Medicine: Preserving the Passion - Phil R. Manning 2013-03-14

In Medicine: Preserving the Passion, Phil R. Manning, a pioneer and recognized authority in continuing medical education, and Lois DeBakey, a passionate advocate of critical reasoning and leading scholar in scientific communication, endeavor to shift the focus in lifelong learning from group exercises in a lecture hall to self-directed, practice-related activities. Although most experts have applauded this new concept, few publications have addressed methods for implementation. The Manning-DeBakey book describes such methods as devised by outstanding clinicians and academicians to obtain educational benefit from their clinical experience. Some techniques inspired by quality assurance, for example, these master clinicians have used successfully to improve their knowledge, skills, and patient care. This book not only identifies the primary concerns in continuing medical education, but also offers sound recommendations and effective

solutions and suggests future directions and approaches. The authors have analyzed the continuing educational practices of physicians in a wide range of environments, from small communities to the most acclaimed medical centers, and have extracted additional advice from the writings of past authorities like Osler. The resulting concepts will undoubtedly attract wide public attention. Office practice audit, self-directed learning, case indexing, patient education, computer-assisted education, and collegial networks, as well as regular reading, writing, and teaching, are among the successful methods described by physicians and surgeons who exemplify the highest standards of medical practice.

It is primarily for those people that Sheriff Dickson's book is intended. The book will be invaluable to busy legal practitioners and to health-care professionals.
