Accounting for Managers - Paul M. Collier
2003-09-12

Accounting for Managers explains how
accounting information is used by non-financial
managers. The book emphasises the
interpretation, rather than the construction, of

accounting information and encourages a
critical, rather than unthinking acceptance, of
the underlying assumptions behind accounting.
It links theory with practical examples and case
studies drawn from real life business situations
in service, retail and manufacturing industries.

Managerial Accounting + Wileyplus Access Card
- JERRY J. WEYGANDT 2017

Management Accounting - Chris Hunt 2009
Organisations today are operating in an ever changing and more risky external business environment. To survive and grow in this environment it is now more important than ever that the information needs o the organisation are shaped by its goals and objectives and driven by its strategy choices. These strategy choices determine the processes and activities necessary to achieve the organisational objectives and goals. The resulting organisational outcomes contribute to the generation of owner wealth and increased organisational value and, in doing so, recognise the value adding potential of significant organisational relationships such as those with suppliers and customers. From a management accountant's perspective, these strategy choices define the design, function and operation of the organisation's management

control systems and its underpinning performance management system. The focus of this book is on accounting for an organisation's external business environment and the associated risk implications for decision making and performance management. It is about accounting for operating strategies, processes and activities and the incorporation of risk into these strategic decisions and the management of performance. The tools, techniques and frameworks available to the management accountant are drawn from those used in traditional and contemporary management accounting, as well as those developed through a strategy-based value chain lens and a discussion on how strategy-based accounting might be achieved.
