In Deep - Brenda Rothert 2015-07-10

I've got a secret. No one knows how I blow off steam, and that's how I like it. Most of the time, I'm happy just being part of a big family in a small town. And those times I need to get away are mine and mine alone. My secret stays safe until I meet her - the woman who simultaneously pisses me off and turns me on. She seems like a wallflower at first, but it turns out there's a lot more to her than I realized. Despite her hidden strength, she has a vulnerability I can't resist. As we open up to each other, I realize she's starting to mean everything to me. She doesn't feel the same way, but that won't stop me from doing whatever it takes to keep her safe - even if it means exposing my secret to her. I'm in way over my head, and all I can hope is that someday, she'll feel the same way about me.

Speech-to-Speech Translation - Yutaka Kidawara 2019-11-22

This book provides the readers with retrospective and prospective views with detailed explanations of component technologies, speech recognition, language translation and speech synthesis. Speech-to-speech translation system (S2S) enables to break language barriers, i.e., communicate each other between any pair of person on the globe, which is one of extreme dreams of humankind. People, society, and economy connected by S2S will demonstrate explosive growth without exception. In 1986, Japan initiated basic research of S2S, then the idea spread world-wide and were explored deeply by researchers during three decades. Now, we see S2S application on smartphone/tablet around the world. Computational resources such as processors, memories, wireless communication accelerate this computation-intensive systems and accumulation of digital data of speech and language encourage recent approaches based on machine learning. Through field experiments after long research in laboratories, S2S systems are being well-developed and now ready to utilized in daily life. Unique chapter of this book is end-to-end evaluation by comparing system's performance and human competence. The effectiveness of the system would be understood by the score of this evaluation. The book will end with one of the next focus of S2S will be technology of simultaneous interpretation for lecture, broadcast news and so on.
