Management Principles - P. J. Smit 2007

Book & CD. To improve on an award-winning book poses a major challenge to its authors. The authors of this book took the challenge head-on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa, and the rest of Africa. The findings of this study, which dealt with current and near-future management issues, as well as classical and contemporary thinking about management, were used as the blueprint for the updating of this book. After placing management in context, the authors deal with the knowledge, skills and dispositions required of managers to perform the management functions of planning, organising, leading and controlling in a volatile business world. Examples of how the functions are applied in practice are cited throughout the book. These examples refer mainly to South African organisations and situations that managers in South Africa, and Africa, have to deal with to create and sustain a competitive advantage for their organisations. The book endeavours to break down the silo effect of seeing the management functions as separate activities. This is done by continuously placing the management function at hand in a bigger context. This enables learners of management to assess the implications of management decisions on different people, processes, systems and so on that make up the organisation.

Contemporary Management - C. B. Gupta 1992

Religion and Contemporary Management - Arthur J. Wolak 2016-11-21

Although few might think of Moses as a 'leader' in the contemporary business and political sense, Moses is not only among the most significant leaders in Western civilization but is also arguably the quintessential example of a powerful leader from whom much can be learned by anyone entering and occupying leadership positions. Various types of leadership approaches are considered that have been advocated by scholars over the past century. Moses' example as described in the Bible is analyzed to assert why Moses' approach makes for an appropriate and compelling form of leadership today. While present leadership and management vocabulary might differ from the Hebrew Bible, many of the notions advocated by modern leadership theorists appear to parallel major behaviors, traits, functions, experiences and actions ascribed to Moses, especially in the first five books of the Hebrew Bible. Anyone can view Moses through the lens of a particular religion, whether shared or not, and still learn considerably from the experience. One will find Moses depicted as heroic, charismatic, and certainly empathic. Yet, Moses also shows transactional, transformational and visionary leadership qualities. Hence, 'Religion and Contemporary Management' discerns why Moses represents such an important model of effective leadership for contemporary times.

Contemporary Management Education - Piet Naudé 2021-11-05

"Why are we so important?"; "What value do we add?"; and "What good do we create?" These are the

opening questions posed to management educators in this book. This is followed by uncomfortable questions about colonization (Who is in the centre and whose knowledge counts?) and inequality (Whom do we exclude?). After questioning the easy adoption of technology (What are we embracing?) and the challenge posed by global warming (Can management education help stop climate change?), the author ends by sketching some leadership lessons required for the future: "What lessons can we learn in a black swan event?" Mixing philosophical analyses with anecdotes from experience, the author does not shy away from discussing controversial views to give direction to current debates. Tracing eight such crucial questions and providing well-researched perspectives, this book is an engaging read for anyone interested in the future direction of business schools in particular and management education in general. "There are many books and articles on business education, but few as deep and insightful as Contemporary Management Education. I enthusiastically recommend it to anyone who seeks to understand and improve the training of business leaders." Peter Tufano, Saïd Business School, University of Oxford "An amazing read. Piet Naudé is eclectic and sparkling. He applies his talents to the wicked maze of management education in society. No issue is more important for global business. No writer is better qualified." Thomas Donaldson, The Wharton School, University of Pennsylvania "A powerful, persuasive, and superbly compelling book. Between Enterprise and Ethics - John Hendry 2004-03-04

We live in a 'bimoral' society, in which people govern their lives by two contrasting sets of principles. On the one hand there are the principles associated with traditional morality. Although these allow a modicum of self-interest, their emphasis is on our duties and obligations to others: to treat people honestly and with respect, to treat them fairly and without prejudice, to help and care for them when needed, and ultimately, to put their needs above our own. On the other hand there are the principles associated with the entrepreneurial self-interest. These also impose obligations, but of a much more limited kind. Their emphasis is competitive rather than cooperative: to advance our own interests rather than to meet the needs of others. Both sets of principles have always been present in society but in recent years traditional moral authorities have lost much of their force and the morality of self-interest has acquired a much greater social legitimacy, over a much wider field of behaviour, than ever before. The result of this is that in many situations it is no longer at all apparent which set of principles should take precedence. In this book John Hendry traces the cultural and historical origins of the 'bimoral' society and explores the challenges it poses for the world of business and management. The developments that have led to the 'bimoral' society have also led to new, more flexible forms of organizing, which have released people's entrepreneurial energies and significantly enhanced the creative capacities of business. Working within these organizations, however, is fraught with moral tensions as obligations and self-interest conflict and managers are pulled in all sorts of different directions. Managing them successfully poses major new challenges of leadership, and 'moral' management, as the technical problem-solving that previously characterised managerial work is increasingly accomplished by technology and market mechanisms. The key role of management becomes the political and moral one of determining purposes and priorities, reconciling divergent interests, and nurturing trust in interpersonal relationships. Exploring these tensions and challenges, Hendry identifies new issues for contemporary management and puts recognized issues

into context. He also explores the challenges posed for a post-traditional society as it seeks to regulate and govern an increasingly powerful and global business sector.
