Fame, Fortune, and Ambition - Osho 2010-04-13

A provocative look at the pursuit of material success and influential power from one of the twentieth century's greatest spiritual teachers. "I want you to be rich in every possible way—material, psychological, spiritual. I want you to live the richest life that has ever been lived on the earth."—Osho *Fame, Fortune, and Ambition: What is the Real Meaning of Success?* examines the symptoms and psychology of preoccupations with money and celebrity. Where does greed come from? Do values like competitiveness and ambition have a place in bringing innovation and positive change? Why do celebrities and the wealthy seem to have so much influence in the world? Is it true that money can't buy happiness? These questions are tackled with a perspective that is thought-provoking, surprising—and particularly relevant to our troubled economic times. Osho challenges readers to examine and break free of the conditioned belief systems and prejudices that limit their capacity to enjoy life in all its richness. He has been described by the Sunday Times of London as one of the "1000 Makers of the 20th Century" and by Sunday Mid-Day (India) as one of the ten people—along with Gandhi, Nehru, and Buddha—who have changed the destiny of India. Since his death in 1990, the influence of his teachings continues to expand, reaching seekers of all ages in virtually every country of the world.

rectification, to bring faith in the client about the efficacy of astrology, to test the astrological techniques, to find out which method suits best for the given case, and to demonstrate his/her predictive abilities. Engaging with Literature of Commitment. Volume 2 - 2012-01-01

This collection ranges far and wide, as befits the personality and accomplishments of the dedicatee, Geoffrey V. Davis, German studies and exile literature scholar, postcolonialist (if there are 'specialties', then Australia, Canada, India, South Africa, Black Britain), journal and book series editor.... The volume opens with essays on cultural theory and

practice, proceeds to close analyses of 'settler colony' texts from Canada, India, Australia, and New Zealand (drama, fiction, and poetry) as well as Pacific drama and Canadian indigeneity, thence 'homeward' to the UK (black drama, Scottish fiction, the music of Morrissey) and to German themes (exile literature; fictions about Hitler). Because Geoff's commitment to literature has always been 'hands-on', the book closes with a selection of poems and experimental prose. Writers discussed include Carmen Aguirre, Hany Abu-Assad, Beryl Bainbridge, Albert Belz, Peter Bland, Peter Carey, Lynda Chanwai-Earle, Kamala Das, Robert Drewe, Éric Emmanuel-Schmitt, Toa Fraser, Stephen Fry, Dianna Fuemana, Mavis Gallant, Alasdair Gray, Xavier Herbert, Janette Turner Hospital, Elizabeth Jolley, Wendy Lill, Varanasi Nagalakshmi, Arundhati Roy, Daniel Sloate, Drew Hayden Taylor, Jane Urquhart, Roy Williams, and Arnold Zweig.

Entwined with both are the fundamental notions of logic and their use for representation and proof. Features: teaches finite math as a language for thinking, as much as knowledge and skills to be acquired; uses an intuitive approach with a focus on examples for all general concepts; brings out the interplay between the qualitative and the quantitative in all areas covered, particularly in the treatment of recursion and induction; balances carefully the abstract and concrete, principles and proofs, specific facts and general perspectives; includes highlight boxes that raise common queries and clear confusions; provides numerous exercises, with selected solutions.

This Brave New World - Anja Manuel 2017-03-21

"In the next decade and a half, China and India will become two of the world's indispensable powers--whether they rise peacefully or not. During that time, Asia will surpass the combined strength of North America and Europe in economic might, population size, and military spending. Both India and China will have vetoes over many international decisions, from climate change to global trade, human rights, and business standards. From her front row view of this colossal shift, first at the State Department and now as an advisor to American business leaders, Anja Manuel escorts the reader on an intimate tour of the corridors of power in Delhi and Beijing. Her encounters with political and business leaders reveal how each country's history and politics influences their conduct today. Through vibrant stories, she reveals how each country is working to surmount enormous challenges--from the crushing poverty of Indian slum dwellers and Chinese factory workers, to outrageous corruption scandals, rotting rivers, unbreathable air, and managing their citizens' discontent. We wring our hands about China, Manuel writes, while we underestimate India, which will be the most important country outside the West to shape China's rise. Manuel shows us that a different path is possible--we can bring China and India along as partners rather than alienating one or both, and thus extend our own leadership in the world"--
