Small Engines - R. Bruce Radcliff 1997

Golosa - Joanna Robin 1998-02-01

Teaching Engineering, Second Edition - Phillip C. Wankat 2015-01-15

The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The "practical orientation" section explains how to develop objectives and then use them to enhance student learning, and the "theoretical orientation" section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while spending less time preparing for the classroom. This is a new edition of the well-received volume published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in the classroom (from clickers to intelligent tutorial systems), and how people learn.

The Chess Organiser's Handbook - Stewart Reuben 2005-07-01

"For me and many arbiters, Stewart Reuben's book is our bible." Casto Abundo, Rating Administrator, Elista FIDE Office. This third edition, as well as updated comprehensive and practical information on all aspects of running tournaments, also contains the new FIDE (World Chess Federation) Official Laws of Chess. These Laws were revised at the Chess Olympiad in Calvia, with changes taking effect from July 2005. • Several new chapters have been added on inputting games, websites, junior chess and peripheral events. • The FIDE Title Regulations have been fully revised since the last edition, substantially due to the efforts of Stewart Reuben. What is provided here are the necessary rules, which will enable an organiser or arbiter to run a title norm event. • Various Swiss Pairing Systems are compared critically. • Information given provides what is practically a blue-print to enable an organiser to put together a tournament. Stewart Reuben is internationally recognised as one of the world's foremost chess organisers and arbiters. He is currently Chairman of the FIDE Organizers Committee; Secretary of the Rules and Tournament Regulations Committee, member of the Title and Ratings Committee and of the Qualification Commission. He is also past Chairman of the British Chess Federation. He has officiated at and/or organised numerous top-level events, including the World Championship. He holds three FIDE titles: Arbiter, Organizer and Candidate Master.

Chess for Life - Matthew Sadler 2016-02-02

In this thought-provoking, wide-ranging and often inspiring book, the authors examine how chess style and abilities vary with age. The conventional wisdom is that greater experience should compensate for a loss of youthful energy, but with so many of the world elite currently in their twenties, chess is increasingly looking like a young man's game. By making a number of case studies and interviewing players who have

stayed strong into their forties, fifties and beyond, the authors show in detail how players can steer their games towards positions where their experience can shine through. Interviewees include: *GM John Nunn *GM Yasser Seirawan *GM Nigel Short *GM Judit Polgar *GM Keith Arkell *GM Pia Cramling *FM Terry Chapman *GM Jon Speelman *GM Sergei Tiviakov *WIM Ingrid Lauterbach By examining so many aspects of chess, the authors have written a work that ends up transcending its subject-matter, and becomes a text on how and why we love chess, the means by which we can play successfully whatever our age and level of play, and how chess is truly a game for life. Matthew Sadler is one of the strongest British players of recent decades. Having become a GM in his teens, he twice won the British Championship and was awarded an individual gold medal at the 1996 Olympiad. After concentrating on an IT career for more than a decade, he returned to high-level chess in 2010 and quickly regained a spot in the world top 100. Matthew's struggles to bring his game back up to speed after his long break were part of the inspiration for this book. Natasha Regan is a Women's International Master from England who achieved a degree in mathematics from Cambridge University. While pursuing a successful career as an actuary in the insurance industry, she has raised a family and maintained a strong interest in chess and other board games, including Go.

Additional knowledge and experience can be gained by hands-on experience. You should take every opportunity to learn all you can about diesel engines.

Disciple IV - Abingdon Press 2005-05

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward

the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Rapid Interpretation of ECGs in Emergency Medicine - Jennifer L. Martindale 2012-04-20

For a busy clinician in the Emergency Department, the ability to spot a lethal cardiac condition is critical. Rapid Interpretation of ECGs in Emergency Medicine fills a gap in ECG training in an easy-to-use, highly

visual format. ECG patterns, gathered from patient records and from the files of physicians at the Harvard-affiliated hospitals, represent the range of pathologies that hospitalists, internal medicine physicians, family medicine physicians, and emergency medicine physicians must recognize. The format of Rapid Interpretation of ECGs in Emergency Medicine is to first show an ECG in its native state to give you the chance to recognize and interpret salient features. The page can then be flipped to look at the same ECG with abnormal patterns enlarged, highlighted in color, and described in brief text. The ECGs are presented with and without annotations so you can test your diagnostic skills.

The Hardmen: Legends and Lessons from the Cycling Gods - The Velominati 2017-11-07

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .
