Army - 1959

The Southern Lumberman - 1979

The Economics of Heavy Construction

Equipment Standardization - Francis Dorman Koster 1964

The problems of standardization in the construction industry are continually being analyzed because managers are not satisfied with current answers, and new information on the subject is constantly being generated. One important aspect of heavy construction equipment policy which never has been analyzed completely is that of family standardization. This thesis was written to partially satisfy the need for analysis and discussion of the one special area of family standardization of heavy construction equipment. The viewpoint adopted for the discussion is generally that of the management of a medium-sized heavy construction company; however, specific attention also has been given to standardization as viewed by certain government organizations. It is hoped that the thesis will accomplish two objectives: (1) develop the significant factors and variables which affect family standardization

of heavy construction equipment, and (2) outline a method of analysis which contractors can use to improve their equipment policy.

Quarterly Bulletin of the Canadian Mining Institute - Canadian Institute of Mining and Metallurgy 1960

Fishing Gazette - 1971

Volumes for 1921-22, 1924- include an annual review number with title: Fishing gazette annual review and classified directory of marine and shore plant equipment (1921-60, Fishing gazette annual review number (varies slightly)).
