from hindrance, and how can we judge the behaviour of others? Ethics are the rules and guidelines that we use to make such judgements. Often there are no clear answers, which make this subject both interesting and potentially frustrating. In this book, the authors offer readers the opportunity to develop and express their own opinions in relation to ethics in psychology. There are many psychological studies that appear to have been harmful or cruel to the people or animals that took part in them. For example, memory researchers carried out studies on a man who had no memory for over forty years, but because he had no memory he was never able to agree to the studies. Is this a reasonable thing to do to someone? Comparative psychologist Harry Harlow found that he could create severe and lasting distress in monkeys by keeping them in social isolation. Is this a reasonable thing to do even if we find out useful things about

human distress? If you were able to use psychological techniques to break someone down so that they revealed information that was useful to your government, would you do it? If so, why? If not, why not? These ethical issues are not easy to resolve and the debates continue as we encounter new dilemmas. This book uses examples from psychological research to look at: key ethical issues ethical guidelines of psychologists socially sensitive research ethics in applied psychology the use of animals in research This book is essential reading for undergraduate and pre-undergraduate students of psychology and related subjects such as philosophy and social policy.

Updated to integrate the new 2014 ACA Code of Ethics, this edition also explores how technology (including social networking) relates to ethical issues, and discusses the ethical issues that may arise when counseling clients from different cultural backgrounds, clients with disabilities, older adults, and clients at risk of harming others and themselves. The text familiarizes readers with the field's key scholarly writings and, by examining emerging ethical issues, enables students to advance beyond their basic awareness and knowledge of the professional codes of ethics. The ETHICS IN ACTION program brings to life the ethical issues and dilemmas counselors often encounter and provides ample opportunity for discussion, self-exploration, and problem solving of the issues and dilemmas. The 22 video vignettes are based on a workshop for a group of counseling students, which included challenging questions and lively discussion, role-plays, and comments from the students and the group leaders. This educational program is divided into three segments: ethical decision-making, values and the helping relationship, and boundary issues and multiple relationships in counseling. 2013-08-15
Dynamic, rapid, and radical changes are transforming the

communication professions, provoking major implications for ethics. Traditional boundaries blur as media converge; relentless competitive pressures cause some forms of communication to atrophy and permit others to explode; and technological advances occur daily. In this volume, a new generation of scholars take a fresh look at the manner in which ethical issues manifest themselves in their areas of research and suggest new agendas for future research. This book addresses a wide range of questions from a variety of communication professions. Contributors tackle such issues as how to define a journalist in an era when anyone can disseminate information to a global audience; how to use "advergaming," crowdsourcing, and facial recognition technology in advertising responsibly; and how to respond ethically in situations of public crisis communication, among many others. This volume will be critical reading for scholars and professionals

in media, communication, and digital arts, as well as philosophy, government, public policy, business, and law.

The Search for Ethics in Leadership, Business, and

Beyond - Joanne B. Ciulla
2020-05-05

This book brings together a wide range of topics in leadership ethics and business ethics. It approaches these topics from the perspective of the humanities as well as the social sciences. About half of the book is on leadership and the other half on topics in business ethics. Besides these general areas of research, the book explores how to teach and

study ethics in both business ethics and leadership studies. Specifically, it examines issues ranging from the nature of ethical leadership, to studies of authenticity, virtue, and the public and private morality of leaders. In business ethics, the subjects covered span from moral imagination, to casuistry, meaningful work, and workplace ethics. The book includes a section on the importance of liberal arts for studying and teaching ethics in business and professional schools. It concludes with a reflection on the ethical challenges of leaders and followers in a world where some leaders have inverted moral values.

Ethical Issues in Preventive Medicine - S. Doxiadis
2012-12-06

The first suggestions and exchange of ideas for this Workshop began about two years ago when, at the invitation of Professor E Bennett, Director of Health and Safety of the Commission of the European Communities and Professor W W Holland of the

Panel of Social Medicine and Epidemiology of the EEC, I asked the Panel to sponsor a project for the study of Ethical Issues in Preventive Medicine. The Panel gave its approval and support and asked Dr L Karhausen, Dr R Blaney, and me to undertake the planning. Since then we have had several meetings in Brussels and have added Professor Heleen Terborgh-Dupuis and Mrs Susie Stewart to our small planning team. The Planning Committee invited many experts to collaborate with us on the project and, as can be seen from the list of participants, they represent many scientific disciplines and many countries. About a year ago we also asked for the help and sponsorship of the NATO Science Council which was generously given. The culmination of our efforts was the Workshop held in Athens in January 1985, the proceedings of which are contained in the present book. The members of the Planning Committee and the participants at the Workshop would like to express

thanks to Mr H Durand, Secretary General for NATO Scientific Affairs and Dr M di Lullo, Programme Director of NATO Scientific Affairs and to Professor Bennett and Professor Holland for all the moral and financial support they have given to this project.

Living Issues in Ethics -

Richard T. Nolan 2000-01-01

In 1959 at a fashionable New England college I introduced a course with what I believed to be an engaging title: "Problems in Christian Ethics." It quickly became very popular, probably because the students thought it might provide a last-gasp answer to the enormous problems raised by the changing world of the '50's and '60's. For both professor and students, the course provided a wonderful opportunity to work out one's point of view on ethical issues. But the major pedagogical stumbling block came in attempting to assign appropriate readings for the juicy subject matter. I either assigned the students a dozen different books to cover the course material, or I prohibited them from reading anything, insisting that the course's substantive content would come from the lectures. Now, after all these years, the problem has been solved.

Living Issues in Ethics, a new

book by Richard T. Nolan and Frank G. Kirkpatrick, fulfills admirably the need for a one-volume text discussing the basic problems in ethics and dealing with them in both a theoretical and a practical way. It is a solid book, totally contemporary and aware of the latest developments in Christian ethical thinking. In a lucid and engaging way, the authors present the following topics: "The Search for a Moral Philosophy," "Personal Identity and Fulfillment," "Health and Sexuality" and "Social Ethics." They engage the reader in subject matter ranging from "The Ingredients of a Moral Philosophy" to an insightful rendering of the history of that philosophy, as well as problems of femininity, varieties of love, marriage and the family, medical ethics, moral sexual conduct, obligations of the political order, the socialist alternative, the demand for expression versus the right to privacy, the dilemmas of dissent, sexual justice, energy and ecology, "life-boat" ethics, "just-war" theory, and many,

many others. Each chapter contains a review and a section on suggested readings. The book is so good that I plan to use it in next year's "Problems in Christian Ethics." William A. Johnson Professor at Brandeis University, Mass.

Ethical and Social Issues in the Information Age - Joseph M. Kizza 2013-03-09

An introduction to the social and policy issues which have arisen as a result of IT. Whilst it assumes a modest familiarity with computers, the book provides a guide to the issues suitable for undergraduates. In doing so, the author prompts students to consider questions such as: * How do morality and the law relate to each other? * What should be covered in a professional code of conduct for information technology professionals? * What are the ethical issues relating to

copying software? * Is electronic monitoring of employees wrong? * What are the moral codes of cyberspace? Throughout, the book shows how in many ways the technological development is outpacing the ability of our legal systems, and how different paradigms applied to ethical questions often proffer conflicting conclusions. As a result, students will find this a thought-provoking and valuable survey of the new and difficult ethical questions posed by the Internet, artificial intelligence, and virtual reality.

Ethical Issues in

Archaeology - Larry J.

Zimmerman 2003

Ethics in the field of archaeological research, particularly arising in response to the recent trend of contract archaeology, becomes increasingly more complicated as a result of changing human relations surrounding historical evidence. The past is in fact no "dead and buried", and ethical questions about this living record demand an ongoing discussion within the complex social and cultural domains that contend to interpret this record. Authored largely by members of the Society for American Archaeology Ethics Committee, this volume of original articles tackles issues such as the origin of archaeological ethics, responsibilities to the archaeological record (including discussion of documented and undocumented excavation) and responsibilities to diverse publics and between those in the field. This work should fuel a necessary debate among professionals and students of

archaeology alike.

Ethics in Business and Society - Gerhold K. Becker 2012-12-06

faces the urgent problem of determining what political and social conditions must be preserved in order to ensure a continuing thriving economy.

"2 And the ethicist, we may add, can draw on all of those problems and quite a few more characteristic of situations when traditional communities struggle with the impact of sudden and unprecedented wealth as well as with a technological transformation of their society of singular proportions. Hong Kong is truly a society in transition, a society whose time is running short and which therefore cannot afford to wait long before it has to make decisive choices, choices also in ethics. The time factor which is so infamous in various ethical dilemmas applies here to the society as a whole; it may also account for some of its not just morally significant shortcomings. II. Ethics in a Cross-cultural Perspective The authors of this volume are scholars and researchers based in Hong Kong who have been living and working in the territory for many years. They are not only representative of the increased research interest in ethical issues across the academic spectrum of Hong Kong

universities, but also of the inter disciplinary approach which has become the hallmark of work in applied ethics. As is well documented, ethics research, at long last, has left behind its disciplinary confines and, even more so, the philosophical ivory tower and begun to permeate the full scope of the academic and scientific agenda.

Ethical Issues in Counseling - Ronald H. Stein 1990

"Should I always tell the truth, even when my client will be hurt?" "How far should I go in protecting my client's rights?" "I work in an agency so sometimes I'm struggling to resolve ethical conflicts between the duty I owe to my client and the responsibilities I have toward my employer. What should I do?" "How do I handle the sticky issue of counseling minors? The client's needs come first, but what happens when those needs run contrary to the wishes of the parents?" These are just a few of the many questions that frequently confront those in the helping professions. Where can

professionals turn when they find themselves asking compelling questions about their relationships with clients? *Ethical Issues in Counseling* seeks to raise the consciousness of counselors regarding the ethical dimensions of their professional behavior. In addition, Dr. Stein provides helping professionals with an opportunity to explore their own ethical values within the context of problematic situations and, in doing so, become better prepared to serve their clients. A number of fundamental issues are discussed in detail: the rights of clients, the rights of counselors, codes of ethics, confidentiality, working with children, sexual relationships with clients, lying and deception, paternalism, and the ethical dimensions of consulting. No counselor can afford to be without this helpful overview of the ethical issues facing today's professional. *Ethics and Decision Making in Counseling and Psychotherapy, Fourth Edition* - Robert Rocco

Current Issues in Business
Ethics analyzes the questions
which underlie business
activities, arguing that the
prime object for a legitimate
business must be sustainability.
It also looks at the issues
between individuals and

business and asks whether
businesses can support their
employees as an alternative to
family and church. Finally it
assesses the impact of most
recent trends in business
looking at: * the activities of
multinational companies * the
changing gender balance *
privatization * the loss of
power of the trade unions.
