**A Century of Spells** - Carolyn Elliott 2020-03  
A smart, sexy guide to embracing the repressed, tabooed, and often unwanted aspects of ourselves so we can discover our inner power and finally live the life we deserve. "We always get exactly what we want; but often, though we may not be aware of it, what we most want is dark - very dark." Each of us has a dual nature: we are light (conscious) and dark (unconscious). The dark side of our personality - the "other," the shadow side - is made up of what we think is our primitive, primal, negative impulses - our "existential kink." Our existential kink also drives the dark or negative repeating patterns in our life: always choosing the abusive partner or boss, settling for less, thinking that we're undeserving, not worthy. But it also is the source of our greatest power. In *Existential Kink*, Carolyn Elliot, PhD, offers a truth-telling guide for bringing our shadow into the light. Inviting us to make conscious the unconscious, Elliot asks us to own the subconscious pleasure we get from the stuck, painful patterns of our existence.

Existential Kink provides practical advice and meditations so we truly see our shadow side's "guilty pleasures," love and accept them, and integrate them into our whole being. By doing so, Elliot shows, we bring to life the raw, hot, glorious power we all have to get what we really want in our lives.

**The Brain That Changes Itself** - Norman Doidge 2007-03-15

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more. An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

**Born a Crime** - Trevor Noah 2016-11-15

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together

to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother’s unconventional, unconditional love.

I was driven to find more ways to make money. I changed jobs, cities, countries, went back to school, read books. Money is there when I need it, in the amount that's needed, no matter what occurs (car repairs, unplanned trips, etc.). It's absolutely amazing!" —Suresh Thakoor, Texas "As a retired professor on a fixed and limited income, I always lived from a tight budget and felt compressed by it-especially at the end of the year. I don't use a budget anymore and have opened up new streams of income that were always closed to me in the past." —Howard Rovics, Connecticut "It opened a whole new dimension for me and shifted my perspective on life completely. I especially love how practical it is. The application is so simple, so effective . . . and fun!" —Doris Kahle, Hagen, Germany "I'd had a lot of success in the corporate arena, made a ridiculous amount of money and lost a ridiculous amount of money. **The Hungry Brain** - Stephan J. Guyenet, Ph.D. 2017-02-07

A Publishers Weekly Best Book of the Year From an obesity and neuroscience researcher with a knack for engaging, humorous storytelling, *The Hungry Brain* uses cutting-edge science to answer the questions: why do we overeat, and what can we do about it? No one wants to overeat. And certainly no one wants to overeat for years, become overweight, and end up with a high risk of diabetes or heart disease--yet two thirds of Americans do precisely that. Even though we know better, we often eat too much. Why does our behavior betray our own intentions to be lean and healthy? The problem, argues obesity and neuroscience researcher Stephan J. Guyenet, is not necessarily a lack of willpower or an incorrect understanding of what to eat. Rather, our appetites and food choices are led astray by ancient, instinctive brain circuits that play by the rules of a survival game that no longer exists. And these circuits don't care about how you look in a bathing suit next summer. To make the case, *The Hungry Brain* takes readers on an eye-opening journey through cutting-edge neuroscience that has never before been available to a general audience. *The Hungry Brain* delivers profound insights into why the brain undermines our weight goals and transforms these insights into practical guidelines for eating well and staying slim. Along the way, it explores how the human brain works, revealing how this mysterious organ makes us who we are.

**How to Be Idle** - Tom Hodgkinson 2013-07-30  
Yearning for a life of leisure? In 24 chapters representing each hour of a typical working day, this book will coax out the loafer in even the most diligent and schedule-obsessed worker. From the founding editor of the celebrated magazine about the freedom and fine art of doing nothing, *The Idler*, comes not simply a

book, but an antidote to our work-obsessed culture. In *How to Be Idle*, Hodgkinson presents his learned yet whimsical argument for a new, universal standard of living: being happy doing nothing. He covers a whole spectrum of issues affecting the modern idler—sleep, work, pleasure, relationships—bemoaning the cultural skepticism of idleness while reflecting on the writing of such famous apologists for it as Oscar Wilde, Robert Louis Stevenson, Dr. Johnson, and Nietzsche—all of whom have admitted to doing their very best work in bed. It's a well-known fact that Europeans spend fewer hours at work a week than Americans. So it's only befitting that one of them—the very clever, extremely engaging, and quite hilarious Tom Hodgkinson—should have the wittiest and most useful insights into the fun and nature of being idle. Following on the quirky, call-to-arms heels of the bestselling *Eat, Shoots and Leaves: The Zero Tolerance Approach to Punctuation* by Lynne Truss, *How to Be Idle* rallies us to an equally just and no less worthy cause: reclaiming our right to be idle.

[Strengthening Forensic Science in the United States](#) - National Research Council 2009-07-29  
Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

This book grew out of the author's Stanford University course on algorithmic game theory, and aims to give students and other newcomers a quick and accessible introduction to many of the most important concepts in the field.
