Western Linguistics - Peter Seuren 1998-04-22

This book provides a vital student resource - a single-volume critical survey of the complete history of Western theoretical linguistics (grammar and semantics, including logic) from Plato till today. The volume concentrates on those issues that are of central concern to present-day theoretical linguistics, but also draws attention to episodes and issues that have unjustifiably slid into oblivion, such as the 18th century French grammarians or the great subject-predicate debate between 1850 and 1930. An effort has also been made to interpret events and developments in linguistic theory in terms of the more general cultural and economic movements of the periods concerned. It contains many expository and exegetic quotations, together with critiques of theoretical positions and, sometimes, of academic behavior. The book can serve as a basic text for a course on the history of linguistics, and as a collateral text in various courses on the theory of grammar and semantics.

The Relation of Writing to Spoken Language - Martin Neef 2002-01-01

This volume grew out of the workshop Writing Language, held at the Max Planck Institute, Nijmegen. The papers represent several lines of research into the intricate relation between writing and spoken language: Theoretical and computational linguists discuss the models that explain why orthographies are the way they are and the constraints that hold between writing and speaking a language; researchers in special education deal with the question of how certain aspects of orthography can be learned; and psycholinguists discuss aspects of language processing affected by variation in orthographies.

In this exhilarating and often hilarious book, David Crystal examines why we devote so much time and energy to language games, how professionals make a career of them, and how young children instinctively take to them. Crystal makes a simple argument-that since playing with language is so natural, a natural way to learn language is to play with it-while he discusses puns, crosswords, lipograms, comic alphabets, rhymes, funny voices taken from dialect and popular culture, limericks, anagrams, scat singing, and much more.

Interthinking: Putting Talk to Work - Karen Littleton 2013-08-15

Through using spoken language, people are able to think creatively and productively together. This ability to 'interthink' is an important product of our evolutionary history that is just as important for our survival today. Many kinds of work activity depend on the success of groups or teams finding joint solutions to problems. Creative achievement is rarely the product of solitary endeavour, but of people working within a collective enterprise. Written in an accessible and jargon-free style, *Interthinking: putting talk to work* explores the growing body of work on how people think creatively and productively together. Challenging purely individualistic accounts of human evolution and cognition, its internationally acclaimed authors provide analyses of real-life examples of collective thinking in everyday settings including workplaces, schools, rehearsal spaces and online environments. The authors use socio-cultural psychology to explain the processes involved in interthinking, to explore its creative power, but also to understand why collective thinking isn't always productive or successful. With this knowledge we can maximise the constructive benefits of our ability to interthink, and understand the best ways in which we can help young people to develop, nurture and value that capability. This book will be of great interest to academic researchers, postgraduates and undergraduates on Education and Psychology courses and to practicing teachers. It will also appeal to anyone with an interest in language, creativity and the role of psychology

in everyday life.

Positioning the Brand - Rik Riezebos 2012-03-15

Positioning is hot. Not only in the realm of consumer goods manufacturers, but also for other companies, institutions, governments and even individual persons. An explosion of good quality products on the market and targeted media and advertising campaigns has led to an increasing interest from organizations as to how to strategically position their brand. Up to now, only a few books on positioning were published. *Positioning the Brand* picks up the gauntlet with an approach based on two fundamental choices: Firstly, the book was written from the perspective of the brand manager, and has therefore been shaped as a practical roadmap. Secondly, this book advocates a new stance on positioning, teaching the reader to look from the inside-out, instead of adopting the usual outside-in methodology. This inside-out approach departs from an analysis of the corporate identity, enabling better fulfilment of external positioning, and ensuring internal support. This book is intended for (future) managers, marketing professionals and communication professionals responsible for the commercial success and reputation of a brand. The contents have a practical set-up, reinforced by engaging examples, and enable the reader to individually complete a positioning process.

Foundations of Language - Ray Jackendoff 2002-01-24

How does human language work? How do we put ideas into words that others can understand? Can linguistics shed light on the way the brain operates? *Foundations of Language* puts linguistics back at the centre of the search to understand human consciousness. Ray Jackendoff begins by surveying the developments in linguistics over the years since Noam Chomsky's *Aspects of the Theory of Syntax*. He goes on to propose a radical re-conception of how the brain processes language. This opens up vivid new perspectives on every major aspect of language and communication, including grammar, vocabulary, learning, the origins of human language, and how language relates to the real world.

Foundations of Language makes important connections with other disciplines which have been isolated from linguistics for many years. It sets a new agenda for close cooperation between the study of language, mind, the brain, behaviour, and evolution.

Language and Ideology in Children's Fiction - John Stephens 1992

When children read fiction they are exposed to the beliefs which inform and structure their society. The books encourage child readers to internalise particular ways of seeing the world and help shape their development as individuals. Although this process forms a key part of their education, it remains largely invisible. As well as a story, fictions impart a significance to readers - often without revealing its presence or ground - and therefore have considerable potential to socialize their audience. John Stephens analyses this process and shows how fictions can work to constrain or liberate audience responses. He explores picture books as well as historical, realistic and fantastic fictions to show how both a character within the narrative and the implied reader are positioned within ideology. The author considers areas of ideology not previously examined and offers new perspectives on realism and fantasy. The book will be of interest to linguists and teachers as well as to the general reader.

Critical Readings: Moral Panics And The Media - Critcher, Chas 2006-03-01

First coined by Stanley Cohen in 1972, 'moral panic' is a key term in media studies, used to refer to sudden eruptions of indignant concern about social issues. An occurrence of moral panic is characterised by stylized and stereotypical representation by the mass media, and a tendency for those in power to claim the moral high ground and pronounce judgement. In this important book, Chas Critcher brings together essential readings on moral panics, which he contextualises in the light of moral panic scholarship through an editor's introduction and concise section introductions. The first section discusses moral panic models, and includes contributions on the history and intellectual background of the concept. Differences in thinking between British and American moral panic scholarship are also examined. A second section features important case studies, including AIDS, Satanism, drugs, paedophilia and asylum seekers. This is followed by readings that look at themes such as the importance of language, rhetoric and discourse; the dynamics of media reporting and how it affects public opinion; and the idea of the 'risk society'. Finally, readings critique and debate the use and relevance of moral panic models. *Critical Readings: Moral Panics And The Media* is a valuable resource for students and researchers in media studies, criminology and sociology. Altheide, Nachman Ben-Yehuda, Joel Best, Theodore Chiricos, John Clarke, Stan Cohen, Chas Critcher, Mary deYoung, Julie Dickinson, Erich Goode, Johanna Habermeier, Stuart Hall, Sean P. The author considers the universal characteristics of morphology and how these are reflected in the workings of mind. The revised edition has been revised and updated throughout; it has a full glossary and a new chapter on the field's most notorious problem: the status of the word. 'The Grammar of Words by Geert Booij covers a broad range of topics from structural questions to psycholinguistic issues and problems of language change. This introduction to morphology is thorough and accessible and, like other works by this renowned author, especially strong at showing the significance of empirical facts for theoretical reasoning.' Multilingual Norms - Madalena Cruz-Ferreira 2010

Multilinguals are not multiple monolinguals. Yet multilingual assessment proceeds through monolingual norms, as if fair conclusions were possible in the absence of fair comparison. In addition, multilingualism concerns what people do with language, not what languages do to people. Yet research focus remains on multilinguals' languages, as if languages existed despite their users. This book redresses these paradoxes.

Multilingual scholars, teachers and speech-language clinicians from Europe, Asia, Australia and the US contribute the first studies dedicated to multilingual norms, those found in real-life multilingual development, assessment and use. Readership includes educators, clinicians, decision-makers and researchers interested in multilingualism.

The Jewish Messiah, which chronicles the evolution of one Xavier Radek from malcontent grandson of a former SS officer, to Jewish convert, to co-translator of Hitler's Mein Kampf into Yiddish, to Israeli politician and Israel's most unlikely prime minister, is his most outrageous work yet. Taking on the most well-guarded pieties and taboos of our age, The Jewish Messiah is both a great love story and a grotesque farce that forces a profound reckoning with the limits of human guilt, cruelty, and suffering. It is without question Arnon Grunberg's masterpiece.
