The Defence Industrial Triptych - Henrik Heidenkamp 2015-02-20

The relationship between government and the businesses that contribute towards the defence and security of the state is a critical one; it often underscores a modern state's foreign policy and sense of place in the world. Yet, despite its clear importance, this subject is underexplored and rarely analysed in a rigorous manner. As a consequence, government defence industrial policies, if they exist at all, often seem somewhat contrived, ill-considered and contradictory. The Defence Industrial Triptych systematically analyses the components and drivers of the relationships that bind a government to its

defence industrial base by examining three major case studies: the UK, US and Germany, who between them account for over three quarters of NATO defence spending. The features of their defence industrial relationships -whether common or unique - provide vital lessons for policy-makers, industrialists and the taxpayer. As defence cuts bite across NATO and as the UK approaches the 2015 Strategic Defence and Security Review, the relationships this Whitehall Paper considers are more important than ever.

From Deep State to Islamic State - Jean-Pierre Filiu 2015-07-14

In his disturbing and timely book Jean-Pierre Filiu lays bare the strategies and tactics employed by the Middle Eastern autocracies, above all those of Syria, Egypt, Yemen and Algeria, that set out to crush the democratic uprisings of the 'Arab Revolution.' In pursuit of these goals they turned to the intelligence agencies and internal security arms of the 'deep state,' the armed forces, and to street gangs such as the Shabiha to enforce their will. Alongside physical intimidation, imprisonment and murder, Arab counter-revolutionaries discredited and split their opponents by boosting Salafi-Jihadi groups such as Islamic State. They also released from prison hardline Islamists and secretly armed and funded them. The full potential of the Arab counter-revolution surprised most observers, who thought they had seen it all from the Arab despots: their perversity, their brutality, their voracity. But the

wider world underestimated their ferocious readiness literally to burn down their countries in order to cling to absolute power. Bashar al-Assad clambered to the top of this murderous class of tyrants, driving nearly half of the Syrian population in to exile and executing tens of thousands of his opponents. He has set a grisly precedent, one that other Arab autocrats are sure to follow in their pursuit of absolute power.

Qatar and the Gulf Crisis - Kristian Coates Ulrichsen 2020-03-01

In 2017, Saudi Arabia, Bahrain, the UAE and Egypt severed diplomatic ties with Qatar, launching an economic blockade by land, air and sea. The self-proclaimed 'Anti-Terror Quartet' offered maximalist demands: thirteen 'conditions' recalling Austria-Hungary's 1914 ultimatum to Serbia. They may even have intended military action. Well into its second year, the standoff in the Gulf has no realistic end

in sight. With the Bahraini and Emirati criminalisation of expressing support for Qatar, and the Saudi labelling of detainees as 'traitors' for their alleged Qatari links, bitterness has been stoked between deeply interconnected peoples. The adviser to the Saudi crown prince advocating a moat to physically separate Qatar from the Arabian Peninsula illustrates the ongoing intensity--and irrationality--of the crisis. Most reporting and analysis of these developments has focused on questions of regional geopolitics, and framed the standoff in terms of its impact on (largely) Western interests. Lost in this thicket of commentary is consideration of how the Qatari leadership and population have responded to the blockade. As the 2022 FIFA World Cup draws closer, the ongoing Qatar crisis becomes increasingly important to understand. Ulrichsen offers an authoritative study of this international standoff, from both sides.

*Assessing Fitness for Military Enlistment -
National Research Council 2006-02-27*

The U.S. Department of Defense (DoD) faces short-term and long-term challenges in selecting and recruiting an enlisted force to meet personnel requirements associated with diverse and changing missions. The DoD has established standards for aptitudes/abilities, medical conditions, and physical fitness to be used in selecting recruits who are most likely to succeed in their jobs and complete the first term of service (generally 36 months). In 1999, the Committee on the Youth Population and Military Recruitment was established by the National Research Council (NRC) in response to a request from the DoD. One focus of the committee's work was to examine trends in the youth population relative to the needs of the military and the standards used to screen applicants to meet these needs. When the committee began its work in 1999, the Army, the Navy, and the Air Force had recently experienced recruiting

shortfalls. By the early 2000s, all the Services were meeting their goals; however, in the first half of calendar year 2005, both the Army and the Marine Corps experienced recruiting difficulties and, in some months, shortfalls. When recruiting goals are not being met, scientific guidance is needed to inform policy decisions regarding the advisability of lowering standards and the impact of any change on training time and cost, job performance, attrition, and the health of the force. *Assessing Fitness for Military Enlistment* examines the current physical, medical, and mental health standards for military enlistment in light of (1) trends in the physical condition of the youth population; (2) medical advances for treating certain conditions, as well as knowledge of the typical course of chronic conditions as young people reach adulthood; (3) the role of basic training in physical conditioning; (4) the physical demands and working conditions of various jobs in today's military services; and (5) the measures

that are used by the Services to characterize an individual's physical condition. The focus is on the enlistment of 18- to 24-year-olds and their first term of service.

Global Trends 2030 - Office of the Director of National Intelligence Council 2017-03-11

This publication covers global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included

in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.

Political Handbook of the World 2016-2017 -

Tom Lansford 2017-03-31

Published since 1928, the Political Handbook of the World provides timely, thorough, and accurate political information with more in-depth coverage of current political controversies and political parties than any other reference guide. The updated 2016–2017 Edition continues this legacy as the most authoritative source for finding complete facts and analysis on each country’s governmental and political makeup. Political science and international relations scholars have revised this edition, and made understanding complex foreign affairs and political situations easy and accessible. With more than 200 entries on countries and territories throughout the world, housed in one place, these volumes are renowned for their extensive coverage of all major and minor political parties and groups in each political system. They also provide names of key ambassadors and international memberships of each country, plus detailed profiles of more than

30 intergovernmental organizations and United Nations agencies. This comprehensive update will include coverage of current events, issues, crises, and controversies from the course of the last two years, including: The closely-watched U.S. presidential election The effect of the Brexit referendum and installment of a new British prime minister The extensive investigation and subsequent impeachment of Brazil's president The far-reaching impact of the "Panama Papers" scandal Changes in U.S.-Cuba diplomatic relations and the reopening of their embassies The unconstitutional declaration of Gambia as an Islamic State Sentiments about the migrant and refugee crisis across Europe and the influence on policy Also, the new "For Further Reference" feature included for every country entry directs readers to additional resources to continue their research.

We Kill Because We Can - Laurie Calhoun 2015-09-15

Welcome to the Drone Age. Where self-defense has become naked aggression. Where courage has become cowardice. Where black ops have become standard operating procedure. In this remarkable and often shocking book, Laurie

Calhoun dissects the moral, psychological, and cultural impact of remote-control killing in the twenty-first century. Can a drone operator conducting a targeted killing be likened to a mafia hitman? What difference, if any, is there between the Trayvon Martin case and the drone killing of a teen in Yemen? We Kill Because We Can takes a scalpel to the dark heart of Western foreign policy in order to answer these and many other troubling questions.

The Report: Qatar 2015 - Oxford Business Group 2015-04-22

Qatar's sizable oil and natural gas reserves have underpinned its rapid economic growth over the past two decades. Home to the world's largest non-associated gas field, the country is the world's fourth-largest producer of dry natural gas and the largest producer of liquefied natural gas, with hydrocarbons revenues forming the bulk of national income as a result. Although the drop in global energy prices has impacted export revenues, rigorous economic diversification

drives in recent years have paid dividends, and in 2015 non-hydrocarbons growth reached 7.7%, compared to a 0.1% contraction for hydrocarbons growth during the same period. The country's financial sector has continued to evolve; Islamic banking in particular has witnessed significant progress. Meanwhile, as the country gears up to host several important sporting events in the coming years, most notably the 2022 FIFA World Cup, numerous big-ticket infrastructure builds continue to expand the construction sector.

This handbook is a practical aid to legislative drafting that brings together, for the first time, model texts of provisions covering all aspects of nuclear law in a consolidated form. Organised

along the same lines as the Handbook on Nuclear Law, published by the IAEA in 2003, and containing updated material on new legal developments, this publication represents an important companion resource for the development of new or revised nuclear legislation, as well as for instruction in the fundamentals of nuclear law. It will be particularly useful for those Member States embarking on new or expanding existing nuclear programmes.
