Sitti Nurbaya - Marah Rusli 2009

First published in 1922, the novel "Sitti Nurbaya: A Love Unrealized," by Marah Rusli, retains the poignancy that made it a modern Indonesian classic. In terms of its social impact in what was then the Dutch East Indies, "Sitti Nurbaya" may be compared to "Uncle Tom's Cabin" in the ante-bellum United States. Even to this day, the issues of injustice and indignities suffered by women that this novel raised continue to be debated throughout the country. Rich in description, dense with ironic foreboding and the inexorable workings of fate, Sitti Nurbaya is Samsu and "Sitti Nurbaya"'s ill-fated love story. But in their wishes, the reader might also also discern young people's tantalizing dream of what the East Indies society might become, or could become, if only local genius, embodied in a modernizing youth emancipated from stifling traditions, could fuse with European genius in mutual respect and admiration. This too was, of course, a dream never to be realized, and one perhaps which never could have been realized.

Literary Ethics - Ralph Waldo Emerson 2014-09-07

Literary Ethics An Oration delivered before the Literary Societies of Dartmouth College, July 24, 1838 Ralph Waldo Emerson Ralph Waldo Emerson (May 25, 1803 - April 27, 1882) was an American essayist, lecturer, and poet, who led the Transcendentalist movement of the mid-19th century. He was seen as a champion of individualism and a prescient critic of the countervailing pressures of society, and he disseminated his thoughts through dozens of published essays and more than 1,500 public lectures across the United States. Emerson gradually moved away from the religious and social beliefs of his contemporaries, formulating and expressing the philosophy of Transcendentalism in his 1836 essay, *Nature*. Following this ground-breaking work, he gave a speech entitled "The American Scholar" in 1837, which Oliver Wendell Holmes, Sr. considered to be America's "Intellectual Declaration of Independence." Emerson wrote most of his important essays as lectures

first, then revised them for print. His first two collections of essays - *Essays: First Series* and *Essays: Second Series*, published respectively in 1841 and 1844 - represent the core of his thinking, and include such well-known essays as *Self-Reliance*, *The Over-Soul*, *Circles*, *The Poet and Experience*. Together with *Nature*, these essays made the decade from the mid-1830s to the mid-1840s Emerson's most fertile period. Emerson wrote on a number of subjects, never espousing fixed philosophical tenets, but developing certain ideas such as individuality, freedom, the ability for humankind to realize almost anything, and the relationship between the soul and the surrounding world. Emerson's "nature" was more philosophical than naturalistic: "Philosophically considered, the universe is composed of Nature and the Soul." Emerson is one of several figures who "took a more pantheist or pandeist approach by rejecting views of God as separate from the world." He remains among the linchpins of the American romantic movement, and his work has greatly influenced the thinkers, writers and poets that have followed him. When asked to sum up his work, he said his central doctrine was "the infinitude of the private man." Emerson is also well known as a mentor and friend of fellow Transcendentalist Henry David Thoreau.

The Learning and Teaching of Reading and Writing - Naomi Flynn 2006-07-11

This book provides a unique description of teacher-pupil interaction during the Literacy Hour in good schools. It is based on detailed observations in inner-city primary schools that were recognised as effective and improving. The analysis is informed by contemporary research into the development and teaching of early literacy. The book provides practice-based examples of how teachers and schools might adapt their delivery for literacy as they move to greater creativity in their teaching of reading and writing. The analysis begins within the classrooms of three expert Key Stage 1 teachers and broadens out in to the wider setting of the schools and their senior management teams. An important theme running throughout the book is how the three teachers were able to make exceptional provision for their pupils, who were largely second language speakers and from socio-economically

disadvantaged groups. The teachers' successful practice grew from their understanding of both early literacy development and planning for individual need. The information in this book will enable student teachers, recently qualified teachers, and teachers interested in enhancing their literacy teaching to develop their practice in a similarly successful way.

Online Teaching and Learning in Higher Education - Pedro Isaias
2021-10-01

This book is to explore a variety of facets of online learning environments to understand how learning occurs and succeeds in digital contexts and what teaching strategies and technologies are most suited to this format. Business, health, government and education are some of the core sectors of society which have been experiencing deep transformations due to a generalized digitalization. While these changes are not novel, the swift progress of technology and the rising complexity of digital environments place a focus on the need for further research and novel strategies. In the context of education, the promise of increased flexibility and broader access to educational resources is impelling much of higher education's course offerings to online environments. The 21st century learner requires an education that can be pursued anytime and anywhere and that is more aligned with the demands of a digital society. Online education not only assists students to successfully integrate a workforce that is increasingly digital, but it helps them to become more comfortable with the use of technology in general and, hence, more prepared to be prolific digital citizens. The variety of settings portrayed in this volume attest to the unlimited opportunities afforded by online learning and serve as valuable evidence of its benefit for students' educational experience. Moreover, these research efforts assist a more comprehensive reflection about the delivery of higher education in the context of online settings.

The Fisherman's Son - Marilyn Peake 2004-12-01

THE FISHERMAN'S SON is a children's novel filled with fantasy,

adventure and the heroic qualities of a brave, young boy. At the same time, it includes accurate and beautiful descriptions of life under the ocean, villages similar to those of real nineteenth century island villages, and cities similar to those of ancient Greece and Rome. Part of the book is based on research accounts of what may have happened to Atlantis if it once existed. The main character is a twelve-year-old boy named Wiley O'Mara. He lives on an island far up north where it is very cold, around the beginning of the nineteenth century. The island scenery and culture in some ways resemble that of Ireland around the same time. After meeting a dolphin who allows him to swim underwater, Wiley takes part in an extraordinary adventure through which he and the dolphin accomplish an incredible rescue mission. Along the way, Wiley and his friend encounter both real and imaginary creatures - the real fish, dolphins, coral reefs and changing depths of the North Atlantic Ocean, as well as imaginary creatures in the island forest and ocean depths surrounding Wiley's home.

The Rainbow Troops - Andrea Hirata 2013-02-05

Published in Indonesia in 2005, *The Rainbow Troops*, Andrea Hirata's closely autobiographical debut novel, sold more than five million copies, shattering records. Now it promises to captivate audiences around the globe. Ikal is a student at the poorest village school on the Indonesian island of Belitung, where graduating from sixth grade is considered a remarkable achievement. His school is under constant threat of closure. In fact, Ikal and his friends—a group nicknamed the Rainbow Troops—face threats from every angle: skeptical government officials, greedy corporations hardly distinguishable from the colonialism they've replaced, deepening poverty and crumbling infrastructure, and their own low self-confidence. But the students also have hope, which comes in the form of two extraordinary teachers, and Ikal's education in and out of the classroom is an uplifting one. We root for him and his friends as they defy the island's powerful tin mine officials. We meet his first love, the unseen girl who sells chalk from behind a shop screen, whose pretty hands capture Ikal's heart. We cheer for Lintang, the class's barefoot math genius, as he bests the students of the mining corporation's school in an academic challenge. Above all, we gain an intimate acquaintance with the customs and people of the world's largest Muslim society. This is classic storytelling in the spirit of Khaled Hosseini's *The Kite Runner*: an engrossing depiction of a milieu we have never encountered before, bursting with charm and verve.

Islam and Muslim Societies - 2019-04

Islam is more than a religion in the strict theological sense. If we confine ourselves to doctrinal normativity and Islamic law to analyse what Muslims motivate and how they build religious landscapes and life worlds, we seriously narrow down our understanding of Islam. Islamic society is a universal society, found at every place, in East and West, in south and north, and found at all time. It was not only found at the time of the Prophet, but also before his time, and at the time of other Messengers from Adam to Jesus (peace be upon them all), and after their time. Koranic teachings promote an ascetic ethic of self-control that bears on virtually all aspects of everyday activity. For Muslims, faith has not merely been a matter of private life and a personal relation with God. It has had pervasive social consequences. The Holy Qur'an and the traditions of the Prophet are concerned about Muslim and Islamic society. In many ways these holy books focuses on the importance of Islamic society. Because Allah and his prophet believes that Muslims Ummah are the best among all Adam's generation. Consequently, Islamic religion takes them out from the darkness into the light in order to achieve happiness, felicity in this world and the Hereafter. This book Islam and Muslim Societies consists of studies dealing with political,

economic, legal, and social policies that affect every facet of the social life of Muslims. This book is aimed at bridging the gap between the textual and contextual approaches to Islamic Studies; and solving the dichotomy between 'orthodox' and 'heterodox' Islam. It contains a selection of studies written by scholars and authors dealing with Islam and Muslim societies as its central focus of academic inquiry and to encourage comprehensive consideration of its many facets; to provide an opportunity for the study of Islam and Muslim societies in their global context; to encourage interdisciplinary studies of the Islamic world that are cross-national and comparative; to promote the diffusion, exchange and discussion of research findings; and to encourage interaction among academics from various traditions of learning.

Documentary Film: A Very Short Introduction - Patricia Aufderheide 2007-11-28

Documentary film can encompass anything from Robert Flaherty's pioneering ethnography *Nanook of the North* to Michael Moore's anti-Iraq War polemic *Fahrenheit 9/11*, from Dziga Vertov's artful Soviet propaganda piece *Man with a Movie Camera* to Luc Jacquet's heart-tugging wildlife epic *March of the Penguins*. In this concise, crisply written guide, Patricia Aufderheide takes readers along the diverse paths of documentary history and charts the lively, often fierce debates among filmmakers and scholars about the best ways to represent reality and to tell the truths worth telling. Beginning with an overview of the central issues of documentary filmmaking--its definitions and purposes, its forms and founders--Aufderheide focuses on several of its key subgenres, including public affairs films, government propaganda (particularly the works produced during World War II), historical documentaries, and nature films. Her thematic approach allows readers to enter the subject matter through the kinds of films that first attracted them to documentaries, and it permits her to make connections between eras, as well as revealing the ongoing nature of documentary's core controversies

involving objectivity, advocacy, and bias. Interwoven throughout are discussions of the ethical and practical considerations that arise with every aspect of documentary production. A particularly useful feature of the book is an appended list of "100 great documentaries" that anyone with a serious interest in the genre should see. Drawing on the author's four decades of experience as a film scholar and critic, this book is the perfect introduction not just for teachers and students but also for all thoughtful filmgoers and for those who aspire to make documentaries themselves. About the Series: Combining authority with wit, accessibility, and style, Very Short Introductions offer an introduction to some of life's most interesting topics. Written by experts for the newcomer, they demonstrate the finest contemporary thinking about the central problems and issues in hundreds of key topics, from philosophy to Freud, quantum theory to Islam.

Intermediality and Media Change - Juha Herkman 2012

Abstract: This book is about intermediality as an approach to analysing and understanding media change. Intermediality and Media Change is critical of technological determinism that characterises 'new media discourse' about the ongoing digitalization, framed as a revolution and creating sharp contrasts between old and new media. Intermediality instead emphasises paying attention to continuities between media of all types and privileges a comparative perspective on technological changes in media over time and space. The concept of intermediality refers to interaction and interrelationships between media. This focus is important in two ways. It strengthens the mutual construction and articulation of media (forms) as a vital element of the research agenda. In contrast to the emphasis on convergence, it also permits the consideration of the parallel construction and articulation of specific features and identities that characterise a medium, as well as the emergence of new divergences. Intermediality and Media Change studies intermediality from both theoretical and empirical perspectives. The book starts by positioning intermediality as a theory and a methodological approach. The first group of articles focuses on critical reflection of media and mediation as concepts. The second group deals with intermediality in discourses about media change. The third group concentrates on analysis of representative cases, and the fourth group focuses on media institutions and professions

My Name Is Mata Hari - Remy Sylado 2012

At the turn of the twentieth century, exotic dancer Mata Hari lived and loved by her own rules. *** My Name is Mata Hari tells the story of the infamous dancer and courtesan who began as Margaretha Geertruida Zelle, a young Dutch woman who married the older Rudolph MacLeod, a military officer, and traveled with him to the Dutch East Indies. Claiming her mother's Javanese ancestry, she changed her name to Mata Hari,

Malay for "eye of the day." Mata Hari danced on stages across Europe and the Middle East, and took many high-ranking military and government officials as her lovers. At the end of a tumultuous life, convicted for espionage during the First World War yet sustained by her pride, she said, "I am a genuine courtesan. And I am a dancer in the true sense." *** Remy Sylado is the pen name of noted Indonesian novelist, poet, playwright, and musician, Yapi Tambayong. He also wrote the screenplay for the award-winning film, *Ca Bau Kan* (2002). The Weaverbirds - Y. B. Mangunwijaya 2014

The story spans the formative days of Indonesian independence to Indonesia's oil crisis in the mid-1970s. But as adults, they find themselves on the opposite sides of the political spectrum. Even with their many differences, their relationship offers guidance to survival in a chaotic world.

The Academic Revolution - David Riesman 2017-09-08

The Academic Revolution describes the rise to power of professional scholars and scientists, first in America's leading universities and now in the larger society as well. Without attempting a full-scale history of American higher education, it outlines a theory about its development and present status. It is illustrated with firsthand observations of a wide variety of colleges and universities the country over-colleges for the rich

and colleges for the upwardly mobile; colleges for vocationally oriented men and colleges for intellectually and socially oriented women; colleges for Catholics and colleges for Protestants; colleges for blacks and colleges for rebellious whites. The authors also look at some of the revolution's consequences. They see it as intensifying conflict between young and old, and provoking young people raised in permissive, middle-class homes to attacks on the legitimacy of adult authority. In the process, the revolution subtly transformed the kinds of work to which talented young people aspire, contributing to the decline of entrepreneurship and the rise of professionalism. They conclude that mass higher education, for all its advantages, has had no measurable effect on the rate of social mobility or the degree of equality in American society. Jencks and Riesman are not nostalgic; their description of the nineteenth-century liberal arts colleges is corrosively critical. They maintain that American students know more than ever before, that their teachers are more competent and stimulating than in earlier times, and that the American system of higher education has brought the American people to an unprecedented level of academic competence. But while they regard the academic revolution as having been an historically necessary and progressive step, they argue that, like all revolutions, it can devour its children. For Jencks and Riesman, academic professionalism is an advance over amateur gentility, but they warn of its dangers and limitations: the elitism and arrogance implicit in meritocracy, the myopia that derives from a strictly academic view of human experience and understanding, the complacency that comes from making technical competence an end rather than a means.

Here, There Be Dragons - James A. Owen 2010-04-29

The year is 1917. Following the sudden death of his Professor, a young man and his two companions are approached by a strange man who gives them a book to safeguard. This book, the Imaginarium Geographica, is the reason the Professor was killed, and now, they too are in mortal danger. Chased by the ferocious Wendigo, half-man half-werewolf creatures, the three companions seek refuge on a ship - a ship that leads them to the extraordinary lands of myth and legend mapped in

the precious book they carry. As their adventure unfolds we learn that the friends are in fact C.S Lewis, J.R.R Tolkien and Charles Williams - and as they discover that events in the known world mirror those in the imaginary realm, they come to realise the importance of the Imaginarium Geographica, and if not protected, there will be no peace from the war that rages in our world.

Principles of Pragmatics - Geoffrey N. Leech 2016-02-17

Over the years, pragmatics - the study of the use and meaning of utterances to their situations - has become a more and more important branch of linguistics, as the inadequacies of a purely formalist, abstract approach to the study of language have become more evident. This book presents a rhetorical model of pragmatics: that is, a model which studies linguistic communication in terms of communicative goals and principles of 'good communicative behaviour'. In this respect, Geoffrey Leech argues for a rapprochement between linguistics and the traditional discipline of rhetoric. He does not reject the Chomskian revolution of linguistics, but rather maintains that the language system in the abstract - i.e. the 'grammar' broadly in Chomsky's sense - must be studied in relation to a fully developed theory of language use. There is therefore a division of labour between grammar and rhetoric, or (in the study of meaning) between semantics and pragmatics. The book's main focus is thus on the development of a model of pragmatics within an overall functional model of language. In this it builds on the speech act theory of Austin and Searle, and the theory of conversational implicature of Grice, but at the same time enlarges pragmatics to include politeness, irony, phatic communion, and other social principles of linguistic behaviour.

The Makings of Indonesian Islam - Michael Laffan 2013-12

Indonesian Islam is often portrayed as being intrinsically moderate by virtue of the role that mystical Sufism played in shaping its traditions. According to Western observers--from Dutch colonial administrators and orientalist scholars to modern anthropologists such as the late Clifford Geertz--Indonesia's peaceful interpretation of Islam has been perpetually under threat from outside by more violent, intolerant Islamic traditions that were originally imposed by conquering Arab armies. *The Makings of Indonesian Islam* challenges this widely accepted narrative, offering a more balanced assessment of the intellectual and cultural history of the

most populous Muslim nation on Earth. Michael Laffan traces how the popular image of Indonesian Islam was shaped by encounters between colonial Dutch scholars and reformist Islamic thinkers. He shows how Dutch religious preoccupations sometimes echoed Muslim concerns about the relationship between faith and the state, and how Dutch-Islamic discourse throughout the long centuries of European colonialism helped give rise to Indonesia's distinctive national and religious culture. *The Makings of Indonesian Islam* presents Islamic and colonial history as an integrated whole, revealing the ways our understanding of Indonesian Islam, both past and present, came to be.
