Nursing Staff in Hospitals and Nursing Homes - Committee on the Adequacy of Nursing Staff in Hospitals and Nursing Homes 1996-04-10
Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in *Nursing Staff in Hospitals and Nursing Homes*, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel--and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. *Nursing Staff in Hospitals and Nursing Homes* provides a straightforward examination of complex and sensitive issues

surround the role and value of nursing on our health care system.

Orientation to Home Care Nursing - Carolyn J. Humphrey 1996

Intended for both financial and nonfinancial managers, this text covers six primary areas the author deems necessary for managers to incorporate into their decision-making processes: financial reporting, prospective and retrospective payment systems, cost accounting, management accounting, financial management, and strategic management. The author, a business and finance consultant, stresses the importance of teamwork in working toward an outcome management system that honors clients and coworkers, promotes innovation, and balances clinical and financial organizational requirements. Community Health Nursing - Karen Saucier Lundy 2009

Historically, community health nursing has responded to the changing health care needs of the community and continues to meet those needs in a variety of diverse roles and settings. *Community Health Nursing: Caring for the Public's Health, Second Edition* reflects this response and is representative of what communities signify in the United States--a unified society made up of many different populations and unique health perspectives. This text provides an emphasis on population-based nursing directed toward health promotion and primary prevention in the community. It is both

community-based and community-focused, reflecting the current dynamics of the health care system. The Second Edition contains new chapters on disaster nursing and community collaborations during emergencies. The chapters covering Family health, ethics, mental health, and pediatric nursing have all been significantly revised and updated.

Health Care Benchmarking and Performance Evaluation - Yasar A. Ozcan 2014-07-01

This new edition continues to emphasize the use of data envelopment analysis (DEA) to create optimization-based benchmarks within hospitals, physician group practices, health maintenance organizations, nursing homes and other health care delivery organizations. Suitable for graduate students learning DEA applications in health care as well as for practicing administrators, it is divided into two sections covering methods and applications. Section I considers efficiency evaluations using DEA; returns to scale; weight restricted (multiplier) models; non-oriented or slack-based models, including in this edition two versions of non-controllable variable models and categorical variable models; longitudinal (panel) evaluations and the effectiveness dimension of performance evaluation. A new chapter then looks at new and advanced models of DEA, including super-efficiency, congestion DEA, network DEA, and dynamic network models. Mathematical formulations of various DEA models are placed in end-of-chapter appendices. Section II then looks at health care applications within particular settings, chapter-by-chapter, including hospitals, physician practices, nursing homes and health maintenance organizations (HMOs). Other chapters then explore home health care and home health agencies; dialysis centers, community mental health centers, community-based your services, organ procurement organizations, aging agencies and dental providers; DEA models to evaluate provider performance for specific treatments, including stroke, mechanical ventilation and perioperative services. A new chapter then examines international-country-based applications of DEA in health care in 16 different countries, along with OECD and multi-country studies. Most of the existing chapters in this section were expanded with recent applications.

Included with the book is online access to a learning version of DEA Solver software, written by Professor Kaoru Tone, which can solve up to 50 DMUs for various DEA models listed in the User's Guide at the end of the book.

Price Setting and Price Regulation in Health Care - OECD 2019-06-26

The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

Medicare Home Health Agencies - Kathryn G. Allen 2002-02
Home health agencies (HHA) play an important

role in the U.S. health care system -- allowing individuals who are unable to leave home without great difficulty to receive certain medical or therapeutic care in their own homes. In 2000, Medicare covered home health services for 2.5 million people at a cost of \$8.7 bill. This report assesses quality-related aspects of HHAs. Covers these questions: (1) what is known about the quality of care provided by HHAs, (2) is the current survey process adequate to identify quality-of-care problems at both parent & branch offices, (3) are state investigations of complaints made against HHAs effective in protecting patients, & (4) is Fed. oversight of state survey activities & enforcement efforts adequate? Use this guide every day to assess situations quickly, develop efficient plans of care, provide accurate intervention strategies, document patient care quickly & precisely, promote quality patient outcomes--in the shortest number of contacts , & so much more. This book is a vital addition to critical pathways, point-of-care computer systems, & OASIS data collection.

Nursing Informatics 2016 - W. Sermeus 2016-07-21

As the importance of electronic and digital devices in the provision of healthcare increases, so does the need for interdisciplinary collaboration to make the most of the new technical possibilities which have become available. This book presents the proceedings of the 13th International Conference on Nursing Informatics, held in Geneva, Switzerland, in June 2016. This biennial international conference provides one of the most important opportunities

for healthcare professionals from around the world to gather and exchange expertise in the research and practice of both basic and applied nursing informatics. The theme of this 13th conference is eHealth for All: Every Level Collaboration - From Project to Realization. The book includes all full papers, as well as workshops, panels and poster summaries from the conference. Subjects covered include a wide range of topics, from robotic assistance in managing medication to intelligent wardrobes, and from low-cost wearables for fatigue and back stress management to big data analytics for optimizing work processes, and the book will be of interest to all those working in the design and provision of healthcare today.

Handbook of Home Health Standards E-Book - Tina M. Marrelli 2008-10-13

Handbook of Home Health Standards: Quality, Documentation, and Reimbursement includes everything the home care nurse needs to provide quality care and effectively document care based on accepted professional standards. This handbook offers detailed standards and documentation guidelines including ICD-9-CM (diagnostic) codes, OASIS considerations, service skills (including the skills of the multidisciplinary health care team), factors justifying homebound status, interdisciplinary goals and outcomes, reimbursement, and resources for practice and education. The fifth edition of this "little red book" has been updated to include new information from the most recently revised Federal Register Final Rule and up-to-date coding. All information in this handbook has been thoroughly reviewed, revised, and updated. Offers easy-to-access and easy-to-read format that guides users step by step through important home care standards and documentation guidelines. Provides practical tips for effective documentation of diagnoses/clinical conditions commonly treated in the home, designed to positively influence reimbursement from third party payors. Lists ICD-9-CM diagnostic codes, needed for completing CMS billing forms, in each body system section, along with a complete alphabetical list of all codes included in the book in an appendix. Incorporates hospice care and documentation standards so providers can create effective hospice documentation. Emphasizes the

provision of quality care by providing guidelines based on the most current approved standards of care. Includes the most current NANDA-approved nursing diagnoses so that providers have the most accurate and up-to-date information at their fingertips. Identifies skilled services, including services appropriate for the multidisciplinary team to perform. Offers discharge planning solutions to address specific concerns so providers can easily identify the plan of discharge that most effectively meets the patient's needs. Lists the crucial parts of all standards that specific members of the multidisciplinary team (e.g., the nurse, social worker) must uphold to work effectively together to achieve optimum patient outcomes. Resources for care and practice direct providers to useful sources to improve patient care and/or enhance their professional practice. Each set of guidelines includes patient, family, and caregiver education so that health care providers can supply clients with necessary information for specific problems or concerns. Communication tips identify quantifiable data that assists in providing insurance case managers with information on which to make effective patient care decisions. Several useful sections make the handbook thorough and complete: Medicare guidelines; home care definitions, roles, and abbreviations; NANDA-approved nursing diagnoses; guidelines for home medical equipment and supplies. Small size for convenient carrying in bag or pocket! Provides the most up-to-date information about the newest and predominant reimbursement mechanisms in home care: the Prospective Payment System (PPS) and Pay For Performance (P4P). Updated terminology, definitions, and language to reflect the federal agency change from Health Care Financing Administration (HCFA) to Centers for Medicare & Medicaid Services (CMS) and other industry changes. Includes the most recent NANDA diagnoses and OASIS form and documentation explanations. New interdisciplinary roles have been added, such as respiratory therapist and nutritionist.,/LI>

Corporate Compliance in Home Health - Fay A.
Rozovsky 1998

Litigation is rampant in the home health field - and it's not just about billing and coding. It's also about other practices that could lead to compliance problems, such as substandard employment practices or failing to run background checks. A lawsuit against your agency could come completely out of left field. But you can avoid getting blind-sided and protect your agency. *Corporate Compliance in Home Health: Establishing a Plan, Managing the Risks* gives home health care providers practical, down-to-earth standards for controlling and preventing losses growing out of corporate compliance. With this new resource from Aspen, get an up-to-date and easy-to-understand review of the law of corporate compliance, find out how the new OIG (Office of the Inspector General of HCFA) model compliance guidance for hospitals impacts home health, and uncover where your agency is at risk. You'll find out what to do if and when your agency comes under investigation, and get important, timely federal reference material from the GAO to HHS, and key parts of the Federal Sentencing Guidelines.

Improving the Quality of Long-Term Care - Institute of Medicine 2001-02-27

Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. *Improving the Quality of Long-Term Care* takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the

current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.

Patient Safety and Quality - 2008

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need to know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- *Patient Safety and Quality: An Evidence-Based Handbook for Nurses*. (AHRQ Publication No. 08-0043)." --Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesfdbk>. Essentials of Community-based Nursing - Karen Saucier Lundy 2003

A unique text designed specifically for use throughout the associate degree nursing (ADN) curriculum, [this volume] provides students with a solid foundation for administering nursing care in the community. [It] provide[s] an overview of the health care system, an introduction to the epidemiology of health and illness, and an exploration of the factors that influence the health and care of individuals and families living in the community. -Back cover.

The Future of Home Health Care - Victoria D. Weisfeld 2015

Individuals with disabilities, chronic conditions, and functional impairments need a range of services and supports to keep living independently. However, there often is not a strong link between medical care provided in the home and the necessary social services and supports for independent living. Home health agencies and others are rising to the challenges of meeting the needs and demands of these populations to stay at home by exploring alternative models of care and payment approaches, the best use of their workforces, and technologies that can enhance independent living. All of these challenges and opportunities lead to the consideration of how home health care fits into the future health care system overall. On September 30 and October 1, 2014,

the Institute of Medicine and the National Research Council convened a public workshop on the future of home health care. The workshop brought together a spectrum of public and private stakeholders and thought leaders to improve understanding of the current role of Medicare home health care in supporting aging in place and in helping high-risk, chronically ill, and disabled Americans receive health care in their communities. Through presentations and discussion, participants explored the evolving role of Medicare home health care in caring for Americans in the future, including how to integrate Medicare home health care into new models for the delivery of care and the future health care marketplace. The workshop also considered the key policy reforms and investments in workforces, technologies, and research needed to leverage the value of home health care to support older Americans, and research priorities that can help clarify the value of home health care. This summary captures important points raised by the individual speakers and workshop participants.

Improving the Quality of Care in Nursing Homes - Institute of Medicine 1986-02-01

As more people live longer, the need for quality long-term care for the elderly will increase dramatically. This volume examines the current system of nursing home regulations, and proposes an overhaul to better provide for those confined to such facilities. It determines the need for regulations, and concludes that the present regulatory system is inadequate, stating

that what is needed is not more regulation, but better regulation. This long-anticipated study provides a wealth of useful background information, in-depth study, and discussion for nursing home administrators, students, and teachers in the health care field; professionals involved in caring for the elderly; and geriatric specialists.
