Conversations About Philosophy, Volume 1 - Howard Burton 2021-05-24

Conversations About Philosophy, Volume 1, includes the following 5 carefully-edited Ideas Roadshow Conversations featuring leading researchers. This collection includes a detailed preface highlighting the connections between the different books. Each book is broken into chapters with a detailed introduction and questions for discussion at the end of each chapter: 1. *Plato's Heaven: A User's Guide - A Conversation with James Robert Brown*, Emeritus Professor of Philosophy at the University of Toronto. This wide-ranging conversation addresses a central theme in current philosophy: Platonism vs. Naturalism and provides accounts of both approaches to mathematics. The Platonist-Naturalist debate over mathematics is explored in a comprehensive fashion and also sheds light on non-mathematical aspects of a dispute that is central to contemporary philosophy. This book also surveys new avenues of research into the epistemology of thought experiments. 2. *Philosophy of Brain - A Conversation with neurophilosopher Patricia Churchland*, UC San Diego. During this comprehensive conversation Patricia Churchland discusses her extensive research in the fields of philosophy of neuroscience, philosophy of the mind and neuroethics. Further topics include how the brain works, how we are able to represent the external world of objects and our inner world of thoughts, self and consciousness. 3. *Defined By Relationship* is based on an in-depth filmed conversation between Howard Burton and Charles Foster, who is a writer, traveller, veterinarian, barrister, philosopher and Fellow of Green Templeton College, University of Oxford. This wide-ranging conversation provides a detailed exploration of several of his books in many different fields with a particular focus on Human Dignity in Bioethics and Law and the New York Times Bestseller *Being a Beast*. 4. *Free Will: An Investigation - A Conversation with Alfred Mele*, the William H. and Lucyle T. Werkmeister Professor of Philosophy at Florida State University. This in-depth conversation examines free will and the different notions of free will that exist, the connections of free will with developments in neuroscience, social psychology and public opinion polls and Alfred Mele's key concern about how current and future insights might be directly applied to improve our world. 5. *Appreciating Analytic Philosophy - A Conversation with Scott Soames*, Distinguished Professor of Philosophy at University of Southern California. Scott Soames is specialized in the philosophy of language and the history of analytic philosophy. This detailed conversation provides a thoughtful introduction to analytic philosophy, including some examples of contemporary relevance to a wide range of other fields. Howard Burton is the founder and host of all Ideas Roadshow Conversations and was the Founding Executive Director of Perimeter Institute for Theoretical Physics. He holds a PhD in theoretical physics and an MA in philosophy.

Medical Ethics and Medical Law - José Miola 2007-07-12

Medical law and ethics are frequently referred to in conjunction, and appear together in many textbooks. But do they combine to form a cohesive unit, and do they benefit each other? It may be argued that they do not, but rather suffer a symbiotic relationship, clashing rather than cooperating. This book examines this relationship, and how the law sees medical ethics. It then considers whether medical ethics functions in the way that the law thinks that it does. After providing a historical perspective that identifies medical ethics discourse as disjointed and fragmented, the book continues by examining key medico-legal case law

and reports that have an inherent ethical content for clues as to how they define medical ethics and its role. It also considers how medical ethics sees the law, concluding that a misapprehension by each party as to what the other does creates a mutually harmful relationship between them.

On a daily basis, healthcare professionals are faced with many ethical situations along with legal implications. *Applied Law and Ethics for Health Professionals, Second Edition* tackles ethical situations and the potential legal impacts that many healthcare professionals may face in their careers and asks them to consider their own personal values system and use reasoning skills to come to an informed outcome. Modern cases

and topics are discussed, offering real-world ethical and legal accounts that may impact professionals in the field. As the text concludes, readers are again asked to gauge their growth, exploring their newly formed knowledge, values, and opinions on healthcare ethics.

Medical Ethics and Law - Dominic Wilkinson 2019-07-05

This short textbook of ethics and law is aimed at doctors in training and in practice. Medical ethics and law are now firmly embedded in the curricula of medical schools. The ability to make clinical decisions on the basis of critical reasoning is a skill that is rightly presumed as necessary in today's doctors. Medical decisions involve not only scientific understanding but also ethical values and legal analysis. The belief that it is ethically right to act in one way rather than another should be based on good reasons: it is not enough to follow what doctors have always done, nor what experienced doctors now do. The third edition has been revised and updated to reflect changes in the core curriculum for students, developments in the law as well as advances in medicine and technology. The first part of the book covers the foundations of ethics and law in the context of medicine. The second part covers specific core topics that are essential for health professionals to understand. The third section of the book includes new chapters on cutting edge topics that will be crucial for the doctors and health professionals of tomorrow. This new edition includes a new third section that provides an extension to the core curriculum focused on four key emerging topics in medical ethics – neuroethics, genethics, information ethics and public health ethics. The chapters on Consent, Capacity and Mental Health Law have been extensively revised to reflect changes in legislation. Chapters on confidentiality and information ethics contain new sections relating to information technology, sharing information and breaching confidentiality. Each chapter contains case examples drawn from personal experience or from the media. This edition also includes cartoons to highlight cutting edge and topical issues. Most chapters include revision questions and an extension case to encourage readers who are interested in a topic to explore further.

The Respiratory Therapist's Legal Answer Book - Anthony L. DeWitt 2006

This basic legal guide contains the extensive information respiratory therapists need to know about the court system, lawyers, law, and litigation. Written by the author, a lawyer and therapist with 13 years of clinical experience ranging from floor therapy to administrative and management functions, this book combines the author's knowledge of the complex interactions in the legal system and how the legal system relates to therapy delivered at the bedside. A resource for students and professionals, the book presents 16 areas of the law, including medical negligence, hospital law and employment law. The text also contains a series of questions and answers about the subject areas of the law, and provides extensive guidance for therapists navigating the treacherous currents of ever changing laws. This is a book for anyone who treats respiratory therapy patients or manages therapists. Most legal texts are written either by non-lawyers or non-therapists. Non-lawyers do not understand the complex interactions in the legal system, and are not permitted to give advice. Non-therapists may understand the law very well, but be unable to relate to how therapy is delivered at the bedside. This book is written by a therapist who is a lawyer, and who has been at the bedside. With thirteen years of clinical experience ranging from floor-therapy to administration and management functions, the author understands how a hospital works. The result is a book that is useful both as a course-book and as a reference

Defined By Relationship - Howard Burton 2021-04-21

This book is based on an in-depth filmed conversation between Howard Burton and Charles Foster, who is a writer, traveller, veterinarian, barrister, philosopher and Fellow of Green Templeton College, University of Oxford. This wide-ranging conversation provides a detailed exploration of several of his books in many different fields with a particular focus on "Human Dignity in Bioethics and Law" and the New York Times Bestseller "Being a Beast". This carefully-edited book includes an introduction, At the Heart, and questions for discussion at the end of each chapter: I. An Aristotelian Encounter - A mystery solved II. Studies in Empathy - And the lack thereof III. Childhood - A brief digression IV. Engagement - Consciousness, relationships and different perspectives V. Dignity - An overarching principle VI. Creating Impact - Changing hearts and minds About Ideas Roadshow Conversations: This book is part of an expanding series of 100+ Ideas Roadshow conversations, each one presenting a wealth of candid insights from a leading expert through a focused yet informal setting to give non-specialists a uniquely accessible window into frontline research and scholarship that wouldn't otherwise be encountered through standard lectures and textbooks.

Routledge Handbook of Medical Law and Ethics - Yann Joly 2014-09-19

This book explores the scope, application and role of medical law, regulatory norms and ethics, and addresses key challenges introduced by contemporary advances in biomedical research and healthcare. While mindful of national developments, the handbook supports a global perspective in its approach to medical law. Contributors include leading scholars in both medical law and ethics, who have developed specially commissioned pieces in order to present a critical overview and analysis of the current state of medical law and ethics. Each chapter offers comprehensive coverage of longstanding and traditional topics in medical law and ethics, and provides dynamic insights into contemporary and emerging issues in this heavily debated field. Topics covered include: Bioethics, health and human rights Medical liability Law and emerging

health technologies Public health law Personalized medicine The law and ethics of access to medicines in developing countries Medical research in the genome era Emerging legal and ethical issues in reproductive

technologies This advanced level reference work will prove invaluable to legal practitioners, scholars, students and researchers in the disciplines of law, medicine, genetics, dentistry, theology, and medical ethics.
