## **The Holiday Gig Book** - MARK JOHNSTONE 2010-10-07

This book offers guitarists a graded selection of 71 carols for the holiday season. Most of the arrangements are graded variations in that each tune starts with an easy reading beginner arrangement (excellent for students and the last minute reading gig) and ends with intermediate settings using techniques such as tremolo, jazz voicings, and three voice counterpoint. All of the music in this book is typeset in landscape format so that no page turns are required, and printed in standard notation only with suggested left-hand fingering. the book fits beautifully on any

folding music stand and (because of the low landscape format) leaves plenty of room for any standard clip-on light. the Holiday Gig Book is an excellent source of holiday tunes for the working guitarist.

**Back in Keith County** - John Janovy 1984-02-01  
John Janovy "has produced his best book. . . . He gives us a superb example of nature writing and of life in the Great Plains, perhaps surpassing such admired works in the genre as Aldo Leopold's A Sand County Almanac and William Warner's Beautiful Swimmers. Janovy takes us on a journey of intellectual serendipity, deriving extraordinary thoughts from ordinary circumstances".-Washington Post. "This 'human need for wilderness' is the trail winding through Back in Keith County . . . [to] the streams of John Janovy's 'inner cowboy country.' The fourteen essays are a very human mix of biology, sentiment, wandering observation and personal philosophy".-Smithsonian. Janovy's earlier Keith County Journal "met with astonishing success, and some reviewers compared the author to Henry David Thoreau. Back in Keith County returns to the part of Nebraska that Mr. Janovy knows and loves. . . . The book shows the area's wildlife-tiger beetles, toads, swallows, owls and a variety of fish-to be as special as its people. . . . The author also reflects on the intangible aspects of life. . . . The rich ramblings of these 179 pages are fascinating".-Kansas City Star. John Janovy Jr. is Varner Professor at the School of Biological Sciences, University of Nebraska-Lincoln, and director of the Cedar Point Biological Station. He is the author of Keith County Journal and On Becoming a Biologist, also available as a Bison Book.

**Concerted European Action on Magnets (CEAM)** - I.V. Mitchell 2012-12-06

The beneficial impact of the European communities involvement in scientific research and technology is wide-ranging and pervasive. There are high hopes of major advances in

scientific knowledge and technological processes, while the emergence of a genuine tradition of collaborative research holds out great and continuing promise for the future. Close, frequent and long-term cooperation between universities, research centres and industry is already generating new synergies, forging a truly European scientific community. Many of tomorrow's industrial developments, destined to be determinant for our economic success and prosperity, will spring from this research. The Concerted European Action on Magnets - CEAM - project is a prime example of collaborative research and development. Financed from the Communities STIMULATION action and implemented with the help of EURAM, the advanced materials programme, CEAM will bestow great benefits on European industrial competitiveness, providing a channel for high quality basic research to find its way into commercial products. This remarkable cooperative enterprise brought together 58 laboratories and more than 120 scientists and engineers in a sustained thirty month effort. It spanned every aspect of new iron-based high performance magnets from theoretical modelling of their intrinsic magnetic properties to the design and construction of novel electrical devices and machines. Besides adding a new European dimension to advanced magnetic technology, CEAM also ensured that a whole new generation of young researchers and technicians have been trained in applied magnetism.
