Robustness in Automatic Speech Recognition - Jean-Claude Junqua 2012-12-06

Foreword Looking back the past 30 years, we have seen steady progress made in the area of speech science and technology. I still remember the excitement in the late seventies when Texas Instruments came up with a toy named "Speak-and-Spell" which was based on a VLSI chip containing the state-of-the-art linear prediction synthesizer. This caused a speech technology fever among the electronics industry.

Particularly, applications of automatic speech recognition were rigorously attempted by many companies, some of which were start-ups founded just for this purpose. Unfortunately, it did not take long before they realized that automatic speech recognition technology was not mature enough to satisfy the need of customers. The fever gradually faded away. In the meantime, constant efforts have been made by many researchers and engineers to improve the automatic speech recognition technology. Hardware capabilities have advanced impressively since that time. In the past few years, we have been witnessing and experiencing the advent of the "Information Revolution." What might be called the second surge of interest to commercialize speech technology as a natural interface for man-machine communication began in much better shape than the first one. With computers much

more powerful and faster. many applications look realistic this time. However. there are still tremendous practical issues to be overcome in order for speech to be truly the most natural interface between humans and machines.

*Museum Without Walls* - Jonathan Meades  
2012-11-13

Jonathan Meades has an obsessive preoccupation with places. He has spent thirty years constructing sixty films, two novels and hundreds of pieces of journalism that explore an extraordinary range of them, from natural landscapes to man-made buildings and 'the gaps between them', drawing attention to what he calls 'the rich oddness of what we take for granted'. This book collects fifty-four pieces and six film scripts that dissolve the barriers between high and low culture, good and bad taste, deep seriousness and black comedy. Meades delivers what he calls 'heavy entertainment' - strong opinions backed up by an astonishing depth of knowledge. To read Meades on places, buildings, politics or cultural history is an exhilarating workout for the mind. He leaves you better informed, more alert, less gullible.

*Unstoppable* - Yanni Raz 2016-06-09

Unstoppable is a word defined as "difficult or impossible to preclude or stop." As a human

quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable.

Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier.

Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too.

This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted in Yanni Raz regaining his health and becoming a self-made millionaire after migrating from his native Israel to the United States.

Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yanni learned reliable principles and the skills necessary for success. Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by storytelling across the media landscape. You'll learn about integrity in business, asset diversification, and many other life tips that thousands of people learn from Yanni on a daily basis. It is time to become fearless and lead a powerful life. With Yanni's new book Unstoppable, you can do just that.

[Recording Spaces](#) - Philip Newell 1998-01-15  
Recording Spaces deals with the acoustics of rooms intended for musical performance of many styles. It discusses these spaces in terms of isolation, internal acoustics, possible techniques of use, and the way that these spaces will interact with the musicians, their instruments, and the microphones. It deals with the concepts of sound isolation, examines some of the principal processes at work, and provides drawings and descriptions of actual rooms and techniques. The book describes how the isolation requirements have their effect on the internal

acoustics of the rooms, and how the room treatments must be conceived with such interactions taken into consideration. Starting from the initial concepts, to the measurements of the finished items, Recording Spaces discusses many different types of room, from vocal 'booths' to orchestral rooms. There are many stories of how actual 'classical' musical performances, from rock to orchestral, have been inspired, or strongly influenced, by the acoustics of their recording spaces. Philip Newell lives in Spain and travels extensively - he is currently designing a concert hall in the Ukraine. Philip began his career working with classic groups such as The Who, whilst at the same time recording brass bands, Welsh male voice choirs, Scottish pipes, church and fairground organs, musicals, and classical recitals. After setting up Virgin Records' first studio he designed their Manor Mobile studio, produced the first recording with a 24-track mobile vehicle, and went on to design their Townhouse Studios in London. Philip has close links with the Institute of Sound and Vibration Research at Southampton University and has written articles for the major audio magazines. He is the author of Studio Monitoring Design, also published by Focal Press.

**Big Artie** - Arthur Beetson 2004

Arthur Beetson was the biggest and best player - and personality - of a football era that most rugby league fans over the age of 35 remember fondly, vividly, with great passion. The son of a member of the Stolen Generation, Arthur was a great forward, who won Tests and Grand Finals, but who was often sent off in crucial games, was once dropped while Australian captain and was even linked to the mysterious death of a team mate in a pub brawl. A popular image was of Beetson with meat pie in hand and his coaches sometimes questioned his work ethic. But as the game became a major television sport he evolved into the face of league. Arthur was the first Aborigine to captain his country in a major sport. Artie remained Australian skipper until 1977, and in 1980, in a famous farewell, inspired Queensland to victory in the inaugural State of Origin match. His legendary clash with Eels colleague Mick Cronin, which emphatically refuted suggestions that clubmates might go easy on each other, is still arguably the most significant of all Origin incidents. Today he is an Australian selector, a father figure at Easts, and a larrikin raconteur with a million yarns. He has witnessed close up all the big stories in rugby league - and many of the funniest - for 37 seasons (and been the pivotal figure in many of

them), from an Ashes victory back in 1966 through to the Roosters wins of today. He has come into close contact with many of the game's most important figures, including Jack Gibson, Wayne Bennett, Wally Lewis, Mal Meninga, Peter Sterling, Bob Fulton, Ricky Stuart, Alfie Langer, Brad Fittler - the list, like the honour roll of Big Artie's achievements, goes on and on.

**Technological Entrepreneurship** - Ian Chaston 2017-01-28

This comprehensive book responds to the growing demand to study entrepreneurship as a key driver of innovation and competitive

advantage. Challenging the existing idea that technological entrepreneurship exists predominantly in SMEs and as a result of market demands, the author argues that a commitment to entrepreneurship remains the most effective strategy for sustaining wealth generation for both organisations and entire nations. The aim of Technological Entrepreneurship is to provide the reader with additional knowledge and understanding of the concepts associated with the exploitation of technological entrepreneurship, and to demonstrate how associated management principles are somewhat different to those utilised in market-driven entrepreneurship. Validation of presented theoretical concepts is achieved through coverage of processes and practices utilised by real world organisations seeking to achieve maximum wealth generation, with specific emphasis on how technological entrepreneurship is the source of disruptive innovation within service sector organisations and how the philosophy is causing fundamental change in the provision of healthcare.

**Achtung-Panzer!** - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
