The Guru Granth Sahib - Pashaura Singh 2003-09-26

This book examines three closely related questions in the process of canon formation in the Sikh tradition: how the text of the Adi Granth came into being, the meaning of gurbani, and how the Adi Granth became the Guru Granth Sahib. The censure of scholarly research on the Adi Granth was closely related to the complex political situation of Punjab and brought the whole issue of

academic freedom into sharper focus. This book addresses some of these issues from an academic perspective. The Adi Granth, the sacred scripture of the Sikhs, means 'first religious book' (from the word 'adi' which means 'first' and 'granth' which means 'religious book'). Sikhs normally refer to the Adi Granth as the Guru Granth Sahib to indicate a confession of faith in the scripture as Guru. The contents of the Adi Granth are commonly known as bani (utterance) or gurbani (the utterance of the Guru). The transcendental origin (or ontological status) of the hymns of the Adi Granth is termed dhur ki bani (utterance from the beginning). This particular understanding of revelation is based upon the doctrine of the sabad, or divine word, defined by Guru Nanak and the succeeding Gurus. This book also explores the revelation of the bani and its verbal expression, devotional music in the Sikh tradition, the role of the scripture in Sikh ceremonies, and the hymns of

Guru Nanak and Guru Arjan.

The Story of My Life - Helen Keller 2021-07-20

When she was 19 months old, Helen Keller (1880-1968) suffered a severe illness that left her blind and deaf. Not long after, she also became mute. Her tenacious struggle to overcome these handicaps — with the help of her inspired and inspiring teacher, Anne Sullivan — is one of the great stories of human courage and dedication. *The Story of My Life*, first published in 1903, is Helen Keller's classic

autobiography detailing the first 22 years of her life, including the magical moment at a water pump when, recognizing the connection between the word "water" and the cold liquid flowing over her hand, she realized that objects had names. She had many experiences which were equally thrilling and noteworthy including her joy at eventually learning to speak so that by the time she was 16, she could speak well enough to attend preparatory school followed by her education at Radcliffe, from which she graduated cum laude, and of course, her extraordinary relationship with Miss Sullivan who had shown a remarkable gift and genius for communicating with her eager and quick-to-learn pupil. Keller also writes of her friendships with Oliver Wendell Holmes, Edward Everett Hale and other notables. Keller first began to write *The Story of My Life* in 1902, when she was still a student at Radcliffe College. The book is dedicated to inventor Alexander Graham

Bell, and the dedication reads, "To ALEXANDER GRAHAM BELL Who has taught the deaf to speak and enabled the listening ear to hear speech from the Atlantic to the Rockies, I dedicate this Story of My Life."

You Ask, I Tell - Hansa Wadkar
2014-04-01

The rise to stardom and tragic
fall of one of the heroines of
Indian film. Hansa Wadkar
(born Ratan Bhalchandra) was
one of Maharashtra's best
known stage and screen
personalities. By the time she
was married — to a much older
family friend and impresario
when she was just 15 — she
had already starred in nine or
ten movies and was becoming a
name in the film world.

Supporting her family on her
earnings, her brother sick with
malaria, and both parents
having taken to drink, life was
not easy for the young woman.
But Hansa was not only
beautiful and immensely
talented, she was tough, wilful,
capricious and headstrong. Her
autobiography, Sangtye Aika
published in 1970 and
translated into English here for
the first time, created a
sensation for its frankness and

boldness. It was later made into a film, Bhumika, by the legendary director Shyam Benegal and starred Smita Patil in the title role. Published by Zubaan.

The Wrestler's Body - Joseph S. Alter 1992-08-03

The Wrestler's Body tells the story of a way of life organized in terms of physical self-development. While Indian wrestlers are competitive athletes, they are also moral reformers whose conception of self and society is fundamentally somatic. Using the insights of anthropology, Joseph Alter writes an ethnography of the wrestler's physique that elucidates the somatic structure of the wrestler's identity and ideology. Young men in North India may choose to join an akhara, or gymnasium, where they subject themselves to a complex program of physical and moral fitness. Alter's first-hand description of each detail of the wrestler's regimen offers a unique perspective on South Asian culture and society. Wrestlers feel that moral

reform of Indian national character is essential and advocate their way of life as an ideology of national health. Everyone is called on to become a wrestler and build collective strength through self-discipline.

Principles of Electronics -

Colin David Simpson 1996

One of the most

comprehensive, clearly written books on electronic technology, Simpson's invaluable guide offers a concise and practical overview of the basic principles, theorems, circuit behavior and problem-solving procedures of this intriguing and fast-paced science.

Examines a broad spectrum of

topics, such as atomic structure, Kirchhoff's laws, energy, power, introductory circuit analysis techniques, Thevenin's theorem, the maximum power transfer theorem, electric circuit

analysis, magnetism, resonance semiconductor diodes, electron current flow, and much more.

Smoothly integrates the flow of material in a nonmathematical format without sacrificing depth of coverage or accuracy to help readers grasp more complex concepts and gain a more thorough understanding of the principles of electronics. Includes many practical applications, problems and

examples emphasizing troubleshooting, design, and safety to provide a solid foundation in the field of electronics. An ideal reference source for electronic engineering technicians and those involved in the electronic technology field.
