*They Call Me Güero* - David Bowles 2021-08-24

An award-winning novel in verse about a boy who navigates the start of seventh grade and life

growing up on the border the only way that feels right—through poetry. They call him Güero because of his red hair, pale skin, and freckles. Sometimes people only go off of what they see. Like the Mexican boxer Canelo Álvarez, twelve-year-old Güero is puro mexicano. He feels at home on both sides of the river, speaking Spanish or English. Güero is also a reader, gamer, and musician who runs with a squad of misfits called Los Bobbys. Together, they joke around and talk about their expanding world, which now includes girls. (Don't cross Joanna—she's tough as nails.) Güero faces the start of seventh grade with heart and smarts, his family's traditions, and his trusty accordion. And when life gets tough for this Mexican American border kid, he knows what to do: He writes poetry. Honoring multiple poetic traditions, *They Call Me Güero* is a classic in the making and the recipient of a Pura Belpré Honor, a Tomás Rivera Mexican American Children's Book Award, a Claudia Lewis Award for Excellence in

Poetry, and a Walter Dean Myers Honor.

**Which Way?** - Lidia Stanton 2017-07-07

For page samples, follow the link:

<https://books.lidiastanton.com/whichway> This colourful and highly engaging resource is written for children as young as 4-5 years old but also those in Key Stage 2 of primary school (up to 9 years old) who continue to feel confused by letter and digit shapes. The latter group might become so discouraged that they avoid writing, or write very little, despite having great imaginations. They start doubting their ability to simply 'know' the correct way when writing b/d,

p/q, p/g, 9/g, 6/9, s/z, 5/S, S/3, etc. Most teachers and parents are very good at playing down the reversals and encouraging the child to have another go. They say, "It's fine, it's still good writing. I love what you've written here." Yet, after so many attempts and after so many teacher corrections on the page, the child begins to think, "This writing game might not be for me after all". Those with dyslexia will have additional phonological difficulties to manage alongside poor memory for graphic shapes. This workbook is for children who can trace well at speed, thus appear to have developed adequate motor memory in their fingers, yet struggle to remember 'which way' to write the letter or digit. It is very likely that they will be ready to integrate this type of linear visual-spatial information at a later time. For now, they have no real-life representation, or model, of a handful of graphic shapes in their brains, and this, in turn, can affect their confidence in writing independently. This resource offers

practical and long-term 'tricks' that will trigger the child's memory at the right moment. It adopts a complementary approach to traditional letter formation teaching to bridge the gap between children who are proficient graphic writers and those whose brains make different sense of graphic information. Many children with dyslexia and dysgraphia will particularly benefit from completing the workbook. How to use the resource The child doesn't need to work through the entire book. Choose sections that are relevant to their needs. Younger children (aged 4-6) will almost certainly need assistance when working with the resource, although older ones will no doubt choose to work independently, showing their practised strategies and completed activities to teachers and parents. It is recommended that section 7 (Use your whole body) is attempted with the help of an older helper or adult. There are more than one method to help distinguish between b/d/p and s/z in this workbook. Introduce the

child to only one method at a time, evaluate the child's progress, and decide whether there is a need to move on to the next one. Some children are more practical than visual - the 'Use your hands' strategy might be sufficient for them. Other children might enjoy more visual strategies in sections 4, 5 and 6. In my experience, section 7 (Use your whole body) works well with children who need to 'experience' concepts in a multi-sensory manner. Pay attention to the child's initial response to a particular method. It will guide you along. You can mix and match strategies. Some children don't confuse b/d as much but struggle with p/9. Some activities can be completed independently of the section the child is currently working through. For example, Activity 7 can be attempted after completing the 'Use your hands' section. Flick through the book to decide which activities appear to be suitable to the child's current progress.

*Learning How to Learn* - Barbara Oakley, PhD

2018-08-07

A surprisingly simple way for students to master any subject--based on one of the world's most popular online courses and the bestselling book *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains:

- Why sometimes letting your mind wander is an important part of the learning process
- How to avoid "rut think" in order to think outside the box
- Why having a poor

memory can be a good thing

- The value of metaphors in developing understanding
- A simple, yet powerful, way to stop procrastinating

Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Standards-Based Connections Reading for grade  
2 offers focused skill practice in reading  
comprehension. A skill assessment will point out  
students' learning gaps. This allows teachers to  
choose appropriate student pages for  
individualized remediation. The student pages  
emphasize five important reading  
comprehension skills: summarizing, inferring,  
story elements, comparing and contrasting, and  
cause and effect. The book includes high-interest

fiction and nonfiction, with texts about moving  
day, volcanoes, Laura Ingalls Wilder, planets,  
poetry, and more. --Each 96-page book in the  
Standards-Based Connections Reading series  
includes a skill assessment, an assessment  
analysis, targeted practice pages, and an answer  
key, making this series an ideal resource for  
differentiation and remediation. The skill  
assessments and assessment analyses help  
teachers determine individualized instructional  
needs. And, the focused, comprehensive practice  
pages and self-assessments guide students to
