Bully for Brontosaurus: Reflections in Natural History - Stephen Jay Gould 2010-11-29

"Provocative and delightfully discursive essays on natural history. . . . Gould is the Stan Musial of essay writing. He can work himself into a corkscrew of ideas and improbable allusions paragraph after paragraph and then, uncoiling, hit it with such power that his fans know they are experiencing the game of essay writing at its best."--John Noble Wilford, New York Times Book Review

Cartesian Linguistics - Noam Chomsky 1966

As James McGilvray remarks in his introduction to this new edition of Cartesian Linguistics, the book was largely ignored and indeed denounced when first published in 1966. One likely reason why the first edition was ignored is that it contained many untranslated quotations from French and German authors. For this new edition these passages have all been translated into English. Perhaps the main reason why it was denounced is that Cartesian Linguistics contains, implicitly if not explicitly, trenchant criticisms of empiricist theories about linguistics and the mind. Due largely to Chomsky's efforts, these are not so

dominant now as they were when the first edition appeared in 1966, although they still command the attention of researchers and the public imagination. In his introduction Professor McGilvray focuses on the contrast between rationalist and empiricist approaches to language and the mind. He discusses at length the two most distinctive features of what he calls Chomsky's "rationalist-romantic" approach: its emphasis on linguistic creativity and its insistence that this creativity can be explained only by assuming that humans are endowed with innate concepts and mental faculties. In the course of the discussion he connects Chomsky's early treatment of these themes with his later development of them, and with Chomsky's well-known views on politics and education.

Gerasa and the Decapolis - David Kennedy 2013-11-20

During the Long Classical Millennium (fourth century BC to eighth century AD), Northwest Jordan was part of two worlds, looking west to the Mediterranean as well as east towards the Arabian desert. It was not only a collection of distinctive micro-regions but a 'virtual island', isolated by geography on all sides. Here one finds historical and archaeological data of an intensity and quality probably superior to that of any region in the Near East other than Israel. This book exploits some of that evidence to explain the character of an unusual region with a dense network of cities and an unexpected surge of settlement which reached a peak and extent not encountered again until the mid-twentieth century. It explores and develops some of the principal themes one may investigate for the region of Northwest Jordan, but which often apply to the Near East as a whole.

Leila - Antonio Fogazzaro 1911

Aristophanea - N. G. Wilson 2007-12-13

This book is designed as a companion to the new OCT of Aristophanes. After a brief introduction giving a sketch of the textual transmission of

the plays the editor discusses a large number of passages which present textual or other difficulties. Problems of this kind in many cases require notes that are too long and complex to be incorporated in the relatively limited space allocated to the apparatus criticus in the Oxford series.

Mimologies - Gärard Genette 1995-01-01

Do words--their sounds and shapes, their lengths and patterns--imitate the world? Mimology says they do. First argued in Plato's Cratylus more than two thousand years ago, mimology has left an important mark in virtually every major art and artistic theory thereafter. Mimology is the basis of language sciences and incites occasional hilarity. Genette treats matters as basic and staid as the alphabet and as reverberating as the letter R in ur-linguistics. Mimologies bridges mainstream literary history and Genette's expertise in critical method by undertaking an intensive study of the most vexed of literary problems: language as a representation of reality. --From publisher's description.

Technics and Time: The fault of Epimetheus - Head of the Institut de Recherche Et D'Innovation (Iri) Bernard Stiegler 1998

German Instrumental Music of the Late Middle Ages - Keith Polk 2004

This book describes instrumental music and its context in German society of the late middle ages - from about 1350 to 1520. Players at that time improvised, much like jazz musicians of our day, but because they did not use notated music, only scant remnants of their activity have survived in written sources, and much has been left obscure. This book attempts to reconstruct an image of their music, discussing the instruments, ensembles, and performance practices of the time. What emerges from this study is a fundamental reappraisal of late medieval culture. A musical life is reconstructed which was not only extraordinary in its own time, but which also laid the foundations of an artistic culture that later produced such giants as Schütz, Bach, Mozart and Beethoven.

Kant and the Platypus - Umberto Eco 2000-11-09

How do we know a cat is a cat . . . and why do we call it a cat? An “intriguing and often fascinating” look at words, perceptions, and the relationship between them (Newark Star-Ledger). In *Kant and the Platypus*, the renowned semiotician, philosopher, and bestselling author of *The Name of the Rose* and *Foucault's Pendulum* explores the question of how much of our perception of things is based on cognitive ability, and how much on linguistic resources. In six remarkable essays, Umberto Eco explores in depth questions of reality, perception, and experience. Basing his ideas on common sense, Eco shares a vast wealth of literary and historical knowledge, touching on issues that affect us every day. At once philosophical and amusing, *Kant and the Platypus* is a tour of the world of our senses, told by a master of knowing what is real and what is not. “An erudite, detailed inquiry into the philosophy of mind . . . Here, Eco is continental philosopher, semiotician, and cognitive scientist rolled all into one.” —Library Journal (starred review)

A Sand County Almanac - Aldo Leopold 2020-08-12

The Countess of Pembroke's Arcadia - Philip Sidney 1891

The Age of Disruption - Bernard Stiegler 2019-09-10

Half a century ago Adorno and Horkheimer argued, with great prescience, that our increasingly rationalized world was witnessing the emergence of a new kind of barbarism, thanks in part to the stultifying effects of the culture industries. What they could not foresee was that, with the digital revolution and the pervasive automation associated with it, the developments they had discerned would be greatly accentuated,

giving rise to the loss of reason and to the loss of the reason for living. Individuals are now overwhelmed by the sheer quantity of digital information and the speed of digital flows, resulting in a kind of technological Wild West in which they find themselves increasingly powerless, driven by their lack of agency to the point of madness. How can we find a way out of this situation? In this major new book, Bernard Stiegler argues that we must first acknowledge our era as one of fundamental disruption and detachment. We are living in an absence of *epokhē* in the philosophical sense, by which Stiegler means that we have lost our path of thinking and being. Weaving in powerful accounts from his own life story, including struggles with depression and time spent in prison, Stiegler calls for a new *epokhē* based on public power. We must forge new circuits of meaning outside of the established algorithmic routes. For only then will forms of thinking and life be able to arise that restore meaning and aspiration to the individual. Concluding with a dialogue between Stiegler and Jean-Luc Nancy, this book will be of great interest to students and scholars in social and cultural theory, media and cultural studies, philosophy and the humanities generally.

comes to describing his own weaknesses, which may be everyone's. A complete story in three parts at different times in the coming of age of young Calcare; three moments that have in common the all-too-familiar feeling of having tentacles at the throat.

Leonardo Da Vinci Painter - Giovanni Carlo Federico Villa 2011

More iconic images accrue to the name of Leonardo da Vinci than to any other artist. The "Mona Lisa" stands as a sort of primary visual signifier for "Art" itself, just as his drawing of Vitruvian Man stands as a primary visual signifier for "Man." This new da Vinci monograph presents this ultimate Renaissance man's complete corpus, from the most renowned oil paintings such as "Lady with an Ermine," "Virgin of the Rocks" and "Mona Lisa" to frescoes such as "The Last Supper" in Santa Maria delle Grazie Church and the ceiling frescoes of the Sala delle Asse in Castello Sforzesco in Milan. All works are reproduced in full-color plates, many of them augmented with detail plates that reveal the extraordinary care lavished by the artist upon his canvases. Also included are da Vinci's preparatory drawings and cartoons; works no longer extant, such as "The Battle of Anghiari," are enumerated as part of the da Vinci corpus. Affordably priced and superbly produced, this volume offers a basic da Vinci monograph for all. Leonardo da Vinci (1452-1519) was born in Florence and studied with the renowned painter Verrocchio, qualifying as a "master" at the age of 20 in 1472. After his apprenticeship he worked for Ludovico il Moro, later moving to Rome, Bologna and Venice before settling in France, where his final three years were spent in the service of François I.

The Eight Mountains - Paolo Cognetti 2018-03-20

For fans of Elena Ferrante and Paulo Coelho comes a moving and elegant novel about the friendship between two young Italian boys from different backgrounds and how their connection evolves and challenges them throughout their lives. "Few books have so accurately described the way stony heights can define one's sense of joy and rightness...an exquisite unfolding of the deep way humans may love one another" (Annie Proulx). Pietro is a lonely boy living in Milan. With his parents becoming more distant each day, the only thing the family shares is their love for the

mountains that surround Italy. While on vacation at the foot of the Aosta Valley, Pietro meets Bruno, an adventurous, spirited local boy. Together they spend many summers exploring the mountains' meadows and peaks and discover the similarities and differences in their lives, their backgrounds, and their futures. The two boys come to find the true meaning of friendship and camaraderie, even as their divergent paths in life—Bruno's in the mountains, Pietro's across the world—test the strength and meaning of their connection. "A slim novel of startling expansion that subtly echoes its setting" (Vogue), *The Eight Mountains* is a lyrical coming-of-age story about the power of male friendships and the enduring bond between fathers and sons. "There are no more universal themes than those of the landscape, friendship, and becoming adults, and Cognetti's writing becomes classical (and elegant) to best tell this story...a true novel by a great writer" (Rolling Stone Italia).
