The subject is rarely out of the headlines, and there is widespread media interest in criminal investigation. ## **Business Law for the Entrepreneur and Manager** - Frank J Cavico 2019-08-19

The 4th edition of Business Law for the Entrepreneur and Manager introduces the reader to fundamental principles of the laws regulating business as well as their practical application in the United States. The various chapters cover such topics as the law and the basic legal principles impacting entrepreneurs and managers, the foundational business laws that entrepreneurs and managers in the United States must become aware of and understand, as well as other important legal topics such as constitutional law, administrative law, torts, products liability, crimes, contract law, sales and agency laws, commercial paper, various forms of business organizations, and debtors and creditors laws. The study of this legal material will be very beneficial to entrepreneurs, managers, and human resources professionals. This edition to this book seeks to make the reader more legally knowledgeable and astute. The book attempts to identify as many legal challenges as possible in establishing, operating, and managing a business in today's very competitive global business environment. The book recommends strategies and tactics to overcome these challenges and to achieve a

successful business in a lawful and moral manner. Yet overcoming business law challenges is not the only goal of this book. The authors naturally want the reader to be able to more clearly foresee legal problems so as to avoid them; but the authors also want the reader to learn how to use the law and the legal system to more effectively establish, manage, and develop the business. Accordingly, an important objective of this edition of this book is to focus on "preventative law," that is, making the business person aware of the law, its applicability to business, and the legal consequences of business decision-making. The goal is to proactively avoid legal problems before they materialize, as opposed to the "trials and tribulations" (and "trials" perhaps literally) of reactively dealing with them when they occur. One major purpose of this book, therefore, is to help business people recognize legal risks and thus avoid legal liability. The authors are most grateful for all the support and encouragement to publish the 4th edition and particularly for the many most helpful suggestions for improving the book from colleagues, managers, human resources professionals, students, friends, and readers from across the globe. Furthermore, by using this book, you are contributing to the Business Ethics and Global Social Responsibility Scholarship, which has been established at the Huizenga School of Business and Entrepreneurship at Nova Southeastern University to support scholarly research and coursework by students, which will advance the fields of business ethics and global social responsibility. This scholarship was conceived and created by the authors of this book, and Huizenga Business College professors, Dr. Frank J. Cavico, J.D., LL.M., Professor Emeritus of Business Law and Ethics, and Dr. Bahaudin G. Mujtaba, M.B.A. / D.B.A., Professor of Management and Human Resources. Professors Cavico and Mujtaba are co-funded this academic scholarship initiative with the support of the H. Wayne Huizenga College of Business and Entrepreneurship and Nova Southeastern University. *Current Strategies to Improve the Nutritional and Physical Quality of Baked Goods* - Mario Martinez Martinez 2020-03-18

The lifestyle of humans is rapidly changing, and, correspondingly, their needs and the current and future megatrends of the food market. It is worth mentioning (1) the preference for natural, simple, and flexible diets that drive the further expansion of plant-focused formulations, (2) the focus on food sustainability (food waste reduction), and (3) the interest in healthy eating as the basis for good health. The hectic routine and rapid urbanization in developed and developing regions, respectively, have shifted consumer preferences toward bread and baked foods, which, interestingly, are often high in sugars and are categorized as having a high glycemic index. Therefore, it is of major importance to address the technological challenges of manufacturing baked goods with high physical and sensory quality that result in positive metabolic responses. This Special Issue seeks to provide fundamental understanding in this area and novel strategies to improve the nutritional properties of baked goods, including a decrease in starch bioaccessibility, sugar reduction, increase in fiber and/or protein content, and the improvement of phytochemical bioactivity. This Special Issue will also cover studies on the physical and sensory improvements of baked goods that may provide a mechanistic understanding to minimize the loss of quality after the incorporation of nutritional-improving ingredients, such as edible byproducts, proteins, or fibers. Last but not least, studies focused on the reduction of additives (clean label) or fat and on the use of sourdough to improve the sensory properties of baked goods will also be included.

*Military Inc* - Ayesha Siddiqi-Agha 2016

Pakistan is a strategic ally of the US in the 'war on terror'. It is the third largest recipient of US aid in the world. Yet Pakistan is a state run by its army and intelligence service. Operating in the shadows, Pakistan's military industrial complex owns and controls swathes of the economic and political landscape of the country. Military Inc. dares to illuminate the military as an oppressive holding company possessing not just security-related businesses, but also hotels, shopping malls, insurance companies, banks, farms and even an airline. The result is a deeply undemocratic society, where money is funnelled towards the military's economic enterprises, leaving those in need of it impoverished and effectively disenfranchised. With an empirical richness, and a view to Pakistan's recent history, Ayesha Siddiqi offers a detailed and powerful case study of a global phenomenon: corruption, hollow economic growth and elitism. This new edition includes a chapter on the recent developments of the military's foray into the media, and a new preface.

**Law: A Very Short Introduction** - Raymond Wacks 2008-03-27

Law underlies our society - it protects our rights, imposes duties on each of us, and establishes a framework for the conduct of almost every social, political, and economic activity. The punishment of crime, compensation of the injured, and the enforcement of contracts are merely some of the tasks of a modern legal system. It also strives to achieve justice, promote freedom, and protect our security. The result is a system that, while it touches all of our daily lives, is properly understood by only a few, with its impenetrable jargon, obsolete procedures, and interminable stream of Byzantine statutes and judgments of the courts. This clear, jargon-free Very Short Introduction aims to redress that balance, as it introduces the essentials of law and legal systems in a lively, accessible, and stimulating manner. Explaining the main concepts, terms, and processes of the legal system, it focuses on the Western tradition (the common law and the civil law), but also includes discussions of other legal systems, such as customary law and Islamic law. And it looks to the future too, as globalization and rapid advances in technology place increasing strain on our current legal system. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The author has devoted more than 25 years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. *Murder in the Name of Allah* - Hazrat Mirza Tahir Ahmad 1990-06-01

Murder in the Name of Allah is the first translation into English of Mazhab Ke Nam Per Khoon, a re-affirmation of the basic tenets of Islam. Hardly a day passes on which an Islamic event does not make headlines. The president of a Muslim country is assassinated by the supporters of Muslim brotherhood; a European journalist is taken hostage by Islamic Jihad; a Pan-American aircraft is hijacked by another Muslim group; American university professors are taken into custody by Hezbollah; Two passenger carrying airplanes were slammed in to world trade center. The glare of 'Islamic' revolution in Iran is reflected through the flares of every gulf oil refinery. This book is a reminder that the purpose of any religion is the spread of peace, tolerance and understanding. It argues that the meaning of Islam—submission to the will of God—has been steadily corrupted by minority elements in the community. Instead of spreading peace, the religion has been abused by fanatics and made an excuse for violence and the spread of terror, both inside and outside the faith. In confirming the true spirit of Islam, it makes the point to followers of all religions that the future of mankind depends on the intrinsic values of love, tolerance, and freedom of conscience and of belief.
