Accounting, Text and Cases - Robert Newton Anthony 1983

ACCOUNTING: Text and Cases, 10/E is a 28 chapter book. Chapters 1-14 cover financial accounting, while Chapters 15-21 cover management accounting, and Chapters 22-28 focus on broader issues of control and corporate strategy. The approximately 120 cases that largely make up the end-of-chapter material are a combination of classic Harvard style cases, as well as extended problems. New to this edition is the inclusion of 2-3 problems per chapter. These problems, while not as involved as the case material, allow the students to exercise the concepts demonstrated in each chapter. The

goal of the problem material is to provide a transition to the case material, which is a response to customer requests.

Love and Revolution in the Twentieth-Century Colonial and Postcolonial World - G. Arunima
2021-10-27

This book addresses emancipatory narratives from two main sites in the colonial world, the Indian and southern African subcontinents. Exploring how love and revolution interrelate, this volume is unique in drawing on theories of affect to interrogate histories of the political, thus linking love and revolution together. The chapters engage with the affinities of those who live with their colonial pasts: crises of expectations, colonial national convulsions, memories of anti-colonial solidarity, even shared radical libraries. It calls attention to the specific and singular way in which notions of 'love of the world' were born in a precise moment of anti-colonial struggle: a love of the world for which one would offer one's life, and for which there had been little precedent in the history of earlier revolutions. It thus offers new ways of understanding the shifts in global traditions of emancipation over two centuries.

Is the Earth a Globe - Alexander Gleason
2016-11-26

-Is the Bible from Heaven? or is the Earth a Globe?- First published as a 95 page soft cover book in 1890 to expound upon these questions. The 402 page second edition was released in 1893. We release this 160 page modern edition of the second portion of that book, *Is the Earth A Globe?* for new consideration. In this portion Gleason disproves the arguments generally advanced in favor of the so-called Copernican theory, and then proceeds to demonstrate beyond any reasonable doubt, that the earth is not a globe, that it does not move or rotate, that the sun moves, that the moon is not an opaque or non-luminous body, etc. The writer shows to the satisfaction of common sense that the modern universally accepted and taught theoretical astronomy, which claims the earth to be a globe, revolving around the sun, etc., is based on very weak arguments indeed, and that, on the contrary, it is not at all antagonistic to true science to accept the teachings of the Bible as they read. - Lutheran Witness, April 21, 1891

The collection includes two new essays by Derrida that appear here for the first time in any language, as well as a substantial introduction by Gil Anidjar that explores Derrida's return to his own "religious" origins and his attempts to bring to light hidden religious dimensions of the social, cultural, historical, and political.

Pharmacology of Antibiotics - J. D. Williams 2012-12-06

The International Society of Chemotherapy meets every two years to review progress in chemotherapy of infections and of malignant disease. Each meeting gets larger to encompass the extension of chemotherapy into new areas. In some instances, expansion has been rapid, for example in cephalosporins, penicillins and combination chemotherapy of cancer - in others slow, as in the field of parasitology. New problems of resistance and untoward effects arise; reduction of host toxicity without loss of

antitumour activity by new substances occupies wide attention. The improved results with cancer chemotherapy, especially in leukaemias, are leading to a greater prevalence of severe infection in patients so treated, pharmacokinetics of drugs in normal and diseased subjects is receiving increasing attention along with related problems of bioavailability and interactions between drugs. Meanwhile the attack on some of the major bacterial infections, such as gonorrhoea and tuberculosis, which were among the first infections to feel the impact of chemotherapy, still continue to be major world problems and are now under attack with new agents and new methods. From this wide field and the 1,000 papers read at the Congress we have produced Proceedings which reflect the variety and vigour of research in this important field of medicine. It was not possible to include all of the papers presented at the Congress but we have attempted to include most aspects of current progress in chemotherapy.
