Carbon Finance - Sonia Labatt
2011-07-20

Praise for Carbon Finance "A timely, objective, and informative analysis of the financial opportunities and challenges presented by climate change, including a thorough description of adaptive measures and insurance products for

managing risk in a carbon constrained economy." —James R. Evans, M. Eng. P. Geo., Senior Manager, Environmental Risk Management, RBC Financial Group "Climate change will have enormous financial implications in the years to come. How businesses and investors respond to the risks and opportunities from this issue will have an enormous rippling effect in the global economy. Sonia Labatt and Rodney White's insights and thoughtful analysis should be

read by all who want to successfully navigate this global business issue."

—Andrea Moffat, Director, Corporate Programs, Ceres "In Carbon Finance, Labatt and White present a clear and accessible description of the climate change debate and the carbon market that is developing. Climate change is becoming an important factor for many financial sector participants. The authors illustrate how challenges and opportunities will arise within the carbon market for banking, insurance, and investment activities as well as for the regulated and energy sector of the economy." —Charles E. Kennedy, Director and Portfolio Manager, MacDougall, MacDougall & MacTier Inc. "Climate change is the greatest environmental challenge of our generation. Its impact on the energy sector has implications for productivity and competitiveness. At the same time, environmental risk has emerged as a major challenge for corporations in the age of full disclosure. Carbon Finance

explains how these disparate forces have spawned a range of financial products designed to help manage the inherent risk. It is necessary reading for corporate executives facing challenges that are unique in their business experience."

—Skip Willis, Managing Director Canadian Operations, ICF International "In this timely publication, Labatt and White succeed in communicating the workings of carbon markets, providing simple examples and invaluable context to the new and changing mechanisms that underpin our transformation to a carbon-constrained world. Carbon Finance will be the definitive guide to this field for years to come." —Susan McGeachie, Director, Innovest Strategic Value Advisors, Graduate Faculty Member, University of Toronto; and Jane Ambachtsheer, Principal, Mercer Investment Consulting, Graduate Faculty Member, University of Toronto
The Automotive Chassis - Giancarlo Genta 2019-12-24
This textbook draws on the

authors' experience gained by teaching courses for engineering students on e.g. vehicle mechanics, vehicle system design, and chassis design; and on their practical experience as engineering designers for vehicle and chassis components at a major automotive company. The book is primarily intended for students of automotive engineering, but also for all technicians and designers working in this field. Other enthusiastic engineers will also find it to be a useful technical guide. The present volume (The Automotive Chassis - Volume 1: Component Design) focuses on automotive chassis components, such as: • the structure, which is usually a ladder framework and supports all the remaining components of the vehicle; • the suspension for the mechanical linkage of the wheels; • the wheels and tires; • the steering system; • the brake system; and • the transmission system, used to apply engine torque to the driving wheels. This thoroughly revised and updated second

edition presents recent developments, particularly in brake, steering, suspension and transmission subsystems. Special emphasis is given to modern control systems and control strategies.

Driven to Distraction -

Jeremy Clarkson 2010

Brace yourself, Clarkson's back. And he'd like to tell you what he thinks about some of the most awe-inspiring, earth-shatteringly fast and jaw-droppingly gorgeous cars in the world (alongside a few irredeemable disasters ...). Or he would, if there weren't so many things competing for his attention first. So much to get off his chest. The world according to Clarkson is a perplexing place, filled with thorny subjects like: * The prospect of having Terry Wogan as president * Why you'll never see a woman driving a Lexus * The unforeseen consequences of inadequate birth control * Why everyone should spend a weekend with a digger Fearless, independent, surprising and laugh-out-loud funny, Driven to Distraction is

full-throttle Clarkson at his best; a unique look at the joys, absurdities and frustrations of modern life. With wheels.

Buckle up, get comfortable, and hold on tight. There's no one who writes about cars like Jeremy ...

Terrace VI - Sarah L Johnson 2021-07-07

Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters

bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you? Stories and art by: Mike Thorn (Darkest Hours, Shelter for the Damned) Robin van Eck (Rough) Eddie Generous (Camp Summit, What Lurks Beneath, Behemoth Rising) Julie Hiner (Final Track) Konn Lavery (Mental Damnation Series, Rutherford Manor Series) Cam Hayden (Futility, Red Flag) Sarah L. The Groomer - Jon Athan

2020-03-13

Andrew McCarthy grows concerned for his family after he catches a young man, Zachary Denton, photographing his daughter, Grace McCarthy, and other children at a park. To his dismay, Zachary talks his way out of trouble when he's confronted by the police. He hopes that's the end of it. Then he finds Zachary at a diner and then at a grocery store. He knows their encounters aren't coincidences. And just as Andrew prepares to defend his family, Grace vanishes. As the police search stalls and the leads dry up, Andrew decides to take matters into his own hands. He starts by searching for sex offenders in the area and researching enhanced interrogation techniques... He convinces himself he'll do anything to rescue his daughter, unaware of the pure evil he'll face in his journey. He's willing to hurt-to torture-anyone to save his family. Jon Athan, the author of Into the

Wolves' Den and The Abuse of Ashley Collins, delves into the underworld of internet predators in this disturbing horror novel. Are your children safe? WARNING: This book contains graphic content.

Grandad Mandela -

Ambassador Zindzi Mandela

2018-06-28

"...profoundly moving..." - Publishers Weekly
Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

The Automotive Body - L.

Morello 2011-03-04

"The Automotive Body" consists of two volumes. The first volume produces the needful cultural background on the body; it describes the body

and its components in use on most kinds of cars and industrial vehicles: the quantity of drawings that are presented allows the reader to familiarize with the design features and to understand functions, design motivations and fabrication feasibility, in view of the existing production processes. The second volume addresses the body system engineer and has the objective to lead him to the specification definition used to finalize detail design and production by the car manufacturer or the supply chain. The processing of these specifications, made by mathematical models of different complexity, starts always from the presentations of the needs of the customer using the vehicle and from the large number of rules imposed by laws and customs. The two volumes are completed by references, list of symbols adopted and subjects index. These two books about the vehicle body may be added to those about the chassis and are part of a series sponsored by ATA (the Italian automotive

engineers association) on the subject of automotive engineering; they follow the first book, published in 2005 in Italian only, about automotive transmission. They cover automotive engineering from every aspect and are the result of a five-year collaboration between the Polytechnical University of Turin and the University of Naples on automotive engineering.

Privatization in Malaysia - Jeff Tan
2007-10-02

In recent years, privatisation has fallen out of favour in many countries because the underlying political factors have not been well understood. This book examines Malaysia's privatisation programme, focusing on how political constraints resulted in the failure of four major privatisations: the national sewerage company (IWK), Kuala Lumpur Light Rail Transit (LRT), national airline (MAS), and national car company (Proton). It considers why developing countries such as Malaysia might want to embark on privatisation, the factors that lead to policy failure, and what is needed to make it work. It shows clearly

that political motives driving privatisation often dominate purely economic considerations, and thus it is necessary to analyse privatisation within the specific country context. It argues that failure in the Malaysian case was due to political considerations that compromised institutional design and regulatory enforcement, leading to problems associated with corruption. It concludes that privatisation does not necessarily improve incentives for efficiency or enhance the finance available for capital investment, and that successful privatisation depends on the state's institutional and political capacity to design and manage an appropriate set of subsidies. Overall, this book is a comprehensive examination of privatisation in Malaysia, providing important insights for understanding the political economy of this process in other developing countries. *Sustainable Energy--without the Hot Air* - David J. C. MacKay 2009

innovative study explores the role of the artists that roamed the Chinese countryside in support of Mao's communist revolution. DeMare traces the development of Mao's 'cultural army' from its genesis in Red Army propaganda teams to its full development as a largely civilian force composed of amateur and professional drama troupes in the early years of the People's Republic of China (PRC). Drawing from memoirs, artistic handbooks, and rare archival sources, Mao's Cultural Army uncovers the arduous and complex

process of creating revolutionary dramas that would appeal to China's all-important rural audiences. The Communists strived for a disciplined cultural army to promote party policies, but audiences often shunned modern and didactic shows, and instead clamoured for traditional works. DeMare illustrates how drama troupes, caught between the party and their audiences, did their best to resist the ever growing reach of the PRC state.
