Iberia, Land of Glaciers - Marc Oliva

2021-09-22

Iberia, Land of Glaciers: How The Mountains Were Shaped By Glaciers discusses the impact of past glaciers in the current landscape of Iberia. Currently, there are only small glaciers in the highest peaks of the Pyrenees that are the legacy of the last cold period that ended at the end of the 19th century: The Little Ice Age. However, an accurate observation of the landscape of the highest peaks and adjacent valleys of the Iberian Peninsula reveals a past shaped by the successive passage of glaciers with hundreds of meters of ice, similar to what happens today in the Alps or Patagonia. Iberian glaciation has resulted in ice expansion through valleys that are now used by the road network

and where important populations settle; in addition, large accumulations of sediments deposited by those glaciers are still unstable today and can trigger risks for mountain populations. Iberia, Land of Glaciers presents the impact of the glaciers in the landscape of mountains following a more educational perspective with examples of 21 Iberian massifs written by specialists from each of the areas. Assesses present-day Iberian Peninsula landscape trends by understanding the past behavior of glaciers Includes the latest findings of all the major Iberian mountains in a single book Includes quality, color figures to enhance understanding of glacier formations Provides a more educational and pedagogical perspective on glacial processes to reach an audience beyond academia

Illusion in Cultural Practice - Katharina Rein
2021-11-25

This volume explores illusionism as a much larger phenomenon than optical illusion, magic shows, or special effects, as a vital part of how we perceive, process, and shape the world in which we live. Considering different cultural practices characterized by illusionism, this book suggests a new approach to illusion via media theory. Each of the chapters analyses a specific kind of illusionistic practice and the concept of illusionism it entails in a given context, including

philosophy, perception and cognitive theory, performance magic, occultism, optics, physiology, early cinema, cartomancy, spiritualism, architecture, shamanic rituals, and theoretical physics, to show the diversity of shapes that illusionism and illusions can take. The book provides detailed analyses of illusions within performance and ritual magic, philosophy, art history and psychology as well as a first approach to the study of illusions outside of these established fields. It aims to find ways of identifying and analysing a wider range of illusions in the humanities. This multidisciplinary and comprehensive volume will appeal to scholars and students with an interest in media and culture, theatre and performance, philosophy, sociology, politics and religion. This publication was supported by the Internationales Kolleg für Kulturtechnikforschung und Medienphilosophie of the Bauhaus-Universität Weimar with funds from the German Federal Ministry of Education and Research. Science, Culture and National Identity in Francoist Spain, 1939-1959 - Marició Janué i Miret 2021-04-24

This book examines the role that science and culture held as instruments of nationalization policies during the first phase of the Franco regime in Spain. It considers the reciprocal relationship between political legitimacy and developments in science and culture, and explores the 'nationalization' efforts in Spain in the 1940s and 1950s, via the complex process of transmitting narratives of national identity, through ideas, representations and homogenizing practices. Taking an interdisciplinary approach, the volume features insights into how scientific and cultural language and symbols were used to formulate national identity, through institutions, resource distribution and specific national policies. Split

into five parts, the collection considers policies in the Francoist 'New State', the role of women in these debates, and perspectives on the nationalization and internationalization efforts that made use of scientific and cultural spheres. Chapters also feature insights into cinema, literature, cultural diplomacy, mathematics and technology in debates on Catalonia, the Nuclear Energy Board, the Spanish National Research Council, and how scientific tools in Spain in this era fed into wider geopolitics with America and onto the UNESCO stage.

Romanesque Saints, Shrines, and Pilgrimage - John McNeill 2020-02-25

The 23 chapters in this volume explore the material culture of sanctity in Latin Europe and the Mediterranean between c. 1000 and c. 1220, with a focus on the ways in which saints and

relics were enshrined, celebrated, and displayed. Reliquary cults were particularly important during the Romanesque period, both as a means of affirming or promoting identity and as a conduit for the divine. This book covers the geography of sainthood, the development of spaces for reliquary display, the distribution of saints across cities, the use of reliquaries to draw attention to the attributes, and the virtues or miracle-working character of particular saints. Individual essays range from case studies on Verona, Hildesheim, Trondheim and Limoges, the mausoleum of Lazarus at Autun, and the patronage of Mathilda of Canossa, to reflections on local pilgrimage, the deployment of saints as physical protectors, the use of imagery where possession of a saint was disputed, island sanctuaries, and the role of Templars and Hospitallers in the promotion of relics from the Holy Land. This book will serve historians and archaeologists studying the Romanesque period, and those interested in material culture and

religious practice in Latin Europe and the Mediterranean c.1000-c.1220.

Indigenous Graphic Communication Systems - Katarzyna Mikulksa 2020-01-17

Indigenous Graphic Communication Systems challenges the adequacy of Western academic views on what writing is and explores how they can be expanded by analyzing the sophisticated graphic communication systems found in Central Mesoamerica and Andean South America. By examining case studies from across the Americas, the authors pursue an enhanced understanding of Native American graphic communication systems and how the study of graphic expression can provide insight into ancient cultures and societies, expressed in indigenous words. Focusing on examples from Central Mexico and the Andes, the authors explore the overlap among writing, graphic expression, and orality in indigenous societies, inviting reevaluation of the Western notion that

writing exists only to record language (the spoken chain of speech) as well as accepted beliefs of Western alphabetized societies about the accuracy, durability, and unambiguous nature of their own alphabetized texts. The volume also addresses the rapidly growing field of semasiography and relocates it more productively as one of several underlying operating principles in graphic communication systems. *Indigenous Graphic Communication Systems* reports new results and insights into the meaning of the rich and varied content of indigenous American graphic expression and culture as well as into the societies and cultures that produce them. It will be of great interest to Mesoamericanists, students, and scholars of anthropology, archaeology, art history, ancient writing systems, and comparative world history. The research for and publication of this book have been supported in part by the National Science Centre of Poland (decision no. NCN-KR-0011/122/13) and the Houston Museum of

Letters I Never Mailed - Alec Wilder 2005

Letters I Never Mailed: Clues to a Life, by Alec Wilder, in a new, annotated edition with introduction and supplementary material by David Demsey, foreword by jazz pianist Marian McPartland, and photographs by Louis Ouzer. Alec Wilder is a rare example of a composer who established a reputation both as a prolific composer of concertos, sonatas, and operas, and as a popular songwriter [including the hit I'll Be Around]. He was fearsomely articulate and had a wide and varied circle of friends ranging from Graham Greene to Frank Sinatra and Stan Getz. Letters I Never Mailed, hailed at its first

publication [in 1975, by Little, Brown], tells the story of Wilder's musical and personal life through unsent letters addressed to various friends. In it, he shares his insights -- and sometimes salty opinions -- on composing, musical life, and the tension between art and commercialism. This new, scholarly edition leaves Wilder's original text intact but decodes the mysteries of the original through an annotated index that identifies the letters' addressees, a biographical essay by David Demsey, and photographs by renowned photographer and lifelong friend of Wilder, Louis Ouzer. David Demsey is Professor of Music and coordinator of jazz studies at William Paterson University and an active jazz and classical saxophonist. He is co-author of Alec Wilder: A Bio-Bibliography [Greenwood Press] and has contributed to The Oxford Companion to Jazz.
