Gene Drives on the Horizon - National Academies of Sciences, Engineering, and Medicine 2016-08-28
Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges, including the reduction of poverty and the burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries. However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. Gene Drives on the Horizon outlines the state of knowledge relative to the science, ethics, public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and regulators.

American Buffalo - David Mamet 2010-10-26

In a Chicago junk shop three small-time crooks plot to rob a man of his coin collection, the showpiece of which is a valuable "Buffalo nickel". These high-minded grifters fancy themselves businessmen pursuing legitimate free enterprise. But the reality of the three--Donny, the oafish junk shop owner; Bobby, a young junkie Donny has taken under his wing; and "Teach"; a violently paranoid braggart--is that they are merely pawns caught up in their own game of last-chance, dead-end, empty pipe dreams.

Seeking Crystal - Joss Stirling 2013-08-01

Bittersweet - Miranda Beverly-Whittemore 2015-04-28

Suspenseful and cinematic, New York Times bestseller Bittersweet exposes the gothic underbelly of an idyllic world of privilege and an outsider's hunger to belong. On scholarship at a prestigious East Coast college, ordinary Mabel Dagmar is surprised to befriend her roommate, the beautiful, wild, blue-blooded Genevra Winslow. Ev invites Mabel to spend the summer at Bittersweet, her cottage on the Vermont estate where her family has been holding court for more than a century. Mabel falls in love with midnight skinny-dipping, the wet dog smell that lingers near the yachts, and the moneyed laughter that carries across the still lake while fireworks burst overhead. Before she knows it, she has everything she's ever wanted: friendship, a boyfriend, access to wealth, and, most of all, for the first time in her life, the sense that she

belongs. But as Mabel becomes an insider, a terrible discovery leads to shocking violence and reveals what the Winslows may have done to keep their power intact--and what they might do to anyone who threatens them. Mabel must choose: either expose the ugliness surrounding her and face expulsion from paradise, or keep the family's dark secrets and make Ev's world her own.

Trollhunters - Guillermo del Toro 2015-07-07

From Guillermo del Toro comes the book that inspired the Netflix Animated Series TROLLHUNTERS! "You are food. Those muscles you flex to walk, lift, and talk? They're patties of meat topped with chewy tendon. That skin you've paid so much attention to in mirrors? It's delicious to the right tongues, a casserole of succulent tissue. And those bones that give you the strength to make your way in the world? They rattle between teeth as the marrow is sucked down slobbering throats. These facts are unpleasant but useful. There are things out there, you see, that don't cower in holes to be captured by us and cooked over our fires. These things have their own ways of trapping their kills, their own fires, their own appetites." Jim Sturges is your typical teen in suburban San Bernardino— one with an embarrassingly overprotective dad, a best friend named "Tubby" who shares his hatred of all things torturous (like gym class), and a crush on a girl who doesn't know he exists. But everything changes for Jim when a 45-year old mystery resurfaces, threatening the lives of everyone in his seemingly sleepy town. Soon Jim has to team up with a band of unlikely (and some un-human) heroes to battle the monsters he never knew existed. From the minds of horror geniuses Guillermo del Toro and Daniel Kraus comes a new illustrated novel about the fears that move in unseen places.

Bloodrose - Andrea Cremer 2012-01-03

The third book in the phenomenal New York Times bestselling Nightshade series! Calla has always welcomed war. But now that the final battle is upon her, there's more at stake than fighting. There's saving Ren, even if it incurs Shay's wrath. There's keeping her brother, Ansel, safe, even if he's been branded a traitor. There's proving herself as the pack's alpha, facing unnamable horrors, and ridding the world of the Keepers' magic once and for all. And then there's deciding what to do when the war ends. If Calla makes it out alive, that is. Read the prequels to the Nightshade series RIFT and RISE. *formerly published under Andrea Cremer*

When Scotland Was Jewish - Elizabeth Caldwell Hirschman 2015-05-07

The popular image of Scotland is dominated by widely recognized elements of Celtic culture. But a

significant non-Celtic influence on Scotland's history has been largely ignored for centuries? This book argues that much of Scotland's history and culture from 1100 forward is Jewish. The authors provide evidence that many of the national heroes, villains, rulers, nobles, traders, merchants, bishops, guild members, burgesses, and ministers of Scotland were of Jewish descent, their ancestors originating in France and Spain. Much of the traditional historical account of Scotland, it is proposed, rests on fundamental interpretive errors, perpetuated in order to affirm Scotland's identity as a Celtic, Christian society. A more accurate and profound understanding of Scottish history has thus been buried. The authors' wide-ranging research includes examination of census records, archaeological artifacts, castle carvings, cemetery inscriptions, religious seals, coinage, burgess and guild member rolls, noble genealogies, family crests, portraiture, and geographic place names.

Diary of the Cat Named Carrot - Erin Merryn 2021-03-30

Celebrate a year in the life of The Cat Named Carrot, as she goes from humble beginnings in a shelter to a loving home with a family of three adorable little girls and internet stardom. Bailey was certainly no ordinary cat—an orange tabby who gained fans around the world when his humanlike antics went viral. Sadly, when 14-year-old Bailey died, his family grieved their loss. They'd never find a cat quite like him—or would they? Then along came Carrot, an orange tabby kitten born as a stray, who appeared just as Erin Merryn and her young girls Abby, Hannah, and baby Claire were mending their broken hearts. Written in the voice of Carrot, follow her remarkable journey from shelter cat to top Instagram celebrity feline. Much like Bailey did, she loves spending time with her human family: making mischief with her girl gang; going joyriding in a pint-sized pink Barbie Jeep; doing arts-and-crafts projects; modeling a pink tutu and flowery headband; enjoying a spa day complete with fluffy robe and cucumber eye treatments; celebrating Christmas, Easter, and every holiday in between. It's no wonder that Carrot's videos have gone viral—garnering millions of views on Ellen, the Dodo, Good Morning America, Access Hollywood, People, and many more. Complete with four-color photos that will leave readers purring with delight, the journal of this sweet, adorable kitty with personality to spare shows us that the human-animal bond runs more than fur deep. It is love that will last a lifetime!

Intelligent Projects Using Python - Santanu Pattanayak 2019-01-31

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book
