It presents a data-driven public sector framework that can help countries or organisations assess the elements needed for using data to make better-informed decisions across public sectors.

Laws of Melaka - Yock Fang Liaw 1976

Experimental Methodology - Larry B. Christensen 1985

Known for its readability, *Experimental Methodology* is organized so that each chapter focuses on a specific step in the research process. The primary orientation of this text is toward providing instruction in the experimental approach, but an introduction to non-experimental approaches such as ex-post facto research, correlational research, and survey research is provided. Rather than dichotomizing psychological research into descriptive and experimental research, this edition takes the more current approach of using the quantitative and qualitative research dichotomy, presented in Chapter 2. Christensen also incorporates thorough coverage of research ethics. MARKET: For anyone interested in research methods in psychology and education.

Handbook of Work Stress - Julian Barling 2004-09-22

Questions about the causes or sources of work stress have been the subject of considerable research, as well as public fascination, for several decades. Earlier interest in this issue focused on the question of whether some jobs are simply more inherently stressful than others. Other questions that soon emerged asked whether some individuals were more prone to stress than others. The *Handbook of Work Stress* focuses primarily on identifying the different sources of work stress across

different contexts and individuals.

Order from Chaos - Gibson, Marion 2006-01-30

In the context of recent natural disasters and the increase of global terrorism, there is a need for a greater understanding of the psychosocial impact of such events on the individuals and communities involved. This understanding can also enhance the support offered to people who have to face trauma in their individual lives. Those who provide such a response need to develop their skills in this area of work. They too need to feel that they are supported in their work. This revised and expanded edition of a highly successful book consolidates the core elements of good practice while bringing theory and practice issues up to date. As with the first and second editions, this book can be used as a guide for best practice and as a resource for instant reference when staff are faced with responding to traumatic incidents. It also provides up-to-date case studies, drawing on the author's knowledge and experience and points the way for further, more specialised study. The book identifies core elements that are common to most traumatic events; discusses practical methods of intervention that are based on analysis of contemporary research and best practice in a multidisciplinary context; shows how the skills discussed can be transferred to individual clinical practice; addresses the needs of responders and the responsibility of organisations to provide a 'duty of care' for those who are exposed to trauma in their occupational roles and presents a modular programme of training, devised by the author, to prepare responders in the pre-crisis period. Order from chaos is essential reading for all those who are or may be

involved in supporting those who are experiencing the impact of trauma in their lives. It is also an invaluable resource for trainers in the field, and for social work and health and social care students and their teachers.

Understanding Attitudes to the European Community - Miles Hewstone 2011-04-14

This 1986 study presents an insightful perspective on public attitudes towards the European Community. It contains a review of the findings from public opinion surveys of the time on this issue, but goes beyond straightforward description to provide a real understanding of European attitudes. A variety of social-psychological theories are used to test a model of the structure underlying Community attitudes. The original data reported in the present study parallel the findings from much larger, representative and long-term surveys of public opinion. Thus Miles Hewstone is able to derive from his research a wide-ranging analysis of cross-national differences in attitudinal support, the Community's impact on its citizens, and the likely trends in attitude and voting behaviour. At a time when the entry of Spain and Portugal had further expanded the Community's membership, such issues were particularly timely and this clear and penetrating study especially welcome.

Rolls-Royce Silver Cloud - The Complete Story - James Taylor 2021-11-22
The Rolls-Royce company acquired Bentley Motors in 1931 and, although models continued to be produced with the Bentley name, they increasingly used many Rolls-Royce components. By the time the Silver Cloud and Bentley S were released in 1955, they were really differently badged versions of the same design. Yet the sporting tradition of the Bentley marque was upheld with the exotic Continental models that were derived from them. The Silver Cloud family represents a pinnacle for the Rolls-Royce company. The cars all had and still have a very special presence, and the standard saloons have an unsurpassed elegance and rightness of line. The special-bodied cars, meanwhile, are reminders of an age when the skill of the best coachbuilders was something deserving of universal admiration. With around 190 photographs, this book features: The story of the design and development of the Rolls-Royce Silver Cloud and Bentley S Type; A look at the production development of these cars between 1955 and 1965; An examination of the Bentley Continental models that were derived from Silver Cloud and S Type design; The history of the Phantom V and Phantom VI limousine chassis introduced in 1959 and destined to last until 1990; Full technical specifications, including paint and interior trim choices; Production figures and chassis codes and finally, a chapter on buying and owning one of these wonderful classic cars.

Tokkatsu: The Japanese Educational Model Of Holistic Education - Tsuneyoshi Ryoko 2019-09-16

Though there has been much discussion on the academic aspects of Japanese education abroad (e.g., high scores on international tests, lesson study), there has been little information on the non-academic aspects of Japanese schooling. This non-academic aspect is called Tokkatsu (tokubetsu katsudo). Unlike math and reading, Tokkatsu is not confined to a certain period, but extends throughout the school day and even after-school activities — such as school excursions. It includes classroom activities such as classroom discussions, morning and

afternoon meetings that take place daily, cleaning and serving lunch, school events such as sports day, school excursions, student councils, and club activities. Such activities occur every single day, throughout one's school years, from elementary school (actually, even kindergarten) to high school. They are, however, bound together by the common goals of the Tokkatsu framework. This book is the foremost attempt to address a gap in English literature on Tokkatsu.

Measuring the well-being of young people continues to be a challenge, even though its importance is widely recognised. The Commonwealth's youth flagship report, the Global Youth Development Index and Report, provides an evidence-based overview of the state of development for the nearly 1.8 billion young people between the ages of 15 and 30 in the world. The Youth Development Index (YDI) is a composite index of 18 indicators that collectively measure progress on youth development in 183 countries, including 49 of the 53 Commonwealth countries. The YDI has five domains, measuring levels of education, health and well-being, employment and opportunity, political participation and civic participation among young people.

Memoir of the Life and Public Services of Sir Thomas Stamford Raffles - Lady Sophia Raffles 1830

Information Design - Robert Jacobson 2000-08-25

The contributors to this book are both cautionary and hopeful as they

offer visions of how information design can be practiced diligently and ethically, for the benefit of information consumers as well as producers. Information design is the newest of the design disciplines. As a sign of our times, when the crafting of messages and meaning is so central to our lives, information design is not only important—it is essential. Contemporary information designers seek to edify more than to persuade, to exchange more than to foist upon. With ever more powerful technologies of communication, we have learned that the issuer of designed information is as likely as the intended recipient to be changed by it, for better or worse. The contributors to this book are both cautionary and hopeful as they offer visions of how information design can be practiced diligently and ethically, for the benefit of information consumers as well as producers. They present various methods that seem to work, such as sense-making and way-finding. They make recommendations and serve as guides to a still young but extraordinarily pervasive—and persuasive—field. Contributors Elizabeth Andersen, Judy Anderson, Simon Birrell, Mike Cooley, Brenda Dervin, Jim Gasperini, Yvonne M. Hansen, Steve Holtzman, Robert E. Horn, Robert Jacobson, John Krygier, Sheryl Macy, Romedi Passini, Jef Raskin, Chandler Screven, Nathan Shedroff, Hal Thwaites, Roger Whitehouse

Evaluation Models - George F. Madaus 2012-12-06

Attempting fonnally to evaluate something involves the evaluator coming to grips with a number of abstract concepts such as value, merit, worth, growth, criteria, standards, objectives, needs, nonns, client, audience, validity, reliability, objectivity, practical significance, accountability, improvement, process, pro duct, fonnative, summative, costs, impact, infonnation, credibility, and - of course - with the tenn evaluation itself. To communicate with colleagues and clients, evaluators need to clarify what they mean when they use such tenns to denote important concepts central to their work. Moreover, evaluators need to integrate these concepts and their meanings into a coherent framework that guides all aspects of their work. If evaluation is to lay claim to the mantle of a profession, then these conceptualizations of evaluation must lead to the conduct of defensible evaluations. The conceptualization of evaluation

can never be a one-time activity nor can any conceptualization be static. Conceptualizations that guide evaluation work must keep pace with the growth of theory and practice in the field. Further, the design and conduct of any particular study involves a good deal of localized conceptualization.

Adolescents at Risk - Joy G. Dryfoos 1991-08-29

Seven million youngsters--one in four adolescents--have only limited potential for becoming productive adults because they are at high risk for encountering serious problems at home, in school, or in their communities. This is one of the disturbing findings in this unique overview of what is known about young people aged 10 to 17 growing up in the United States today. The book explores four problem areas that are the subject of a great deal of public interest and social concern: delinquency, substance abuse, teen pregnancy, and school failure. In examining these problem areas, Dryfoos has three objectives: to present a more cogent picture of adolescents who are at risk of problem behaviors and where they fit in society; to synthesize the experience of programs that have been successful in changing various aspects of these behaviors; and to propose strategies for using this knowledge base to implement more effective approaches to helping youngsters succeed. Among the key concepts emerging from this study are the importance of intense individual attention, social skills training, exposure to the world of work, and packaging components in broad, community-wide interventions. Schools are recognized as the focal institution in prevention, not only in regard to helping children achieve academically, but in giving young people access to social support and health programs. The author also proposes comprehensive youth development initiatives at the local, state and national level, based on programs shown to be effective in real practice. This landmark, state-of-the-art study represents an indispensable resource for anyone interested in the welfare and current problems of youth, including psychologists, sociologists, school administrators, state and federal officials, policymakers, and concerned parents.
