Designed for students preparing for the Cambridge exams, each book in this series offers both students and teachers comprehensive support, including revision sections, mini dictionaries and appendices in the students' books, and model answers, photocopiable tests and marking schemes in the teacher's books. The books can be used either as free-standing supplementary material, or as a complete exam preparation series. They are designed to develop the essential language skills and sub-skills students need for each exam paper; they also offer specific training and guidance for each part of the exams, with an abundance of practice based on realistic test tasks.

*Use of English* - Mark Harrison 2004

Reading Inca History - Catherine Julien 2009-05-01

At the heart of this book is the controversy over whether Inca history can and should be read as history. Did the Incas narrate a true reflection of their past, and did the Spaniards capture these narratives in a way that can be meaningfully reconstructed? In *Reading Inca History*, Catherine Julien finds that the Incas did indeed create detectable life histories. The two historical genres that contributed most to sixteenth- and seventeenth-century Spanish narratives about the Incas were an official account of Inca dynastic genealogy and a series of life histories of Inca rulers. Rather than take for granted that there was an Inca historical consciousness, Julien begins by establishing an Inca purpose for keeping this dynastic genealogy. She then compares Spanish narratives of the Inca past to identify the structure of underlying Inca genres and establish the dependency on oral sources. Once the genealogical genre can be identified, the life histories can also be detected. By carefully studying the composition of Spanish narratives and their underlying sources, Julien provides an informed and convincing reading of these complex texts. By disentangling the sources of their meaning, she reaches across time, language, and cultural barriers to achieve a rewarding understanding of the dynamics of Inca and colonial political history.

Testing the Untestable in Language Education - Amos Paran 2010

The testing and assessment of language competence continues to be a much debated issue in foreign language teaching and research. This book is the first one to address the testing of four important dimensions of foreign language education which have been left largely unconsidered: learner autonomy, intercultural competence, literature and literary competence, and the integration of content and language learning. Each area is considered through a theoretical framework, followed by two empirical studies, raising questions of importance to all language teachers: How can one test literary competence? Can intercultural competence be measured? What about the integrated assessment of content-and-language in CLIL and teaching? Is progress in autonomous learning skill gaugeable? The book constitutes essential reading for anyone interested in the testing and assessment of seemingly largely untestable aspects of foreign language competence. "The title of this book is well chosen. Despite the apparent oxymoron, this collection of papers succeeds in addressing important issues of educational policy and theory with the precision born of empirical work combined with discussion of principles. This book will open new options for testers, for teachers and for those who make policy decisions." Michael Byram, School of Education, University of Durham, UK

**The Nelson First Certificate Course** - Susan Morris 1996

First Certificate practice tests plus : with key, with iTests, [with December 2008 exam specifications] - Nick Kenny 2008

First Certificate Practice Tests Plus new edition contains complete practice exams for the FCE exam as well as useful tips to enhance your students' chance of exam success.

*Language Use and Language Learning in CLIL Classrooms* - Christiane Dalton-Puffer 2010-12-15

This volume explores a highly topical issue in second and foreign language education: the spreading practice in mainstream education to teach content subjects through a foreign language. CLIL has been enthusiastically embraced as a language enrichment measure in many contexts and finally research can offer principled insights into its

dynamics and potentials. The editors' introductory and concluding chapters offer a synthesis of current CLIL research as well as a critical discussion of unresolved issues relating both to theoretical concerns and research practice. The individual contributions by authors from a range of European contexts report on current empirical research in this dynamic field. The focus of these chapters ranges from theoretical to empirical, from learning outcomes to classroom talk, examining both the written and spoken mode across secondary and tertiary educational contexts. This volume is a valuable resource not only for researchers and teachers but also for policy makers.

Developing Strategies in Reading Comprehension / Английский язык. Стратегии понимания текста. Часть 1 - Елена Карневская 2016-07-31  
Является первой частью учебного пособия, предназначенного для развития навыков чтения и смыслового восприятия письменного текста различных стилистических и жанровых видов. **Proficiency Reading** - Mary Stephens 2000

**Content and Language Integrated Learning** - Yolanda Ruiz de Zarobe 2009-05-11

This book contributes to the growth of interest in Content and Language Integrated Learning (CLIL), an approach to second/foreign language learning that requires the use of the target language to learn content. Within the framework of European strategies to promote multilingualism, CLIL has begun to be used extensively in a variety of language learning contexts, and at different educational systems and language programmes. This book brings together critical analyses on theoretical and implementation issues of Content and Language Integrated Learning, and empirical studies on the effectiveness of this type of instruction on learners' language competence. The basic theoretical assumption behind this book is that through successful use of the language to learn content, learners will develop their language proficiency more effectively while they learn the academic content specified in the curricula.

Going for Gold - Sally Burgess 2003

The course for adults and young adults that develops language skills and sets students firmly on the road to exam success. The Language

Maximiser is packed with grammar and vocabulary consolidation and extension, plus extra reading, writing, listening and speaking practice to complement the coursebook.

1986 - 000000 000000 00 00000000 0 000000

**Principles and Practice in Second Language Acquisition** - Stephen D. Krashen 1982

The present volume examines the relationship between second language practice and what is known about the process of second language acquisition, summarising the current state of second language acquisition theory, drawing general conclusions about its application to methods and materials and describing what characteristics effective materials should have. The author concludes that a solution to language teaching lies not so much in expensive equipment, exotic new methods, or sophisticated language analysis, but rather in the full utilisation of the most important resources - native speakers of the language - in real communication.

**New Proficiency Reading** - Mary Stephens 2002

The Longman Exams Skills series is for students preparing for the First Certificate and Proficiency exams. The books in each set provide through

preparation for each of the papers with lots of practice based on real exam tasks.
