Army Leadership and the Profession (ADP 6-22) - Headquarters Department of the Army
2019-10-09

ADP 6-22 describes enduring concepts of leadership through the core competencies and attributes required of leaders of all cohorts and all organizations, regardless of mission or setting. These principles reflect decades of

experience and validated scientific knowledge. An ideal Army leader serves as a role model through strong intellect, physical presence, professional competence, and moral character. An Army leader is able and willing to act decisively, within superior leaders' intent and purpose, and in the organization's best interests. Army leaders recognize that organizations, built on mutual trust and confidence, accomplish missions. Every member of the Army, military or civilian, is part of a team and functions in the role of leader and subordinate. Being a good subordinate is part of being an effective leader. Leaders do not just lead subordinates—they also lead other leaders. Leaders are not limited to just those designated by position, rank, or authority.

Protecting Our Forces - Institute of Medicine 2002-10-25

Infectious diseases continue to pose a

substantial threat to the operational capacity of military forces. Protecting Our Forces reviews the process by which the U.S. military acquires vaccines to protect its warfighters from natural infectious disease threats. The committee found that poorly aligned acquisition processes and an inadequate commitment of financial resources within the Department of Defense vaccine acquisition process " rather than uncleared scientific or technological hurdles " contribute to the unavailability of some vaccines that could protect military personnel and, implicitly, the welfare and security of the nation. Protecting Our Forces outlines ways in which DoD might strengthen its acquisition process and improve vaccine availability. Recommendations, which include combining all DoD vaccine acquisition responsibilities under a single DoD authority, cover four broad aspects of the acquisition process: (1) organization, authority, and responsibility; (2) program and budget; (3) manufacturing; (4) and the regulatory status

of special-use vaccines.

The Rocky Road to the Great War - Nicholas Murray 2013-08-31

Nicholas Murray's The Rocky Road to the Great War examines the evolution of field fortification theory and practice between 1877 and 1914. During this period field fortifications became increasingly important, and their construction

evolved from primarily above to below ground. The reasons for these changes are crucial to explaining the landscape of World War I, yet they have remained largely unstudied. The transformation in field fortifications reflected not only the ongoing technological advances but also the changing priorities in the reasons for constructing them, such as preventing desertion, protecting troops, multiplying forces, reinforcing tactical points, providing a secure base, and dominating an area. Field fortification theory, however, did not evolve solely in response to improving firepower or technology. Rather, a combination of those factors and societal ones—for example, the rise of large conscript armies and the increasing participation of citizens rather than subjects—led directly to technical alterations in the actual construction of the fieldworks. These technical developments arose from the second wave of the Industrial Revolution in the late nineteenth century that provided new technologies that increased the

firepower of artillery, which in turn drove the transition from above- to belowground field fortification. Based largely on primary sources—including French, British, Austrian, and American military attache reports—Murray's enlightening study is unique in defining, fully examining, and contextualizing the theories and construction of field fortifications before World War I.

German Military Abbreviations - 1943

"Perhaps to a greater extent than any other army, the German Armed Forces employ military abbreviations on their maps and charts, on task force tables of organization, on direction and location sign posts in combat zones, on field orders, and, in short, in every case where abbreviations may possibly be used. These abbreviations are often used in connection with military symbols (see German Military Symbols, January 1943, Military Intelligence Service). A thorough knowledge of both abbreviations and symbols is therefore essential to military personnel engaged in the interpretation of captured documents."--Page 1.
