**Guinea-Bissau** - Patrick Chabal 2016-06-30

Since 1998 Guinea-Bissau has suffered a series of coups which outside analysts have linked to its emergence as West Africa's first "narco-state". Yet what does this mean for the country and the nature of the state in postcolonial Africa? What links Guinea-Bissau's instability with questions of wider regional and global security? What would a stable government look like in Guinea-Bissau, and what are the conditions for its achievement? The book constitutes the first synthetic attempt to grasp the consequences of the crisis in Guinea-Bissau. It fills a void in scholarship and policy analysis with a synthesis of both what has happened in the country and the wider implications for postcolonial African nation-building. With the current crisis in Mali, and rising interest among geopolitical actors in the region's stability, the contributors offer timely reflections on the causes and consequences of instability in one of Africa's most fragile states. Together they demonstrate how the undermining of the ideological construction of post-colonial African states derives from the historical fragilities and geopolitical conflicts which are acted out there. This is also the last book that Patrick Chabal, a significant scholar in contemporary political theory related to Africa, worked on.

It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. The Road to Character - David Brooks 2015-04-14

#1 NEW YORK TIMES BESTSELLER • David Brooks challenges us to rebalance the scales between the focus on external success—"résumé virtues"—and our core principles. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE ECONOMIST With the wisdom, humor, curiosity, and sharp insights that have brought millions of readers to his New York Times column and his previous bestsellers, David Brooks has consistently illuminated our daily lives in surprising and original ways. In *The Social Animal*, he explored the neuroscience of human connection and how we can flourish together. Now, in *The Road to Character*, he focuses on the deeper values that should inform our lives. Looking to some of the world's greatest thinkers and inspiring leaders, Brooks explores how, through internal struggle and a sense of their own limitations, they have built a strong inner character. Labor activist Frances Perkins understood the need to suppress parts of herself so that she could be an instrument in a larger cause. Dwight Eisenhower organized his life not around impulsive self-expression but considered self-restraint. Dorothy Day, a devout Catholic convert and champion of the poor, learned as a young woman the vocabulary of simplicity and surrender. Civil rights pioneers A. Philip Randolph and Bayard Rustin learned reticence and the logic of self-discipline, the need to distrust oneself even while waging a noble crusade. Blending psychology, politics, spirituality, and confession, *The Road to Character* provides an opportunity for us to rethink our priorities, and strive to build rich inner lives marked by humility and moral depth. "Joy," David Brooks writes, "is a byproduct experienced by people who are aiming for something else. But it comes." Praise for *The Road to Character* "A hyper-readable, lucid, often richly detailed human

story.”—The New York Times Book Review “This profound and eloquent book is written with moral urgency and philosophical elegance.”—Andrew Solomon, author of *Far from the Tree* and *The Noonday Demon* “A powerful, haunting book that works its way beneath your skin.”—The Guardian “Original and eye-opening . . . Brooks is a normative version of Malcolm Gladwell, culling from a wide array of scientists and thinkers to weave an idea bigger than the sum of its parts.”—USA Today

**Unexpected Joy at Dawn** - Alex Agyei-Agyiri 2003

Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country'. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of 'alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - 'home'. The novel thus

touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST-UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. **Vocationalisation of Secondary Education Revisited** - Jon Lauglo 2006-03-30

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) **Connecting Lives and Learning** - Brenton Prosser 2010

CONNECTING LIVES AND LEARNING is a project dedicated to connecting learning to student lives, connecting teachers with the latest middle years research, and better connecting primary and secondary schools to keep students at school longer. Based in Adelaide's lower socio-economic northern urban fringe, the project helps teachers use students' everyday experience and expertise to develop new ways of teaching and learning that involve students in intellectually challenging tasks. This book tells the stories of real teachers, in real classrooms, making real attempts for change, and not always succeeding. It is a book about teachers making a difference in difficult times and tough places. But most importantly, this book reaffirms that being an educator is inherently about adopting socially just practices, building community capacity and contributing to a more socially sustainable world.

**Faceless** - Amma Darko 2003

Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofu. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.

**Public Examinations Examined** - Thomas Kellaghan 2019-11-19

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as

"the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that *Public Examinations Examined*, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation
