Teaching in the Outdoors provides a practical guide for getting students outdoors and helpful suggestions for maximizing the outdoor learning experience. It features the best articles on outdoor education ever published in Green Teacher magazine, including tips for leading fantastic field trips and the proper technique for class hikes.

Education in Singapore - Yew-Jin Lee 2022-04-07

This edited book is a comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one-stop reference guide to education and educational issues/concerns here. There are three sections: Part 1 provides a sectorial overview of how education has been organized in this country such as preschool, special needs, primary and secondary, and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here such as underachievement, leadership, language education, assessment, and meritocracy to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out

because of the comparative rarity of its subject matter (history of Physical Education, Art, Music, Geography Education, etc.) in Singapore. **Universal Dictionary of the English Language: Rhe-Z** - Robert Hunter 1897

Keeping the Wonder - Jenna Copper 2021-06-05

Embarking on your first solo road trip. Receiving a special surprise that

arrives out of the blue. Finding a sudden flash of inspiration that sets you on a wondrous new path. When we think about the moments that stand out in our memory, it's clear that our minds hold onto the unusual or unexpected. By tapping into students' innate curiosity, you can design memorable, meaningful learning experiences that captivate their interest and ignite their imaginations. Structured around four key elements that fuel engagement-surprise, curiosity, freedom, and inspiration-Keeping the Wonder offers practical strategies and abundant inspiration for K-12 educators to create lessons that are fun and compelling. Combining enchanting anecdotes, real-world experience, and a wealth of research, the authors share their collective expertise as educators and founders of the innovative Keeping the Wonder workshop. In this dynamic handbook, Jenna, Ashley, Abby, and Staci offer a fresh approach to learning through the lens of wonder. By providing creative ideas for switching up standard lesson plans in ways both subtle and profound, they show us how to recapture our fascination with the world by employing all of our senses, and enhance engagement and critical thinking for students and teachers alike. Endorsements Before reading Keeping the Wonder, I saw my social studies classroom for what it was: brick walls, desks, and a few colorful posters. Today, I see magic seeping through the cracks of every space. Keeping the Wonder reignited my passion for student engagement and learning with every turn of the page. -Dr. Jacob Bauer Zebley, high school social studies teacher and 2015 Cecil County Teacher of the Year From personal stories, practical advice, and research-based strategies, Keeping the Wonder is a book you will reach for time and again. After reading, you'll start looking not just at your own classroom and curriculum through the lens of wonder, but the world around you. A must read for any teacher who is looking to bring that sense of curiosity and love of learning back into their classroom. -Caitlin Mitchell and Jessica Cannata, cofounders of EB Academics and bestselling authors of The Empowered ELA Teacher

The Theory of the Leisure Class - Thorstein Veblen 1902

Raffles - Victoria Glendinning 2013

Thomas Stamford Raffles (1781-1826) was the charismatic and persuasive founder of Singapore and Governor of Java. An English adventurer, disobedient employee of the East India Company, utopian imperialist, linguist, zoologist and civil servant, he carved an extraordinary (though brief) life for himself in South East Asia. The tropical, disease-ridden settings of his story are as dramatic as his own trajectory - an obscure young man with no advantages other than talent and obsessive drive, who changed history by establishing - without authority - on the wretchedly unpromising island of Singapore a settlement which has become a world city. After a turbulent time in the East Indies, Raffles returned to the UK and turned to his other great interests - botany and zoology. He founded London Zoo in 1826, the year of his death. Raffles remains a controversial figure, and in the first biography for over forty years, Victoria Glendinning charts his prodigious rise within the social and historical contexts of his world. His domestic and personal life was vivid and shot through with tragedy. His own end was sad, but his fame immortal.

The Global Food Crisis - Satish Kedia 2010-01-05

The NAPA Bulletin series is dedicated to the practical problem-solving and policy applications of anthropological knowledge and methods. These papers demonstrate the diverse ways in which anthropology can be used to address the global food crisis while directly responding to local realities. Experts explore the dilemma of food insecurity in developing and industrialized countries. Practicing and applied anthropologists, sociologists and public health workers, examine the global food crisis through a variety of theoretical and analytical frameworks. Examines the ways in which food policies and economic restructuring have contributed to increasing food inequities across the globe

Affordable Excellence - William A. Haseltine 2013

"Today Singapore ranks sixth in the world in healthcare outcomes well ahead of many developed countries, including the United States. The results are all the more significant as Singapore spends less on healthcare than any other high-income country, both as measured by fraction of the Gross Domestic Product spent on health and by costs per person. Singapore achieves these results at less than one-fourth the cost of healthcare in the United States and about half that of Western European countries. Government leaders, presidents and prime ministers, finance ministers and ministers of health, policymakers in congress and parliament, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think-tanks should know how this system works to achieve affordable excellence."--Publisher's

website.

Itineraries of Expertise - Andra Chastain 2020-03-17

Itineraries of Expertise contends that experts and expertise played fundamental roles in the Latin American Cold War. While traditional Cold War histories of the region have examined diplomatic, intelligence, and military operations and more recent studies have probed the cultural dimensions of the conflict, the experts who constitute the focus of this volume escaped these categories. Although they often portrayed themselves as removed from politics, their work contributed to the key geopolitical agendas of the day. The paths traveled by the experts in this volume not only traversed Latin America and connected Latin America to

the Global North, they also stretch traditional chronologies of the Latin American Cold War to show how local experts in the early twentieth century laid the foundation for post-World War II development projects,

and how Cold War knowledge of science, technology, and the environment continues to impact our world today. These essays unite environmental history and the history of science and technology to argue for the importance of expertise in the Latin American Cold War.
