Understanding German Real Estate Markets - Tobias Just 2016-10-06

In this book, experts discuss how German real estate values have remained stable throughout the financial crisis, even though transaction volumes have been very volatile since 2005. Consequently, risk-averse national and international investors have started to invest in virtually all German real estate asset classes. This book tries to answer what has made the German real estate markets more resilient to shocks than many European real estate markets by analyzing the economic, regulatory and demographic environment. In 30 well-structured chapters, experts from both the academic and professional world analyze structural and current issues of German real estate markets. Readers will get a deep understanding of what makes the German real estate market special and where potential opportunities and threats in Europe's largest

real estate market exist.

Touching the World - Paul John Eakin 1992-04-15

Paul John Eakin's earlier work *Fictions in Autobiography* is a key text in autobiography studies. In it he proposed that the self that finds expression in autobiography is in fundamental ways a kind of fictive construct, a fiction articulated in a fiction. In this new book Eakin turns his attention to what he sees as the defining assumption of autobiography: that the story of the self does refer to a world of biographical and historical fact. Here he shows that people write autobiography not in some private realm of the autonomous self but rather in strenuous engagement with the pressures that life in culture entails. In so demonstrating, he offers fresh readings of autobiographies by Roland Barthes, Nathalie Sarraute, William Maxwell, Henry James, Ronald Fraser, Richard Rodriguez, Henry Adams, Patricia Hampl, John Updike, James McConkey, and Lillian Hellman. In the introduction Eakin makes a case for reopening the file on reference in autobiography, and in the first chapter he establishes the complexity of the referential aesthetic of the genre, the intricate interplay of fact and fiction in such texts. In subsequent chapters he explores some of the major contexts of reference in autobiography: the biographical, the social and cultural, the historical, and finally, underlying all the rest, the somatic and temporal dimensions of the lived experience of identity. In his discussion of contemporary theories of the self, Eakin draws especially on cultural anthropology and developmental psychology.

The Nirvana bassist "offers specific platforms for electoral reform . . . as well as charming anecdotes about rock 'n' roll as a pursuit of happiness" (Sarah Vowell, The New York Times Book Review). A memoir of both music and politics, *Of Grunge and Government* tells Krist Novoselic's story of how during his years with Kurt Cobain and Nirvana, the band made a point of playing benefits—the Rock for Choice show, a concert for gay rights, a fundraising gig for the Balkan Women's Aid Fund—and how in the ensuing years he has dedicated himself to being a good citizen and participating in American democracy. In this book he shares

stories about making music and making a statement—as well as inspiring ideas for anyone who wants to advance progressive causes, to become a more active part of the community, and to make sure our votes count and our voices are heard.

[The Psychic Life of Power](#) - Judith Butler 1997

Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

Business Ethics 3.0 - Erhard Meyer-Galow 2018-05-22

The reputation of business managers is declining due to their disregard for moral decisions and ethical practices. Business students are currently taught only technical knowledge without concern for being compassionately and holistic engaged. However, when entering the business sector these graduates encounter a world which necessitates difficult, personally challenging decisions, ones for which technical knowledge is insufficient. Successful, sustainable resolutions can only be expected to result from a holistic, sustainable approach which accommodates the difficulty in balancing ethical practices with the demands for ever-increasing profits. This unique graduate textbook addresses the issue of business ethics from the perspective of an individual's internal growth facilitated by a consideration of the principles of depth psychology, spiritual wisdom, meditation, and quantum physics, written by a CEO with an enormous business background. It not only promotes a new ethical approach, but also addresses the implementation of this new approach in the most important business sectors as a replacement for previous ineffective codes of conduct which have failed. It's a must read for business students with aspirations of becoming managers or entrepreneurs in the economic sector as well as for all young professionals, managers and entrepreneurs to improve their ethical performance and sustainable success. Message from the author This book creates an impetus for change in a business world where unethical practices are rampant by providing a suggested a New Integral Ethics for the economy, an ethical approach based upon inner psychological and spiritual development arising from a serious consideration of Depth Psychology. Readers will learn how adoption of specific Practices, which lead to inner growth and spiritual maturity, will result in ethical, morally sound business practices not because they are mandated, but because once the SELF is actualized, you cannot do otherwise. Laws, appeals and directives which have never successfully resulted in ethical practices become unnecessary, replaced by intrinsically ethical individuals who collectively influence corporate ethical behaviour. This is a giant leap into a new dimension in our globalized, digitized economy. "Business Ethics 3.0, by Erhard Meyer-Galow provides a much needed beacon of light to a segment of our society that seem to be sinking deeper and deeper into darkness. The term "business ethics", once an important topic within

the business community, has slowly descended through the fog of profitable ends justifying unprincipled means to become nothing more than a self-contradictory oxymoron -- especially among large international corporations. In Business Ethics 3.0, Erhard Meyer-Galow has taken a fresh approach that appeals to individual personal growth rather than the usual proffering of academic arguments that are not implementable in the real world of relentless Machiavellian competition. Only through raising and improving individual awareness and responsibility can real long-term change have a chance of developing. Business Ethics 3.0 is on the right track with a positive and compelling message...may it succeed where the academics have failed." Thomas Campbell, physicist, consciousness researcher, author of My big TOE Finalist at the 2018 Humanistic Management Book Awards

The Jews and Modern Capitalism - Werner Sombart 1913

[Politics and the English Language](#) - George Orwell 2021-01-01

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

Revelations Tarot - Zach Wong 2005

The Ultimate Solution to Tarot Reversals Whether you're new to divination or an experienced professional, working with reversed Tarot cards is always a challenge. After all, the image is upside-down and everything appears, well, reversed. How can you possibly work with such inverted symbols? Zach Wong has come up with the ultimate solution. He presents different symbolism on the bottom part of the card, so it appears upright when the card is inverted. This is like having a 156-card deck while only using 78 cards. There is much more to this deck than just ease with reading reversals. All of the characters wear masks. This shows them to be similar to mythical deities who assume human form and stand among us to make their spiritual messages easier for us to understand. Similarly, they make the message of the cards easier to comprehend. These cards, with their stained glass imagery, match the traditional RWS interpretations. Wong, however, has added his own twists that energize and add additional meaning to the RWS concepts. You can bring these additional insights into your divinations with any Tarot. This is a beautiful, unique, and powerful deck that matches and expands upon traditional Tarot ideas. The new realizations and revelations you'll get when you use this deck for divination or meditation validate the name and give another reason for you to use this deck regularly. Ideal for meditation, study, and divination, treat this deck as something

special...because it is!

Mass Media - Mieke Ceulemans 1979

A Perfect Vacuum - Stanisław Lem 1999

In a perfect vacuum, Stanislaw Lem presents a collection of book reviews of nonexistent works of literature - works that, in many cases, could not possibly be written. Embracing postmodernism's "games for games' sake" ethos, Lem joins the contest with hilarious and grotesque results. Most of the "reviews" target the postmodern infatuation with antinarratives by lampooning their self-indulgence and exploiting their mannerisms. Lem exposes the limits of postmodern fiction, showing how its studious self-consciousness frequently conceals intellectual paucity. Beginning with a review of his own book, Lem moves on to tackle (or create pastiches of) the French new novel, James Joyce, pornography, authorless writing, and Dostoevsky, while at the same time ranging across scientific topics, from cosmology to the pervasiveness of computers.

Electric Language - Michael Heim 1999-01-01

In this book Michael Heim provides the first consistent philosophical basis for critically evaluating the impact of word processing on our use of and ideas about language. This edition includes a new foreword by David Gelernter, a new preface by the author, and an updated bibliography. "Not only important but seminal, on the cutting-edge, furrowing new conceptual territory."-Walter J. Ong, S.J. "A philosopher ponders how the word processor has affected language use and our ideas about it. Heim shrewdly updates a school of thought, associated with such thinkers as Walter Ong, that maintains all changes in writing technology tend to change the way we perceive the world. His argument that word processing leads to fragmented thinking should be addressed and debated."-Carlin Romano, Philadelphia Inquirer "The arguments range over all of Western philosophy (and some Eastern as well), from the ancient Greeks to contemporary phenomenology. . . . Everyone who has used a word processor will find much to think about in Heim's ideas."-David Weinberger, Byte "Fascinating, clear, and well-done . . . stimulating and challenging."-Don Ihde, Philosophy and Rhetoric

Since 1988, J. Hillis Miller has traveled to China to lecture on literary theory, especially the role of globalization in literary theory. Over time, he has assisted in the development of distinctively Chinese forms of literary theory, Comparative Literature, and World Literature. The fifteen lectures gathered in *An Innocent Abroad* span both time and geographic location, reflecting his work at universities across China for more than twenty-five years. More important, they reflect the evolution of Miller's thinking and of the lectures' contexts in China as these have markedly changed over the years, especially on either side of Tiananmen Square and in light of China's economic growth and technological change. A foreword by the leading theorist Fredric Jameson provides additional context.

Depressive Rumination - Costas Papageorgiou 2004-02-06

Rumination (recyclic negative thinking), is now recognised as important in the development, maintenance and relapse of recurrence of depression. For instance, rumination has been found to elevate, perpetuate and exacerbate depressed mood, predict future episodes of depression, and delay recovery during cognitive therapy. Cognitive therapy is one of the most effective treatments for depression. However, depressive relapse and recurrence following cognitive therapy continue to be a significant problem. An understanding of the psychological processes which contribute to relapse and recurrence may guide the development of more effective interventions. This is a major contribution to the study and treatment of depression which reviews a large body of research on rumination and cognitive processes, in depression and related disorders, with a focus on the implications of this knowledge for treatment and clinical management of these disorders. * First book on rumination in depressive and emotional disorders * Contributors are the leaders in the field * First editor is a rising researcher and clinician with specialist interest in depression, and second editor is world renowned for his work on cognitive therapy of emotional disorders

On Entering the Sea - Nizar Qabbani 1996

A unique collection by the Arab world's most renowned poet. In a political age, in which the struggle against external and internal oppression has become central in Arabic poetry, Nizar Qabbani has succeeded in re-establishing the vitality and perennial force of the erotic in human life. Picking up a tradition of Arabic love poetry sixteen centuries old, he has enriched it with the experience of a modern man deeply aware of the changing status of women in contemporary times, and given the most eloquent poetic expression to the imperative of woman's freedom and her right to assume control over her body and emotions. An accomplished master of the erotic, standing among the best love poets of the world, Qabbani has asserted life and joy in the face of chaos and tragedy, paying fervent homage, sustained over five decades, to woman's grace and loveliness. As such he has been able to bring equilibrium and decorum to poetry in crisis, reviving faith in the possibility of happiness and emotional fulfillment. Yet he is also moved to anger by the forces of evil around him, and the opposing poles of exaltation and rage, of agony and ecstasy, describe his unique experiment. A man of his times and of all times, he is by far the most popular poet in the Arab world.

The Exorcist - William Peter Blatty 2011-10-04

Originally published in 1971, *The Exorcist* remains one of the most controversial novels ever written and went on to become a literary phenomenon. Inspired by a true story of a child's demonic possession in the 1940s, William Peter Blatty created an iconic novel that focuses on Regan, the eleven-year-old daughter of a movie actress residing in Washington, D.C. A small group of overwhelmed yet determined individuals must rescue Regan from her unspeakable fate, and the drama that ensues is gripping and unflinchingly terrifying. Two years after its publication, *The Exorcist* was, of course, turned into a wildly popular motion picture, garnering ten Academy Award nominations. On opening day of the film, lines of the novel's fans stretched around city blocks. In Chicago, frustrated moviegoers used a battering ram to gain entry through the double side doors of a theater. In Kansas City, police used tear gas to disperse an impatient crowd who tried to force their way into a cinema. The three major television networks carried footage of these events; CBS's Walter Cronkite devoted almost ten minutes to the story. *The Exorcist* was, and is, more than just a novel and a film: it is a true landmark. Purposefully raw and profane, *The Exorcist* still has the extraordinary ability to disturb readers and cause them to forget that it is "just a story." Published here in this beautiful fortieth anniversary edition, it remains an unforgettable reading experience and will continue to shock and frighten a new generation of readers.

Financial Crisis Management and Democracy - Bettina De Souza Guilherme 2020-12-09

This open access book discusses financial crisis management and policy in Europe and Latin America, with a special focus on equity and democracy. Based on a three-year research project by the Jean Monnet

Network, this volume takes an interdisciplinary, comparative approach, analyzing both the role and impact of the EU and regional organizations in Latin America on crisis management as well as the consequences of crisis on the process of European integration and on Latin America's regionalism. The book begins with a theoretical introduction, exploring the effects of the paradigm change on economic policies in Europe and in Latin America and analyzing key systemic aspects of the unsustainability of the present economic system explaining the global crises and their interconnections. The following chapters are divided into sections. The second section explores aspects of regional governance and how the economic and financial crises were managed on a macro level in Europe and Latin America. The third and fourth sections use case studies to drill down to the impact of the crises at the national and regional levels, including the emergence of political polarization and rise in populism in both areas. The last section presents proposals for reform, including the transition from finance capitalism to a sustainable real capitalism in both regions and at the inter-regional level of EU-LAC relations. The volume concludes with an epilogue on financial crises, regionalism, and domestic adjustment by Loukas Tsoukalis, President of the Hellenic Foundation for European and Foreign Policy (ELIAMEP). Written by an international network of academics, practitioners and policy advisors, this volume will be of interest to researchers and students interested in macroeconomics, comparative regionalism, democracy, and financial crisis management as well as politicians, policy advisors, and members of national and regional organizations in the EU and Latin America.
