In the Name of Profit - Robert L. Heilbroner 2014-05-14

Said One Executive: "Why should my conscience bother me?" Here are dramatic true stories of executives whose desire for profit leads them into shameful decisions. Naming actual executive of major American companies, the authors portray corporate irresponsibility in human term. One executive is shown as he orders his subordinates to fake a lab report, even though the result might be loss of life. Others are shown as they bribe a city official, as they knowingly sell a dangerous drug, as they enrich themselves by betraying their stockholders. These men are not the familiar fast-buck artists, the petty cheats who can be dismissed as "bad apples." The authors reveal themselves as solid citizens, educated and well-respected. Yet in the course of business they easily yield to ambition, avarice or the corporate culture. And almost always, after they are exposed, they are promoted by their companies. Together these profiles, all of them written especially for this book, give life to questions raised by books such as *America, Inc.* and *The Greening of America*: · What kind of men run some super-corporations? · How can "good men" behave so badly" · Does working for a corporation mean violating one's conscience? After all the stories are told, the brilliant economist and social critic Robert L. Heilbroner offers a chapter of perspective. First he confronts the various positions on corporate responsibility—at one extreme, breaking up the big corporations; at the other, leaving executive entirely free to maximize profits. And then he cuts through to the realities if the matter, showing us where the best chance of remedy lies.

How to Think about War - Thucydides 2019-02-05

An accessible modern translation of essential speeches from Thucydides's *History* that takes readers to the heart of his profound insights on diplomacy, foreign policy, and war Why do nations go to war? What are citizens willing to die for? What justifies foreign invasion? And does might always make right? For nearly 2,500 years, students, politicians, political thinkers, and military leaders have read the eloquent and shrewd speeches in Thucydides's *History of the Peloponnesian War* for profound insights into military conflict, diplomacy, and the behavior of people and countries in times of crisis. *How to Think about War* presents the most influential and compelling of these speeches in an elegant new translation by classicist Johanna Hanink, accompanied by an enlightening introduction, informative headnotes, and the original Greek on facing pages. The result is an ideally accessible introduction to Thucydides's long and challenging *History*. Thucydides intended his account of the clash between classical Greece's mightiest powers—Athens and Sparta—to be a "possession for all time." Today, it remains a foundational work for the study not only of ancient history but also contemporary politics and international relations. *How to Think about War* features speeches that have earned the *History* its celebrated status—all of those delivered before the Athenian Assembly, as well as Pericles's funeral oration and the notoriously ruthless "Melian Dialogue." Organized by key debates, these complex speeches reveal the recklessness, cruelty, and realpolitik of Athenian warfighting and imperialism. The first English-language collection of speeches from Thucydides in nearly half a century, *How to Think about War* takes readers straight to the heart of this timeless thinker.

Let It Go - Stephanie Shirley 2019-04-04

A moving memoir from a woman who made a fortune in a man's world and then gave it all away...soon to be turned into a film In 1962, Stephanie 'Steve' Shirley created a software company when the concept of software barely existed. Freelance Programmers employed women to work on complex projects such as Concorde's black box recorder from the comfort of their own home. Shirley empowered a generation of women in technology, giving them unheard of freedom to choose their

own hours and manage their own workloads. The business thrived and Shirley gradually transferred ownership to her staff, creating 70 millionaires in the process. *Let It Go* explores Shirley's trail blazing career as an entrepreneur but it also charts her incredible personal story - her dramatic arrival in England as an unaccompanied Kindertransport refugee during World War Two and the tragic loss of her only child who suffered severely from Autism. Today, Dame Stephanie Shirley is one of Britain's leading philanthropists, devoting most of her time, energy and wealth to charities that are close to her heart. In *Let It Go*, Shirley tells her inspirational story and explains why giving her wealth away - letting it go - has brought her infinitely more happiness and fulfilment than acquiring it in the first place. Co-written with Richard Askwith, the former Executive Editor of *The Independent* and the award-winning author of seven books in his own name, including biographies of Emil Zátópek and Lata Brandisová. 'An extraordinary tale of creativity and resilience' - *Guardian* 'This engrossing story of an extraordinary life is filled with lessons in what it means to be human' - *Financial Times*

The Numinous Legacy - Adair Butchins 2002

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider the

The Market and the State - Michael Moran 2016-07-27

The connection between markets and states is one of the great themes of political science. The contributors tackle the theme in uniquely varied ways: through the eyes of historians of ideas and analytical political philosophers: from the vantage points offered by the market-state balance in Latin America, Africa and Eastern Europe: and through analyses of how states regulate some of the most important sectors of advanced industrial economies.

Affordable Credit - Collard, Sharon 2005-02-09

The poor pay more for many things but, arguably, it is the extra they pay for credit that puts the greatest strain on their budgets. This report looks beyond the rhetoric that has dominated much of the debate on high-cost credit to examine the scope for widening access to more affordable credit. The report explores what people on low incomes want from a credit source. It also analyses the constraints on lending to poor people. It looks at the scope for reducing the costs of lending and widening access to more affordable credit, and estimates the scale of demand for affordable credit. This report should be read by commercial and not-for-profit lenders, campaigners, policymakers and anyone studying or researching issues around poverty and financial exclusion.

Impro - Keith Johnstone 2012-11-12

Keith Johnstone's involvement with the theatre began when George Devine and Tony Richardson, artistic directors of the Royal Court Theatre, commissioned a play from him. This was in 1956. A few years later he was himself Associate Artistic Director, working as a play-reader and director, in particular helping to run the Writers' Group. The improvisatory techniques and exercises evolved there to foster spontaneity and narrative skills were developed further in the actors' studio then in demonstrations to schools and colleges and ultimately in the founding of a company of performers, called The Theatre Machine. Divided into four sections, 'Status', 'Spontaneity', 'Narrative Skills', and 'Masks and Trance', arranged more or less in the order a group might approach them, the book sets out the specific techniques and exercises which Johnstone has himself found most useful and most stimulating. The result is both an ideas book and a fascinating exploration of the nature of spontaneous creativity.

The Origin of Wealth - Eric D. Beinhocker 2006

Beinhocker has written this work in order to introduce a broad audience to what he believes is a revolutionary new paradigm in economics and its implications for our understanding of the creation of wealth. He describes how the growing field of complexity theory allows for evolutionary understanding of wealth creation, in which business designs co-evolve with the evolution of technologies and organizational innovations. In addition to giving his audience a tour of this field of complexity economics, he discusses its implications for real-world issues of business.

Free Annual File Disclosures (US Federal Trade Commission Regulation) (Ftc) (2018 Edition) - The Law The Law Library 2018-11-04

Free Annual File Disclosures (US Federal Trade Commission Regulation) (FTC) (2018 Edition) The Law Library presents the complete text of the Free Annual File Disclosures (US Federal Trade Commission Regulation) (FTC) (2018 Edition). Updated as of May 29, 2018 Section 205 of the Credit Card Accountability Responsibility and Disclosure Act of 2009 requires the Federal Trade Commission to issue a rule to prevent deceptive marketing of free credit reports. To that end, the Commission amends the Free Annual File Disclosures Rule to require certain advertisements for "free credit reports" to include prominent disclosures designed to prevent consumers from confusing these "free" offers with the federally mandated free annual file disclosures available through the single centralized source. In addition, the final amended Rule requires nationwide consumer reporting agencies to delay advertisements for products and services through the centralized source until after consumers receive their free annual file disclosures, and prohibits other practices that may interfere with the free annual file disclosure process. The final amended Rule also implements certain technical changes to the original Rule. This book contains: - The complete text of the Free Annual File Disclosures (US Federal Trade Commission Regulation) (FTC) (2018 Edition) - A table of contents with the page number of each section

Divine Beauty - John O'Donohue 2010-12-07

In this eagerly awaited follow-up to his international bestsellers *Anam Cara* and *Eternal Echoes*, John O'Donohue turns his attention to the subject of beauty - the divine beauty that calls the imagination and awakens all that is noble in the human heart. In these uncertain times of global conflict and crisis, we are riven with anxiety; our trust in the future has lost its innocence, for we know now that anything can happen from one second to the next. In such an unsheltered world, it may sound naive to suggest that this might be the moment to invoke and awaken beauty, yet this is exactly the claim that this book seeks to explore. *DIVINE BEAUTY* is a gentle but urgent call to awaken. O'Donohue opens our eyes, hearts and minds to the wonder of our own relationship with beauty. Rather than 'covering' this theme, he uncovers it, exposing the infinity and mystery of its breadth. His words return us home to the dignity of silence, the profundity of stillness, the power of thought and perception, and the eternal grace and generosity of beauty's presence. In this masterful and revelatory work, O'Donohue encourages our greater intimacy with beauty, and celebrates it for what it really is: a homecoming of the human spirit. As he focuses on the classical, medieval and Celtic traditions, on art, music, literature, nature and language, O'Donohue reveals how beauty's invisible embrace invites us towards new heights of passion and creativity. *DIVINE BEAUTY* is an exquisite treasury of Forms of the Beautiful. Its surface employs narrative, image, anecdote and myth, while into the silence of its subtext are sown seeds of reflection that gradually blossom in the heart.

Mistakes Were Made (but Not By Me) Third Edition - Carol Tavris 2020-04-28

A NEW EDITION UPDATED IN 2020 • Why is it so hard to say "I made a mistake" — and really believe it? When we make mistakes, cling to outdated attitudes, or mistreat other people, we must calm the cognitive dissonance that jars our feelings of self-worth. And so, unconsciously, we create fictions that absolve us of responsibility, restoring our belief that we are smart, moral, and right—a belief that often keeps us on a course that is dumb, immoral, and wrong. Backed by decades of research, *Mistakes Were Made (But Not by Me)* offers a fascinating explanation of self-justification—how it works, the damage it can cause, and how we can overcome it. Extensively updated, this third edition has many recent and revealing examples, including the application of dissonance theory to divisive social issues such as the Black Lives Matter movement and he said/she said claims. It also features a new chapter that illuminates how cognitive dissonance is playing a role in the currently polarized political scene, changing the nation's values and putting democracy itself at risk. "Every page sparkles with sharp insight and keen observation. Mistakes were made—but not in this book!" —Daniel Gilbert, author of *Stumbling on Happiness* "A revelatory study of how lovers, lawyers, doctors, politicians—and all of us—pull the wool over our own eyes . . . Reading it, we recognize the behavior of our leaders, our loved ones, and—if we're honest—ourselves, and some of the more perplexing mysteries of human nature begin to seem a little clearer." —Francine Prose, *O, The Oprah Magazine*

The Failure Project The Story Of Man's Greatest Fear - ANUP KOCHHAR 2017-08-11

"Failure destroys lives. It damages confidence and crushes the spirit. Throughout our lives we endeavour to manage our thoughts, actions and results so as not to be branded as failures. However, despite our best intentions, life does have a way of throwing curve balls and surprising us. Things do not always go the way we planned or wished for. Failure happens. And it will continue to happen. For most people failure is akin to a dreaded disease that must be prevented at any cost. Certainly it can never be admitted to. Failure is like fire - it has the power to singe or destroy completely. Few of us remember that failure can also be harnessed creatively. All that it requires is a different perspective. What do we know of failure? More importantly, how much do we know about it? The first step to overcoming our inherent fear of failure is to know the enemy - inside and out. This amazing, comprehensive and compassionate book helps us understand the anatomy, psychology and management of failure - the greatest, and often the most secret, fear of Man."

Low Carbon Nation? - Mike Hodson 2013-06-26

What does the transition to a Low Carbon Britain mean for the future development of cities and regions across the country? Does it reinforce existing 'business as usual' or create new transformational opportunities? Low Carbon Nation? takes an interdisciplinary approach to tackle this critical question, by looking across the different dimensions of technological, scientific, social and economic change within the diverse city and regional contexts of the UK. Hodson and Marvin set out how the transition to low carbon futures needs to be understood as a dual response to the wider financial and economic crisis and to critical ecological concerns about the implications of global climate change. The book develops a novel framework for understanding how the transition to low carbon is informed by historical legacies that shape the geographical, political and cultural dimensions of low carbon responses. Through a programme of research in Scotland, Wales, the North East of England, Greater London, and Greater Manchester, the authors set out different styles of low carbon urban and regional response. Through in-depth illustration of this in newly devolved nations, an old industrial region, a global city-region and in an entrepreneurial city, international lessons can be drawn about the limits and the unrealised opportunities of low carbon transition. This book is key reading for students on geography, economics, planning and social science degrees, as well as those studying sustainability in related contexts trying to understand the urban and regional politics of low carbon transition. It is also an essential resource for policymakers, public officials, elected representatives, environmentalists and business leaders concerned with shaping the direction and type of transition.
