

M A Deal Process And Timeline Tully Holland Inc

Recognizing the way ways to acquire this books **M A Deal Process And Timeline Tully Holland Inc** is additionally useful. You have remained in right site to start getting this info. get the M A Deal Process And Timeline Tully Holland Inc colleague that we give here and check out the link.

You could buy guide M A Deal Process And Timeline Tully Holland Inc or get it as soon as feasible. You could speedily download this M A Deal Process And Timeline Tully Holland Inc after getting deal. So, later than you require the books swiftly, you can straight get it. Its for that reason no question easy and so fats, isnt it? You have to favor to in this tune

1979-1990 - Henryk Sawoniak 1999-01-01

The Vision - William J. Neville 2012-01-12

It was seen over 160 years ago. It was denied and scoffed at by experienced leaders and elders. It was a young boys tale; a fabrication to bolster his status within his tribe. Only his family believed. Over the years through turmoil and cultural upheaval the truth became known. It is a story of confirmation, standing up for ones principles and beliefs. As the years passed the implications become much broader than the original vision. Who knows how history would have c hanged if the boys story was believed? The convictions and choices that Horse Killer, Eagle Who Broke His Wing, Buffalo Robe, Fire Lance, Maxwell Slade (Sun Caller), Randle and Chip, Paxton, Sally, Tully, Fredericks, and Captain Adkins, made at various times over a 160 year span are linked together to confirm the vision. Commitment, values, convictions, and beliefs, converge to exonerate one young boys tale. Everyone is in this book or someone you know. . .

The Legend of Diamond Lil - Doreen Cronin 2012-02-28

The Legend of Diamond Lil, second book in the illustrated J.J. Tully mystery series, is perfect for elementary-school kids who love adventure and animals. New York Times bestselling author Doreen Cronin brings the same wonderful humor to the JJ. Tully whodunits that she did to her beloved picture book bestsellers like Diary of a Worm. In this sequel to the chapter book The Trouble with Chickens, all search-and-rescue

dog J.J. Tully wants is to enjoy his retirement. But mama chick Moosh and chicks Dirt and Sugar are acting strange. A possum keeps finding its way into the chicken coop. And J.J. has questions about Diamond Lil, the fancy new dog next door. He'll have to track down the clues and sniff out the evidence to save the day. **Natural History of New York*. - New York : Appleton : Wiley and Putnam ; Boston : Gould, Kendall and Lincoln ; Albany : Weed. - V. ; 29 Cm - James Hall 1843

History of Original Ideas and Basic Discoveries in Particle Physics - Harvey B. Newman 2012-12-06

The International Conference on the History of Original Ideas and Basic Discoveries, held at the "Ettore Majorana" Centre for Scientific Culture in Erice, Sicily, July 27-August 4, 1994, brought together sixty of the leading scientists including many Nobel Laureates in high energy physics, principal contributors in other fields of physics such as high Tc superconductivity, particle accelerators and detector instrumentation, and thirty-six talented younger physicists selected from candidates throughout the world. The scientific program, including 49 lectures and a discussion session on the "Status and Future Directions in High Energy Physics" was inspired by the conference theme: The key experimental discoveries and theoretical breakthroughs of the last 50 years, in particle physics and related fields, have led us to a powerful description of matter in terms of three quark and three lepton families and four fundamental interactions. The

most recent generation of experiments at e+e- and proton-proton colliders, and corresponding advances in theoretical calculations, have given us remarkably precise determinations of the basic parameters of the electroweak and strong interactions. These developments, while showing the striking internal consistency of the Standard Model, have also sharpened our view of the many unanswered questions which remain for the next generation: the origin and pattern of particle masses and families, the unification of the interactions including gravity, and the relation between the laws of physics and the initial conditions of the universe.

History of the City of Buffalo and Erie County - Henry Perry Smith 1884

Educators of the Mediterranean... ..Up Close and Personal - Ronald G Sultana 2012-01-01
“A score of prominent educators from South Europe and the Middle East and North Africa region speak about their upbringing, their educational and professional journeys, their academic achievements, and their struggles in order to enhance democracy, justice and equity in their countries and across the Mediterranean. The interviews in this volume shed light on educational movements, challenges, and aspirations in a region that is attaining increasing importance geo-politically, and in comparative and international studies. These are powerful and critical voices, providing readers with fresh, often unexpected insights about contexts, cultures, and convictions that deserve global attention. The interviews with these men and women inform, intrigue, but above all inspire, calling, as they do, for an earnest commitment to a vision of education as a transformative, democratising force. In contrast to the global, totalising discourse that has increasingly defined education in narrowly economic terms, here are the beginnings of alternative agendas, inviting citizens to ‘read’ and decode the world around them, and to confront power, wherever it lies. In doing so, the educators in this volume draw upon and put at our disposal a wide array of theoretical lenses, nimbly weaving these within a narrative that speaks about a lifetime lived in the hope of making a difference. These, then, are vivid, engaging, and reflexive accounts, emerging from

contexts where democracy has only recently taken root, if at all, and from a region that has come to symbolize the return of the political, and the reclaiming of the public sphere as a site for transformation, contestation, revolt, and hope.”
Secession and Self - Gregory Millard 2008-10-24
Secession and Self goes beyond debates over the economic and institutional effects of Quebec separation to look at the normative dimensions of resistance to secession. Drawing from Charles Taylor, James Tully, and many others, Gregory Millard explores the central role Quebec plays in ideas of what makes Canada worthwhile. He argues that a break with Quebec would impair Canada's ability to realize ideals such as liberalism, fraternity, and developmental accounts of citizenship and would undercut attempts to locate Canadian identity in narratives of history and place. In lieu of a single argument against the departure of Quebec, Millard considers the variety and richness of the affirmations involved in Quebec-in-Canada as a particular kind of multinational state.

An Intellectual History of Terror - Mikkel Thorup 2010-06-30

This book investigates terrorism and anti-terrorism as related and interacting phenomena, undertaking a simultaneous reading of terrorist and statist ideologists in order to reconstruct the 'deadly dialogue' between them. This work investigates an extensive array of violent phenomena and actors, trying to broaden the scope and ambition of the history of terrorism studies. It combines an extensive reading of state and terrorist discourse from various sources with theorizing of modernity's political, institutional and ideological development, forms of violence, and its guiding images of self and other, order and disorder. Chapters explore groups of actors (terrorists, pirates, partisans, anarchists, Islamists, neo-Nazis, revolutionaries, soldiers, politicians, scholars) as well as a broad empirical source material, and combine them into a narrative of how our ideas and concepts of state, terrorism, order, disorder, territory, violence and others came about and influence the struggle between the modern state and its challengers. The main focus is on how the state and its challengers have conceptualized and legitimated themselves, defended their existence and, most importantly, their violence. In doing

so, the book situates terrorism and anti-terrorism within modernity's grander history of state, war, ideology and violence. This book will be of much interest to students of critical terrorism studies, political violence, sociology, philosophy, and Security Studies/IR in general. Mikkel Thorup is Assistant Professor at the Institute of Philosophy and the History of Ideas, University of Aarhus, Denmark.

The Living Church - 1996-07

Natural History of New York - James Hall 1843

Notes Upon the Geological History of Cayuga and Seneca Lakes - Charles Whittesley Foote 1877

Register of Post-graduate Dissertations in Process in History and Related Subjects - Public Archives of Canada 1995

Thornton and Tully's Scientific Books, Libraries, and Collectors - John Leonard Thornton 2000

In the 25 years since the third edition of this book, scientific publishing has developed new forms and the academic discipline and popular appreciation of the history of science has grown. This edition discusses these changes and ponders the implications of developments in publishing by the end of the 20th century, while concentrating upon the dissemination of scientific ideas and knowledge from antiquity to the industrial age. In this shift of focus, it departs from previous editions and for the first time, a chapter on Islamic science is included.

Renaissance Hybrids - Gary A. Schmidt 2016-04-08

In the first book-length study explicitly to connect the postcolonial trope of hybridity to Renaissance literature, Gary Schmidt examines how sixteenth- and seventeenth-century English authors, artists, explorers and statesmen exercised a concerted effort to frame questions of cultural and artistic heterogeneity. This book is unique in its exploration of how 'hybrid' literary genres emerge at particular historical moments as vehicles for negotiating other kinds of hybridity, including but not limited to cultural and political hybridity. In particular, Schmidt addresses three distinct manifestations of 'hybridity' in English literature and iconography

during this period. The first category comprises literal hybrid creatures such as satyrs, centaurs, giants, and changelings; the second is cultural hybrids reflecting the mixed status of the nation; and the third is generic hybrids such as the Shakespearean 'problem play,' the volatile verse satires of Nashe, Hall and Marston, and the tragicomedies of Beaumont and Fletcher. In *Renaissance Hybrids*, Schmidt demonstrates 'postmodern' considerations not to be unique to our own critical milieu. Rather, they can fruitfully elucidate cultural and literary developments in the English Renaissance, forging a valuable link in the history of ideas and practices, and revealing a new dimension in the relation of early modern studies to the concerns of the present.

Fundamentals of Comparative and Intercultural Philosophy - Lin Ma 2016-03-25

Discusses the conditions of possibility for intercultural and comparative philosophy, and for crosscultural communication at large. This innovative book explores the preconditions necessary for intercultural and comparative philosophy. Philosophical practices that involve at least two different traditions with no common heritage and whose languages have very different grammatical structure, such as Indo-Germanic languages and classical Chinese, are a particular focus. Lin Ma and Jaap van Brakel look at the necessary and not-so-necessary conditions of possibility of interpretation, comparison, and other forms of interaction and how we can speak of similarities and differences in this context. The authors posit that it is necessary to dissolve the question of universalism versus relativism by replacing the ideal language paradigm with a paradigm of family resemblances and that it is not necessary to share a common language to engage in comparison. Numerous case studies are presented, including many comparisons of Western and Chinese concepts. Lin Ma is Associate Professor of the School of Philosophy at the Renmin University of China and the author of *Heidegger on East-West Dialogue: Anticipating the Event*. Jaap van Brakel is Professor Emeritus in the Higher Institute of Philosophy at the University of Leuven and the author of *Philosophy of Chemistry: Between the Manifest and the Scientific Image*.

Galaxy Scaling Relations: Origins, Evolution and Applications - Luiz N. DaCosta 2013-11-11

At close inspection every galaxy appears to have its own individuality. A galaxy can be warped, lop-sided, doubly-nucleated, boxy or disky, ... in its own specific, peculiar way. Hence, for a complete description, galaxy taxonomy may ask for finer and finer classification schemes. However, for some applications it may be more fruitful to let details aside and focus on some global properties of galaxies. One is then seeking to measure just a few quantities for each galaxy, a minimum set of global observables that yet captures some essential aspect of these objects. One very successful example of this approach is offered by the scaling relations of galaxies, the subject of the international workshop held at ESO head quarters in Garching on November 19-21, 1996. Discovered in the late 1970's, the Tully-Fisher relation for the spirals and the Faber-Jackson relation, or its more recent version the Fundamental Plane, for ellipticals have now become flourishing fields of astronomical research in their own right, as well as being widely used tools for a broad range of astronomical investigations. The workshop was designed to address three key issues on galaxy scaling relations, i.e., their Origins, Evolution, and Applications in astronomy. The Origins of galaxy scaling relations still escape our full understanding.

Natural History of New York: Plates to accompany v. 3 (reptiles & amphibia, 23 plates ; fishes, 79 plates, 1842) - Lewis C. Beck 1843

Elementary Particle Physics in a Nutshell -

Christopher G. Tully 2011-10-30

The new experiments underway at the Large Hadron Collider at CERN in Switzerland may significantly change our understanding of elementary particle physics and, indeed, the universe. Suitable for first-year graduate students and advanced undergraduates, this textbook provides an introduction to the field
[The Pageant of America, a Pictorial History of the United States](#) - 1926

Thornton and Tully's Scientific Books, Libraries and Collectors - Andrew Hunter 2016-12-05
In the 25 years since the last edition of Thornton

and Tully's Scientific Books, Libraries and Collectors was published, scientific publishing has mushroomed, developed new forms, and the academic discipline and popular appreciation of the history of science have grown apace. This fourth edition discusses these changes and ponders the implications of developments in publishing at the end of the twentieth century, while concentrating its gaze upon the dissemination of scientific ideas and knowledge from Antiquity to the industrial age. In this shift of focus it departs from previous editions, and for the first time a chapter on Islamic science is included. Recurrent themes in several of the ten essays in the present volume are the definition of 'science' itself, and its transmutation by publishing media and the social context. Two essays on the collecting of scientific books provide a counterpoint, and the book is grounded on a rigorous chapter on bibliographies. The timely publication of Scientific Books, Libraries and Collectors comes at the coincidence of the advent of electronic publishing and the millennium, a dramatic moment at which to take stock.

[Evaporites](#) - John K. Warren 2016-05-18

The monograph offers a comprehensive discussion of the role of evaporites in hydrocarbon generation and trapping, and new information on low temperature and high temperature ores. It also provides a wealth of information on exploitable salts, in a comprehensive volume has been assembled and organized to provide quick access to relevant information on all matters related to evaporites and associated brines. In addition, there are summaries of evaporite karst hazards, exploitative methods and problems that can arise in dealing with evaporites in conventional and solution mining. This second edition has been revised and extended, with three new chapters focusing on ore minerals in different temperature settings and a chapter on meta-evaporites. Written by a field specialist in research and exploration, the book presents a comprehensive overview of the realms of low- and high-temperature evaporite evolution. It is aimed at earth science professionals, sedimentologists, oil and gas explorers, mining geologists as well as environmental geologists.
[Celebrating Democracy](#) - Mark W. Brewin 2008

This chronological account of Election Day in Philadelphia begins in the colonial era and traces the evolution of the democratic process through to the present day. Using a variety of sources, the book documents how Philadelphians have dramatically changed the ways in which they perform and discuss Election Day, and examines the significance of these changes, using them as a lens through which to understand differing conceptions of democratic life. Particular attention is paid to the day's status as a mass-mediated ritual, and the various forms of media - among them broadsides, newspapers, television, and the Internet - that have dominated public portrayals of the occasion.

Fighting for NOW - Kelsy Kretschmer 2019-03-19

An unparalleled exploration of NOW's trajectory, from its founding to the present—and its future. A new wave of feminist energy has swept the globe since 2016—from women's marches and the #MeToo movement to transwomen's inclusion and exclusion in feminism and participation in institutional politics. Amid all this, an organization declared dead or dying for thirty years—the National Organization for Women—has seen a membership boom. NOW presents an intriguing puzzle for scholars and activists alike. Considered one of the most stable organizations in the feminist movement, it has experienced much conflict and schism. Scholars have long argued that factionalism is the death knell of organizations, yet NOW continues to thrive despite internal conflicts. *Fighting for NOW* seeks to better understand how bureaucratic structures like NOW's simultaneously provide stability and longevity, while creating space for productive and healthy conflict among members. Kelsy Kretschmer explores these ideas through an examination of conflict in NOW's local chapters, its task forces

and committees, and its satellite groups. NOW's history provides evidence for three basic arguments: bureaucratic groups are not insulated from factionalism; they are important sites of creativity and innovation for their movements; and schisms are not inherently bad for movement organizations. Hence, *Fighting for NOW* is in stark contrast to conventional scholarship, which has conceptualized factionalism as organizational failure. It also provides one of the few book-length explorations of NOW's trajectory, from its founding to the modern context. Scholars will welcome the book's insights that draw on open systems and resource dependency theories, as well as its rethinking of how conflict shapes activist communities. Students will welcome its clear and compelling history of the feminist movement and of how feminist ideas have changed over the past five decades.

Manual of Exotic Pet Practice - Mark Mitchell 2008-03-04

The only book of its kind with in-depth coverage of the most common exotic species presented in practice, this comprehensive guide prepares you to treat invertebrates, fish, amphibians and reptiles, birds, marsupials, North American wildlife, and small mammals such as ferrets, rabbits, and rodents. Organized by species, each chapter features vivid color images that demonstrate the unique anatomic, medical, and surgical features of each species. This essential reference also provides a comprehensive overview of biology, husbandry, preventive medicine, common disease presentations, zoonoses, and much more. Other key topics include common health and nutritional issues as well as restraint techniques, lab values, drug dosages, and special equipment needed to treat exotics. Brings cutting-edge information on all exotic species together in one convenient resource. Offers essential strategies for preparing your staff to properly handle and treat exotic patients. Features an entire chapter on equipping your practice to accommodate exotic species, including the necessary equipment for housing, diagnostics, pathology, surgery, and therapeutics. Provides life-saving information on CPR, drugs, and supportive care for exotic animals in distress. Discusses wildlife rehabilitation, with valuable information on laws

and regulations, establishing licensure, orphan care, and emergency care. Includes an entire chapter devoted to the emergency management of North American wildlife. Offers expert guidance on treating exotics for practitioners who may not be experienced in exotic pet care.

Cultures and Identities in Colonial British America - Robert Olwell 2015-10-01

The entire series, "Anglo-America in the Transatlantic World, engages the major organizing themes of the subject through a collection of high-level, debate-inspiring essays, inviting readers to think anew about the complex ways in which the Atlantic experience shaped both American societies and the Atlantic world itself.

History of Worcester County, Massachusetts - Duane Hamilton Hurd 1889

How History Matters to Philosophy - Robert C. Scharff 2014-02-03

In recent decades, widespread rejection of positivism's notorious hostility toward the philosophical tradition has led to renewed debate about the real relationship of philosophy to its history. *How History Matters to Philosophy* takes a fresh look at this debate. Current discussion usually starts with the question of whether philosophy's past should matter, but Scharff argues that the very existence of the debate itself demonstrates that it already does matter. After an introductory review of the recent literature, he develops his case in two parts. In Part One, he shows how history actually matters for even Plato's Socrates, Descartes, and Comte, in spite of their apparent promotion of conspicuously ahistorical Platonic, Cartesian, and Positivistic ideals. In Part Two, Scharff argues that the real issue is not whether history matters; rather it is that we already have a history, a very distinctive and unavoidable inheritance, which paradoxically teaches us that history's mattering is merely optional. Through interpretations of Dilthey, Nietzsche, and Heidegger, he describes what thinking in a historically determinate way actually involves, and he considers how to avoid the denial of this condition that our own philosophical inheritance still seems to expect of us. In a brief conclusion, Scharff explains how this book should be read as part of his own effort to acknowledge this

condition rather than deny it.

Stellar Populations (IAU S262) - International Astronomical Union. Symposium 2010-04-29
IAU Symposium 262 presents reviews on the current understanding of the theories of stellar evolution, galaxy formation and galaxy evolution. It emphasises what we have learned in the past few years from massive surveys covering large portions of the sky (e.g. SDSS, HDF, UDF, GOODS, COSMOS). Several critical aspects of research on stellar populations deserve further effort in order to be brought in tune with other areas of astrophysical research. The next ten years will see the opening of major observatories that will increase the quality and quantity of astronomical data by orders of magnitude. The expected benefits from these instruments for the study of stellar populations are explored. This critical review of state of the art observational and theoretical work will appeal to all those working on stellar populations, from distant galaxies to local resolved galaxies and galactic star clusters.

HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY -Volume IV - Pablo Lorenzano 2010-09-27

History and Philosophy of Science and Technology is a component of Encyclopedia of Physical Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on History and Philosophy of Science and Technology in four volumes covers several topics such as: Introduction to the Philosophy of Science; The Nature and Structure of Scientific Theories Natural Science; A Short History of Molecular Biology; The Structure of the Darwinian Argument In The Origin of Species; History of Measurement Theory; Episodes of XX Century Cosmology: A Historical Approach; Philosophy of Economics; Social Sciences: Historical And Philosophical Overview of Methods And Goals; Introduction to Ethics of Science and Technology; The Ethics of Science and Technology; The Control of Nature and the Origins of The Dichotomy Between Fact And Value; Science and Empires: The Geo-Epistemic Location of Knowledge; Science and Religion; Scientific Knowledge and Religious Knowledge -

Significant Epistemological Reference Points; Thing Called Philosophy of Technology; Transitions from Function-Oriented To Effect-Oriented Technologies. Some Thought on the Nature of Modern Technology; Technical Agency and Sources of Technological Pessimism These four volumes are aimed at a broad spectrum of audiences: University and College Students, Educators and Research Personnel.

Reader's Guide to American History - Peter J. Parish 2013-06-17

There are so many books on so many aspects of the history of the United States, offering such a wide variety of interpretations, that students, teachers, scholars, and librarians often need help and advice on how to find what they want. The Reader's Guide to American History is designed to meet that need by adopting a new and constructive approach to the appreciation of this rich historiography. Each of the 600 entries on topics in political, social and economic history describes and evaluates some 6 to 12 books on the topic, providing guidance to the reader on everything from broad surveys and interpretive works to specialized monographs. The entries are devoted to events and individuals, as well as broader themes, and are written by a team of well over 200 contributors, all scholars of American history.

Reclaiming History: The Assassination of President John F. Kennedy - Vincent Bugliosi 2007

An all-encompassing analysis of the assassination of JFK and its surrounding conspiracy theories draws on forensic evidence, key witness testimonies, and other sources to explain what really happened and why conspiracy theories have become so popularized.

Equality on Trial - Katherine Turk 2016-04-29
In 1964, as part of its landmark Civil Rights Act, Congress outlawed workplace discrimination on the basis of such personal attributes as sex, race, and religion. This provision, known as Title VII, laid a new legal foundation for women's rights at work. Though President Kennedy and other lawmakers expressed high hopes for Title VII, early attempts to enforce it were inconsistent. In the absence of a consensus definition of sex equality in the law or society, Title VII's practical meaning was far from certain. The first history to foreground Title VII's

sex provision, *Equality on Trial* examines how the law's initial promise inspired a generation of Americans to dispatch expansive notions of sex equality. Imagining new solidarities and building a broad class politics, these workers and activists engaged Title VII to generate a pivotal battle over the terms of democracy and the role of the state in all labor relationships. But the law's ambiguity also allowed for narrow conceptions of sex equality to take hold.

Conservatives found ways to bend Title VII's possible meanings to their benefit, discovering that a narrow definition of sex equality allowed businesses to comply with the law without transforming basic workplace structures or ceding power to workers. These contests to fix the meaning of sex equality ultimately laid the legal and cultural foundation for the neoliberal work regimes that enabled some women to break the glass ceiling as employers lowered the floor for everyone else. Synthesizing the histories of work, social movements, and civil rights in the postwar United States, *Equality on Trial* recovers the range of protagonists whose struggles forged the contemporary meanings of feminism, fairness, and labor rights.

James Tully - Alexander Livingston 2022-05-31
James Tully's scholarship has profoundly transformed the study of political thought by reconstructing the practice of political theory as a democratising and diversifying dialogue between scholars and citizens. Across his writings on topics ranging from the historical origins of property, constitutionalism in diverse societies, imperialism and globalisation, and global citizenship in an era of climate crisis, Tully has developed a participatory mode of political theorising and political change called public philosophy. This practice-oriented approach to political thought and its active role in the struggles of citizens has posed fundamental challenges to modern political thought and launched new lines of inquiry in the study of constitutionalism, democracy and citizenship, settler colonialism, comparative political theory, nonviolence, and ecological sustainability. *James Tully: To Think and Act Differently* collects classic, contemporary, and previously unpublished writings from across Tully's four decades of scholarship to shed new light on these dialogues of reciprocal elucidation

with citizens, scholars, and the history of political thought, and the ways Tully has enlarged our understanding of democracy, diversity, and the task of political theory.

A Cultural History of Law in the Modern Age - Richard K. Sherwin 2021-03-11

The period since the First World War has been a century distinguished by the loss of any unitary foundation for truth, ethics, and the legitimate authority of law. With the emergence of radical pluralism, law has become the site of extraordinary creativity and, on occasion, a source of rights for those historically excluded from its protection. *A Cultural History of Law in the Modern Age* tells stories of human struggles in the face of state authority - including Aboriginal land claims, popular resistance to corporate power, and the inter-generational ramifications of genocidal state violence. The essays address how, and with what effects, different expressive modes (ceremonial dance, live street theater, the acoustics of radio, the affective range of film, to name a few) help to construct, memorialize, and disseminate political

and legal meaning. Drawing upon a wealth of visual, textual and sound sources, *A Cultural History of Law in the Modern Age* presents essays that examine key cultural case studies of the period on the themes of justice, constitution, codes, agreements, arguments, property and possession, wrongs, and the legal profession.

For Brotherhood & Duty - Brian R. McEnany 2015-04-07

During the tense months leading up to the American Civil War, the cadets at the United States Military Academy at West Point continued their education even as the nation threatened to dissolve around them. Students from both the North and South struggled

The Harvard Guide to African-American History - Evelyn Brooks Higginbotham 2001

Compiles information and interpretations on the past 500 years of African American history, containing essays on historical research aids, bibliographies, resources for women's issues, and an accompanying CD-ROM providing bibliographical entries.
