## **Promoting the Health of Older Adults** - Irving Rootman 2021-07-28

Taking a unique look at health promotion and aging in Canada, this edited collection uses the action framework in the Ottawa Charter for Health Promotion to explore the factors and issues related to the health of older adults. The book is organized around the five action areas for health promotion: building healthy public policy, creating supportive environments, strengthening community action, developing personal skills, and reorienting health and social services. Adhering to the holistic approach that health in older age involves physical, mental, emotional, and social well-being, this comprehensive collection covers a wide range of interventions that are designed to benefit and protect the aging population's health, quality of life, rights, and dignity, while building intergenerational solidarity and collaboration. Readers will learn about aging from a health promotion perspective; the context, environment, and issues related to older adults in Canada; as well as best practices in health promotion, public health, and the care of older adults. Promoting the Health of Older Adults is an invaluable resource for both graduate and undergraduate students in gerontology, health promotion, nursing, social work, and related fields. FEATURES - Considers the implications of the COVID-19 pandemic for health promotion and aging - Provides an up-to-date profile of older adults in Canada and current/future trends in aging and health, including the use of new technologies and policies and practices in health promotion, public health, and other disciplines - Includes a wealth of pedagogical features, such as learning objectives, critical thinking questions, a glossary, and online supplementary materials

## **Community-Based Research on LGBT Aging** - Brian De Vries 2017-10-02

The study of LGBT aging is in its infancy. In the absence of federal data on this often hidden population, community groups and organizations from across the country have taken it upon themselves to understand and assess the needs of this first cohort to reach later life in a time of LGBT public consciousness. Eight papers are included in this compilation: three from the east coast (Boston, New York, and Washington, DC), four from the Midwest (Chicago, Bowling Green and surrounding areas, St. Louis, and the twin cities of Minneapolis/St. Paul), and one from the west coast (Palm Springs area). Together, these reports provide a community-based and regionally nuanced image of the strengths of, and the challenges faced by, older LGBT persons—local snapshots that together form a partial tapestry of LGBT aging in the U.S. They also serve as a source of lessons learned in the field—efforts that may be seen to parallel those undertaken by LGBT communities, then forming, during the 1980s and 1990s to address the growing health crisis of HIV/AIDS, a time when formal responses were slow and treatments still being developed. As such, the voice of the communities represented herein—the voices of these older adults—is clear, strong and apparent. This book was originally published as a special issue of the Journal of Homosexuality.

## **Handbook of Geriatric Care Management** - Cathy Jo Cress 2006-09

This cutting-edge book on geriatric care management is designed to meet a growing area that spans across the continuum of health care, and is the essential reference for the geriatric care management profession. It gives health care delivery systems, private and public health care practitioners, business people, and schools of nursing, social work, and related health care fields the definitive book on geriatric care management. Handbook of Geriatric Care Management defines the work of the geriatric care manager. It offers an overview of what geriatric care management is, defines duties and procedures, and specifies the organizations that use a geriatric care manager. It provides guidelines for setting up a geriatric care management practice independently or as part of a larger health care delivery system or business, and

contains key elements for marketing the practice. Several case studies are included.

*A Resilience-Enhancing Stress Model* - Roberta Greene 2022-08-23

Social work practice has evolved to meet the needs of the time, the problems that are present, and the knowledge and skills available. Given the more recent rapidly changing stressful environments, political, economic, demographic, sociocultural, and ideological change has affected how practice is defined. Now it is even more essential for there to be innovative theoretical concepts and intervention strategies to support current practice. This textbook addresses today's context of social work practice that needs to deal with the complexity of personal and social relationships, the continuing historical flux of the times, and the constant anxiety or "threats and pulls" of daily life. The text is based on the idea that social work practice requires a research and theoretical base that allows practitioners to build on a client's ability to persist in the face of life's challenges and to proceed positively with life events. The Resilience-Enhancing Stress Model (RESM) is an outgrowth of the profession's interest in strength-based person-environment approaches — grounded in generalist social work practice that offers a range of intervention practice methods with diverse individuals, families, groups, organizations, and communities. RESM was developed to provide the skill set for working with clients and constituencies across the individual-family-community configuration during times of distress. It also can be a welcomed addition to social work practice with people undertaking life transitions and overcoming disruption to individual, family, and community function. Topics explored include: An Evolving Resilience-Enhancing Stress Model Interviewing to Promote Resilience Among Marginalized Populations Co-creating a Grand Narrative: The Intersection of Individual, Family, and Community Practice Connecting Communal Living, Ecology, and Resilience A Resilience-Enhancing Stress Model: A Social Work Multisystemic Practice Approach is a timely text for human behavior and practice methods at the generalist or advanced generalist levels in social work. It can also be used at the doctoral level of social work education depending on the professor's attention to the depth of theoretical concepts. Practitioners in the field may find the contents useful to their professional enrichment.

**Living Through Loss** - Nancy R. Hooyman 2021-08-31

Living Through Loss provides a foundational identification of the many ways in which people experience loss over the life course, from childhood to old age. It examines the interventions most effective at each phase of life, combining theory, sound clinical practice, and empirical research with insights emerging from powerful accounts of personal experience. The authors emphasize that loss and grief are universal yet highly individualized. Loss comes in many forms and can include not only a loved one's death but also divorce, adoption, living with chronic illness, caregiving, retirement and relocation, or being abused, assaulted, or otherwise traumatized. They approach the topic from the perspective of the resilience model, which acknowledges people's capacity to find meaning in their losses and integrate grief into their lives. The book explores the varying roles of age, race, culture, sexual orientation, gender, and spirituality in responses to loss. Presenting a variety of models, approaches, and resources, Living Through Loss offers invaluable lessons that can be applied in any practice setting by a wide range of human service and health care professionals. This second edition features new and expanded content on diversity and trauma, including discussions of gun violence, police brutality, suicide, and an added focus on systemic racism.

*Meeting Health Information Needs Outside Of Healthcare* - Catherine Arnett Smith 2015-08-04

Gerontology in the Era of the Third Age - Dawn C. Carr, PhD 2011-02-22

The "third age" is described as the period in the life course that occurs after retirement but prior to the onset of disability, revealing a period in which individuals have the capacity to remain actively engaged. This book serves as a comprehensive discussion about how the emergence of the third age has changed the way we think about and examine traditional frameworks regarding aging issues and the life course. It introduces the discussion of the unique challenges and opportunities that older adults face while moving through this early phase of later life, proposing new frameworks, concepts, and methods to re-examine later life in the context of the era of the third age. This book proposes new ways of thinking about how we conceptualize the life course, think about the role of the welfare state in the lives of older people, negotiate social roles in later life, make meaning of our lives as we age, and cultivate relationships with others during later life. It brings together theoretical concepts and frameworks, methodological advances, and emerging themes and controversies that are redefining gerontology in the era of the Third Age. Highlighting important issues that warrant further exploration and discussion, this book advances our understanding of the Third Age and focuses attention on critical issues that should be addressed in future Third Age research and scholarly development. Key Features: Includes up-to-date description and analysis of the third age as a concept, life phase, and social status Addresses multiple perspectives to illustrate the impact of the third age on the way we examine later life Uses disciplinary perspectives such as social policy, demography, gerontology, sociology, social work, anthropology, and social psychology Examines mechanisms that stratify the older population in the context of the third age

**Family Ties and Aging** - Ingrid Arnet Connidis 2001-06-19

"At last: a book that melds research on family ties in later life inclusively. Connidis' book is not simply a research compendium but a theoretical synthesis of value to both scholars and students. Connidis' clear writing style makes it an excellent choice for students... I recommend this book both to teachers and

researchers in the areas of family and aging." -- JOURNAL OF MARRIAGE AND THE FAMILY Presenting a broad examination of the issues surrounding family ties and aging, this advanced textbook provides an integrated and thorough representation of current research in the field. Whereas books on families and aging have traditionally focused on ties to a spouse and to children and grandchildren, Connidis's coverage is more extensive and more reflective of contemporary society. She includes groups and relationships that have typically been neglected, such as single, divorced, and childless older people and their family relationships, as well as sibling relationships among the elderly, live-in partnerships not formalized by marriage, and the family ties forged by gays and lesbians over their life course. *Family Ties and Aging* weaves the vast range of information we now have about the many facets of family relationships and aging into a critical, comprehensive, and integrated whole.

**Geriatric Rehabilitation** - Jennifer Bottomley 2010

Are you looking for concise, practical answers to questions that are often left unanswered by traditional pancreatic disease references? Are you seeking brief, evidence-based advice for complicated cases or complications? *Curbside Consultation of the Pancreas: 49 Clinical Questions* provides quick and direct answers to the thorny questions commonly posed during a curbside consultation between colleagues. Dr. Scott Tenner has designed this unique reference, which offers expert advice, preferences, and opinions on tough clinical questions commonly associated with pancreatic disease. The unique Q&A format provides quick access to current information related to pancreatic disease with the simplicity of a conversation between two colleagues. Numerous images, diagrams, and references are included to enhance the text and to illustrate the treatment of pancreatic disease patients. *Curbside Consultation of the Pancreas: 49 Clinical Questions* provides information basic enough for residents while also incorporating expert advice that even high-volume clinicians will appreciate. Gastroenterologists, fellows and residents in training, surgical attendings, and surgical residents will benefit from the user-friendly and casual format and the expert advice contained within. Some of the questions that are answered: How do I determine the amount of fluids to provide to patients with acute pancreatitis? When should antibiotics be used in acute pancreatitis? How do I determine the timing of re-feeding patients with acute pancreatitis? What is the best way to treat pain in patients with chronic pancreatitis? How should I define the best approach to a pseudocyst?

**Aging** - Harry R. Moody 2017-01-12

Presenting current research in an innovative text-reader format, *Aging: Concepts and Controversies*, Ninth Edition encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

**Researching Ageing** - Maria Łuszczynska 2020-06-07

This book explores the diversity of methodological approaches to researching ageing, considering which methodological paradigm best captures the phenomenon. Interdisciplinary in scope, it brings together research from scholars from Austria, Canada, France, Hong Kong, Israel, Poland, UK and USA to uncover the conditions under which qualitative and quantitative approaches to research on ageing can best be reconciled and rendered complementary. Presenting international reflection on methods for studying old age from a variety of research backgrounds, *Researching Ageing* showcases the latest research in the field and will appeal to scholars across the social sciences, including sociology, demography, psychology, economics and geography, with interests in gerontology, ageing and later life.

**Older Women: Current and Future Challenges of Professionals with an Aging Population** - Teresa Kilbane 2016-10-14

*Older Women: Current and Future Challenges of Professionals With An Aging Population* is about older women and the unique challenges they face now and in coming decades. Elderly women face problems that require response from multiple service providers in the social welfare, health care and legal sectors. Due to the complexity of the various issues and the multi-systemic responses required to address these problems among diverse groups, an interdisciplinary perspective in a multicultural context needs to be examined.

This book is an attempt to explain the multidisciplinary facets of social work with elderly women. Readers are also introduced to the ethical issues and challenges caused by economic disparities and are also provided with guidelines on potential responses and intervention strategies to such difficulties. Readers are also introduced to the concept of cultural competence in terms of working with aged women. The integration of theory, research and practice in this book makes it a valuable resource for academicians and working professionals who are or will be in frequent contact with older adults.

*Morality and Spirituality in the Contemporary World* - Chandana Chakrabarti 2012-12-07

The contemporary world faces a number of problems that are both deep-seated and interrelated, since they arise from the very nature of technological society. The environment upon which all life depends is seriously threatened by climate change, rising sea levels, pollution, overpopulation, resource depletion and increased risks of droughts, forest fires, floods and other extreme weather events. Environmental degradation is intimately connected to the consumer lifestyle of developed countries. This lifestyle promotes materialism, entertainment and hedonistic superficiality that ultimately lead to moral corruption. Our insensitive and destructive attitude towards nature is not isolated, or unrelated to other problems of social justice. The environmental crisis reflects human structures of domination that include political and economic exploitation, racism, sexism and ageism. These challenges are immense, and solutions to them will require a renewed dedication to moral reflection and a commitment to social justice. This book discusses the challenges in connection with topics such as human rights, economic exploitation and inequality, environmental protection, globalization, global food justice, technology, gender equality and ageism. It provides a plurality of moral and spiritual perspectives including Hinduism, Buddhism, Daoism and Christianity that offer guidance in finding responses that are both possible and reasonable.
