**La Clase Mágica** - Olga A. Vasquez 2013-10-11  
La Clase Mágica: Imagining Optimal Possibilities in a Bilingual Community of Learners vividly captures the social and intellectual developments and the promises of an ongoing after-school project called La Clase Mágica. It is a blow-by-blow description of the early transformations of a project that began as an educational activity and slowly but deliberately turned into a social action project whose aim was to serve those with low economic and political means and little access to educational resources. This multivocal account details research in action for effectively serving Spanish-English bilingual speakers from a Mexican origin community, as well as--on a

broader level--the diverse populations that increasingly characterize American society today. The focus is on the early foundational work of the project between 1989-1996, though attention is also given to the national and international recognition the project has subsequently received, the college-going patterns of its long-term participants, and the transplantation of the project to other cultural communities. The book speaks out from the "zones of contact" between the university and a language minority community about new ways to extend and intersect theory and practice in many areas of the educational enterprise. Contact is defined not only in the physical sense of face-to-face interaction but also as symbolic interaction between languages, cultures, histories, and epistemologies. Thus, Vásquez speaks of optimal possibilities situated in the middle grounds, or more technically speaking, in the borders between Spanish and English, Mexican and mainstream culture, minority and majority designations, and between school and community contexts where contact is made and new arrangements are imagined. This account uses the reflections of participants at times to take readers from the scientific to the everyday, to make real and concrete the theoretical conceptualizations that box in human behavior. In this way, it defines the theories, methods, and philosophies for linking multiple disciplines, institutions, and participant groups into a concerted effort with potential to reframe the educational opportunities of under-served populations. A close look is provided into the intricacies and the fundamental principles for building and sustaining effective learning environments and institutional relations necessary for enhancing the potential of learners of all ages. In the process, the book also suggests ways in which community members and institutional agents can play an active and integral role in creating learning opportunities that serve both constituencies. Educators and policymakers will find the systems approach for pursuing parent and community involvement in the educational enterprise useful. In sum, the book offers researchers, practitioners, and policymakers much needed guidance, insight, and perhaps inspiration for rethinking educational goals and objectives.

The material is specifically designed to focus on those areas most likely to cause problems for young learners at this level. The Audio CDs, available separately, include listening material to accompany the Student's Book. The website to accompany the Fun for Starters, Movers, Flyers series includes interactive versions of some activities from the Student's Books.

**Science and the Production of Ignorance** - Janet Kourany 2020-02-18

An introduction to the new area of ignorance studies that examines how science produces ignorance—both actively and passively, intentionally and unintentionally. We may think of science as our foremost producer of knowledge, but for the past decade, science has also been studied as an important source of ignorance. The historian of science Robert Proctor has coined the term agnotology to refer to the study of ignorance, and much of the ignorance studied in this new area is produced by science. Whether an active or passive construct, intended or unintended, this ignorance is, in Proctor's words, “made, maintained, and manipulated” by science. This volume examines forms of scientific ignorance and their consequences. A dialogue between Proctor and Peter Galison offers historical context, presenting the concerns and motivations of pioneers in the field. Essays by leading historians and philosophers of science examine the active construction of ignorance by biased design and interpretation of experiments and empirical studies, as seen in the “false advertising” by climate change deniers; the “virtuous” construction of ignorance—for example, by curtailing research on race- and gender-related cognitive differences; and ignorance as the unintended by-product of choices made in the research process, when

rules, incentives, and methods encourage an emphasis on the beneficial and commercial effects of industrial chemicals, and when certain concepts and even certain groups' interests are inaccessible in a given conceptual framework. Contributors Martin Carrier, Carl F. Cranor, Peter Galison, Paul Hoyningen-Huene, Philip Kitcher, Janet Kourany, Hugh Lacey, Robert Proctor, Londa Schiebinger, Miriam Solomon, Torsten Wilholt

**Island of Shattered Dreams** - Chantal T. Spitz 2007

Finally in English, *Island of Shattered Dreams* is the first ever novel by an indigenous Tahitian writer. In a lyrical and immensely moving style, this book combines a family saga and a doomed love story, set against the background of French Polynesia in the period leading up to the first nuclear tests. The text is highly critical of the French government, and as a result its publication in Tahiti was polarising.

**Children Learn by Observing and Contributing to Family and Community Endeavors: A Cultural Paradigm** - 2015-12-08

*Children Learn by Observing and Contributing to Family and Community Endeavors*, the latest in the *Advances in Child Development and Behavior Series* provides a major step forward in highlighting patterns and variability in the normative development of the everyday lives of children, expanding beyond the usual research populations that have extensive Western schooling in common. The book documents the organization of children's learning and social lives, especially among children whose families have historical roots in the Americas (North, Central, and South), where children traditionally are included and contribute to the activities of their families and communities, and where Western schooling is a recent foreign influence. The findings and theoretical arguments highlight

a coherent picture of the importance of the development of children's participation in ongoing activity as presented by authors with extensive experience living and working in such communities. Contains contributions from leading authorities in the field of child development and behavior Presents a coherent picture of the importance of the development of children's participation in ongoing activity Provides a major step forward in highlighting patterns and variability in the normative development of the everyday lives of children, expanding beyond the usual research populations that have extensive Western schooling in common Informs and updates on all the latest developments in the field

*T.E. Lawrence* - Bodleian Library 1988  
"Here in stunning detail are the principal medieval settlements of Great Britain, which Scotland assuming an unfamiliar shape. There are also intriguing features such as an inscription referring to popular mythology which give a hint at the cultural context. Recent digitization of the map is helping to provide answers to questions and is making the map more legible than at any other time since its arrival in the Bodleian in 1809."--BOOK JACKET.  
Subtitling Through Speech Recognition - Pablo Romero-Fresco 2020-09-30

Based on sound research and first-hand experience in the field, *Subtitling through Speech Recognition: Respeaking* is the first book to present a comprehensive overview of the production of subtitles through speech recognition in Europe. Topics covered include the origins of subtitling for the deaf and hard of hearing, the different methods used to provide live subtitles and the training and professional practice of respeaking around the world. The core of the book is devoted to elaborating an in-depth respeaking course, including the skills required before, during and after the respeaking process. The volume also offers detailed analysis of the reception of respeaking, featuring

information about viewers' preferences, comprehension and perception of respoken subtitles obtained with eye-tracking technology. An accompanying DVD features a wealth of video clips and documents designed to illustrate the material in the book and to serve as a basis for the exercises included at the end of each chapter. The working language of the book is English, but the DVD also contains sample material in Dutch, French, Galician, German, Italian and Spanish. Subtitling through Speech Recognition: Respeaking is designed for use as a course book for classroom practice or as a handbook for self-learning. It will be of interest to undergraduate and postgraduate students as well as freelance and in-house language professionals. It will also find a reading public among broadcasters, cinema, theatre and museum managers, as well as the deaf and members of deaf associations, who may use the volume to support future campaigns and enhance the quality of the speech-to-text accessibility they provide to their members.

**Watch and Learn** - Eef Masson 2012  
Sinds de late jaren negentig is er een toenemende academische belangstelling voor zogenoemde 'gebruiksfilms'; films die bedoeld zijn om te informeren, te trainen of onderwijzen, of te overtuigen van het nut van een service of product. Onderzoek richtte zich tot nu toe in de meeste gevallen vooral op de productie- of distributiegeschiedenis van dergelijke films of hun pedagogische effect. Minder aandacht is er voor de tekstuele dimensie van deze films; de middelen die worden ingezet ter onderbouwing van hun informatieve, educatieve of commerciële argument. Intussen hebben 'gebruiksfilms' echter nog steeds het imago van een zeer 'formulair' genre. Eef Masson nuanceert dit beeld in haar boek en stelt een methodologie voor die de aandacht vestigt op de retorische diversiteit van deze films.

*Enduring Cancer* - Dwaipayan Banerjee 2020-07-24

In *Enduring Cancer* Dwaipayan Banerjee explores the efforts of Delhi's urban poor to create a livable life with cancer as patients and families negotiate an overextended health system unequipped to respond to the disease.

Owing to long wait times, most urban poor cancer patients do not receive a diagnosis until it is too late to treat the disease effectively. Drawing on ethnographic fieldwork in the city's largest cancer care NGO and at India's premier public health hospital, Banerjee describes how, for these patients, a cancer diagnosis is often the latest and most serious in a long series of infrastructural failures. In the wake of these failures, Banerjee tracks how the disease then distributes itself across networks of social relations, testing these networks for strength and vulnerability. Banerjee demonstrates how living with and alongside cancer is to be newly awakened to the fragility of social ties, some already made brittle by past histories, and others that are retested for their capacity to support.

**Easy Language - Plain Language - Easy Language Plus** - Christiane Maaß 2020-09-11  
This book shows how accessible communication, and especially easy-to-understand languages, should be designed in order to become instruments of inclusion. It examines two well-established easy-to-understand varieties: Easy Language and Plain Language, and shows that they have complementary profiles with respect to four central qualities: comprehensibility, perceptibility, acceptability and stigmatisation potential. The book introduces Easy and Plain Language and provides an outline of their linguistic, sociological and legal profiles: What is the current legal framework of Easy and Plain Language? What do the texts look like? Who are the users? Which other groups are involved in the production and use of Easy and Plain Language offers? Which qualities are a hazard to acceptability and, thus, enhance their stigmatisation potential? The book also proposes another easy-to-understand variety: Easy Language Plus. This variety balances the four qualities and is modelled in the present book.

The Innovation Paradox - Xavier Cirera

2017-10-02

Since Schumpeter, economists have argued that vast productivity gains can be achieved by investing in innovation and technological catch-up. Yet, as this volume documents, developing country firms and governments invest little to realize this potential, which dwarfs international aid flows. Using new data and original analytics, the authors uncover the key to this innovation paradox in the lack of complementary physical and human capital factors, particularly firm managerial capabilities, that are needed to reap the returns to innovation investments. Hence, countries need to rebalance policy away from R and D-centered initiatives †“ which are likely to fail in the absence of sophisticated private sector partners †“ toward building firm capabilities, and embrace an expanded concept of the National Innovation System that incorporates a broader range of market and systemic failures. The authors offer guidance on how to navigate the resulting innovation policy dilemma: as the need to redress these additional failures increases with distance from the frontier, government capabilities to formulate and implement the policy mix become weaker. This book is the first volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers.

Memory Development Between 2 and 20 -

Wolfgang Schneider 2013-03-12

For some time now, the study of cognitive development has been far and away the most active discipline within developmental psychology. Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive, 50% seems like a conservative estimate. Hence, a series of scholarly books devoted to work in cognitive development is especially appropriate at this time. The Springer Series in Cognitive Development contains two basic types of books, namely, edited collections of original chapters by several authors, and original volumes written by one author or a small group of authors. The flagship for the Springer Series is a serial

publication of the "advances" type, carrying the subtitle Progress in Cognitive Development Research. Each volume in the Progress sequence is strongly thematic, in that it is limited to some well-defined domain of cognitive developmental research (e. g. , logical and mathematical development, development of learning). All Progress volumes will be edited collections. Editors of such collections, upon consulting with the Series Editor, may elect to have their books published either as contributions to the Progress sequence or as separate volumes. All books written by one author or a small group of authors are being published as separate volumes within the series. A fairly broad definition of cognitive development is being used in the selection of books for this series.

A Beleaguered City - Margaret Oliphant

2017-07-20

Though Scottish-born author Margaret Oliphant dabbled in a remarkable number of literary genres over the course of her career, critics and fans alike agree that some of her most abiding contributions were her tales of fantasy, science fiction, and the supernatural, many of which broke new ground in their time. *A Beleaguered City* blends elements of fantasy and science fiction, and the end result is an astonishingly compelling read. Margaret Oliphant (4 April 1828 - 25 June 1897), was a Scottish novelist and historical writer, who usually wrote as Mrs. Oliphant. Her fictional works encompass "domestic realism, the historical novel and tales of the supernatural." In the 1880s she was the literary mentor of the Irish novelist Emily Lawless. During this time Oliphant wrote several works of supernatural fiction, including the long ghost story *A Beleaguered City* (1880) and several short tales, including "The Open Door" and "Old Lady Mary." Oliphant, during an often difficult life, wrote more than 120 works, including novels, books of travel and description, histories, and volumes of literary criticism.

**Subprime Attention Crisis** - Tim Hwang 2020-10-13  
From FSGO x Logic: a revealing examination of digital advertising and the internet's precarious foundation In Subprime Attention Crisis, Tim Hwang investigates the way big tech financializes attention. In the process, he shows us how digital advertising—the beating heart of the internet—is at risk of collapsing, and that its potential demise bears an uncanny resemblance to the housing crisis of 2008. From the

unreliability of advertising numbers and the unregulated automation of advertising bidding wars, to the simple fact that online ads mostly fail to work, Hwang demonstrates that while consumers' attention has never been more prized, the true value of that attention itself—much like subprime mortgages—is wildly misrepresented. And if online advertising goes belly-up, the internet—and its free services—will suddenly be accessible only to those who can afford it. Deeply researched, convincing, and alarming, *Subprime Attention Crisis* will change the way you look at the internet, and its precarious future. FSG Originals × Logic dissects the way technology functions in everyday lives. The titans of Silicon Valley, for

all their utopian imaginings, never really had our best interests at heart: recent threats to democracy, truth, privacy, and safety, as a result of tech's reckless pursuit of progress, have shown as much. We present an alternate story, one that delights in capturing technology in all its contradictions and innovation, across borders and socioeconomic divisions, from history through the future, beyond platitudes and PR hype, and past doom and gloom. Our collaboration features four brief but provocative forays into the tech industry's many worlds, and aspires to incite fresh conversations about technology focused on nuanced and accessible explorations of the emerging tools that reorganize and redefine life today.
