*Infection Control in the Dental Office* - Louis G. DePaola 2019-11-17

This book reviews the principles of infection control and the guidelines and standards of care in multiple countries, discussing them within the context of the practice of dentistry. The aim is to enable dental practitioners to ensure that the appropriate measures are adopted for each patient contact, thereby minimizing the risk of transmission of infection – a goal that is becoming ever more important given the threats posed by new or re-emerging infectious diseases and drug-resistant infections. Readers will find information and guidance on all aspects of infection control within the dental office: hand and respiratory hygiene, use of personal protective equipment, safe handling of sharps and safe injection practices, management of occupational exposures, maintenance of dental unit water quality, surface disinfection, and the cleaning and sterilization of dental instruments. Infection Control in the Dental Office will be an invaluable asset for all dental practitioners, including dentists, dental specialists, dental hygienists, and dental assistants.

**Management of Fractured Endodontic Instruments** - Theodor Lambrianidis 2017-09-28

This superbly illustrated book provides detailed information on the causes of instrument failure during endodontic treatment, the factors influencing the management of such cases, and the diverse management options that may be employed to resolve the problem. Readers will find clear descriptions and comparative evaluation of the available methods, techniques, and devices. Complications that may arise during the management of fractured instruments are described, and the impact of retained file fragments on the prognosis of endodontic treatment is discussed. In addition, means of preventing iatrogenic errors from occurring in the first place (the best form of management) are explained, emphasizing that the risk of instrument failure is reduced if proper guidelines are carefully considered and followed. The book will assist both endodontists and general dental practitioners in achieving an optimal outcome when confronted with the time-consuming and challenging task of dealing with a fractured instrument within the root canal – a still frequent circumstance despite the plethora of improvements in instrument design, alloy composition, and manufacturing processes.
